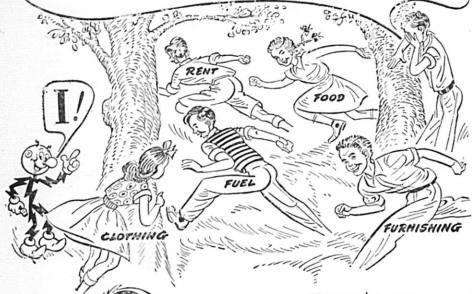
Bushel of wheat! bushel of rye!
All not HIGHER, holler "I"!



Remember way back when you and I played hide-and-seek in the twilight of a summer evening? After you I counted up to 100 by fives, you gave your last warning: "Bushel of wheat. Bushel of rye! All not *ready*, holler 'I'."

We hope you'll forgive us for twisting this old rhyme around a bit, but we can't help feeling just a little proud of the way we've kept the cost of your electric service down when the cost of everything else (including food, clothing, fuel, etc.) was going up and up.

Back, say 10 or 12 years ago, when *some* of you were playing hide-and-seek, a bushel of wheat bought only 18 kilowatt hours of electricity.

Today that same bushel will buy 84 kilowatt hours. Today—or any day—electricity, the lowest cost item in your family budget, is worth more than it costs.
