

Proposal I:

- students with 90 or above score(s) on either Measurements 1 and 2 to be placed in the PTP automatically
- frequency table shows 35% (23 students) of those screened have an 80% or higher composite score; showing 80% to be a lenient cut score, well above the 25% average
- use additional assessment documentation in policy as needed to limit the pool to 25% of those screened
