Marketing Quota Being Converted To Acreage Figure

Kentucky county and community committeemen are now establishing preliminary farm allotments to convert the State's share of the 1947 Burley tobacco marketing quota to an acreage figure, M. D. Boyse, State Director of the Production and Marketing Administration, said this week.

The Burley quota for 1947, proclaimed October 2 by the Secretary of Agriculture, is 490 million pounds. This quota when converted to a 1947 acreage allotment will total approximately 480,000 acres for the entire Burley producing area, the Department of Agriculture estimated.

The relationship among individual farm acreage allotments for 1947 generally will remain the same as in 1946, Boyse said. The 1947 allotment for any farm will not be less than 80 per cent of the 1946 allotment if the acreage grown on the farm was as much as 75 per cent of the allotment in any one of the past three years. Any 1946 allotment of nine-tenths acre or less will not be reduced for 1947 if any Burley tobacco has been grown on the particular farm in the past five years.

Boyse pointed out that the exact percentage of reduction for 1947 in allotments of more than nine-tenths acre cannot be figured until preliminary allotments are completed by counties and by other States in the Burley area. The work on these allotments probably will not be completed before late in January, he added.

Figures compiled so far, Boyse said, indicate that the reduction will be somewhere between 18 and 20 per cent, and farmers will do well to plan their crops for next year on the basis of a full 20 per cent reduction.

County offices will notify each Burley grower of the allotment established for his farm in 1947 as soon as the allotments are approved, Boyse said.

In addition to the general acreage reduction, under quotas an acreage not more than two per cent of the acreage allotted to all farms in the State for 1946 is made available for adjustment of allotments which are out of line with those for similar farms in the community, and one-half of one per cent of the 1947 allotment is available for establishing allotments for farms on which no Burley tobacco has been grown during the past five years.

With marketing quotas in effect, any tobacco marketed in excess of the farm marketing quota is subject to a penalty equal to 40 per cent of the average market price of the preceding crop. Based on the average price of the 1945 crop, the penalty on excess Burley tobacco in the 1946 crop is 16 cents per pound.

A MAN FELT LIKE HIS BONES WERE BROKEN, DUE TO RHEUMATISM

One man recently stated that for years he felt like the bones in his legs were broken. This was due to muscular rheumatism. His muscles were swollen and his legs so stiff and sore that he couldn't walk without limping. He was in misery. Recently he started taking RHU-AID and says the feeling like his bones were broken disappeared the second day. The swelling and stiffness has gone from his muscles; now he can walk without suffering and says he feels like a new man.

RHU-AID contains Three Great Medical Ingredients which go right to the very source of rheumatic and arthritic aches and pains. Miserable people soon feel different all over. So don't go on suffering! Get RHU-AID. Hopkins Drug Store.

Okay To Light Home Trees

It's all right to light up the kids' indoor Christmas tree, Santa Claus, but leave the others dark.

John D. Small, civilian production administrator, gave the word. He ruled the 21-state dimout banning ornamental lighting because of the coal strike was not meant to cover indoor Christmas trees in homes.

But it does apply to indoor trees in stores and other business buildings, and all outdoor Christmas trees.
