Mrs. Maude Gillispie spent the past week with Mr. and Mrs. Burroughs Gillispie.

Guests of Mr. and Mrs. Joe Hopkins during the past week included Mrs. Hattie Huff of Chicago and Mr. and Mrs. Charlie Hopkins of Nicholasville.

Mr. John Crouch of Lexington spent several days the past week with his brother, Mr. G. F. Crouch, who continues ill at his home here.

Born Monday, October 4, a daughter to Mr. and Mrs. Lowell Thompson Vice at the Bethesda hospital in the city of Cincinnati. Mrs. Vice was before her marriage, Miss Helen Gayle Darrell of Carlisle.

UK Enrolls Record 7,863

Fall semester enrollment in the University of Kentucky is at an all-time record peak of 7,863 resident students, Dr. Maurice F. Seay, registrar, reported this week. The total includes 7,454 on the Lexington campus, 232 upperclassmen at the College of Pharmacy in Louisville and 177 at the Northern Extension Center in Covington.

UK Professor In Japan

A University of Kentucky English professor, Dr. George K. Brady, is in Japan on a four-month assignment as a literary advisor to the American Military Government. He is the fourth U. K. faculty or administrative staff member to go abroad for MRA in recent months.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, AS AMENDED BY THE ACTS OF CONGRESS OF MARCH 3, 1933, AND JULY 2, 1946.

Of The Carlisle Mercury published weekly at Carlisle, Kentucky, for October 1, 1948.

State of Kentucky, County of Nicholas, ss

Before me, a Notary Public in and for the State and county aforesaid, personally appeared Warren R. Fisher Jr., who, having been duly sworn according to law, deposes and says that he is the Publisher of The Carlisle Mercury and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, as amended by the Acts of March 3, 1933, and July 2, 1946, embodied in section 537, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher and editor are: Publisher, Warren R. Fisher Jr., Carlisle, Kentucky, and Editor, Sag Kash, Carlisle, Kentucky.

2. That the owner is: Mrs. Warren Fisher, 1616 Nicholasville Rd., Lexington, Ky.

3. That the average number of copies of each issue of this publication sold or distributed through the mails or other wise, to paid subscribers during the twelve months preceding the date shown above is 1,115.6.

Signed
Warren R. Fisher Jr.

Sworn to and subscribed before me this 1 day of October, 1948.

BIBLE COMMENT

A Deeper Respect Of Law Needed to Fulfill Its Purpose

"O HOW I love Thy law," declares the Psalmist in Psalm 119:97.

It would be a remarkable statement, if it were found anywhere else but in the Bible, and on the part of anyone but a devout Israelite. The good citizen, in the most law-abiding community, may have respect for law. He may obey it scrupulously, or resist it, if he feels any of its provisions to be unjust. But he hardly feels any affection for it.

Why, then, did the devout Israelite profess such a deep and intense affection for the law?

It was because "the law" to the devout Israelite represented the perfect ideal of individual character and of the relations of men to one another. It was the law of God, the expression of God's will, insisting that the decorest and highest thoughts and meditations of the sincere, and full of wisdom things (Psalm 119:14).

It was the fragrity of Israel that the law, which to the noblest and the devout was concentrated in the purpose to love God with all the heart, soul, mind, and strength, became corrupted into a multiplicity of rules and observances that had lost any real moral value.

All law, whether of God or of man, is subject to such degradation. Men interpret and pervert the laws of God to their own ends, presuming to attach divine sanction to their own purposes and enactments. The law that ought to be the bulwark of freedom, for the maintenance of human rights and the defense against wrongs, on the basis of distinction and usurpers of power, becomes an instrument of oppression.

The laws of man may fall far short of the law of God as the perfect ideal, but insofar as they represent order, security and protection, we need an increasing vision of what law can be and ought to be. We need a deeper respect for law in fulfilling its purpose.

And insofar as law is a fundamental instrument of democracy, perhaps we need a love of the "skin to that of the devout Jew."

BUICK FIREBALL
PAY AS YOU DRIVE IF YOU WISH—
POWER PACKED AND SET TO GO!
No Waiting for This Brand-New Fireball Engine. Get This Thrill Today!
YOU can dish yourself up a full portion of the zip and go that make today's Buick engine the leader of the parade.
You can thrill again to the surge of brand-new Fireball power—under the bonnet of your prewar Buick. And you can get action—and action now.
In from one to two working days, we can take the weary engine out of your faithful 1937 or later model Buick—replace it with a sparkling new 1948 Fireball engine fresh from the factory.
It's a complete power package. You get all the items listed in the panel—let everything new from carburetor to clutch, valves to oil pan. You get every design and construction feature that puts today's Buick engine out in front. Best of all—your engine is waiting for you in our shop *right now*—because engine output has outstripped new-car production at the factory.
The cost—varying a bit from model to model—is low enough to make this power package a prize bargain. So why delay any longer the thrill of owning and driving a 1948-powered car? Come in today to see how simple the whole thing is.
You get all this—ALL NEW!
NEW Cylinder Block
NEW Crankshaft and Bearings
NEW Connecting Rods
NEW Pistons, Pins and Rings

BUILD UP YOUR SOIL
FOUR-LEAF PHOSPHATE
You can build the organic matter and nitrogen, as well as the phosphorus of your soil . . . by applying FOUR-LEAF Powdered Rock Phosphate and growing a legume in your rotation. Legumes feed hungrily on powdered rock phosphate, grow luxuriantly, leave roots and residues rich in nitrogen from the air. Phosphated legumes and following crops grow increased residues to build the organic matter of the soil, make it easier to work and increase its water holding capacity. This is the effective, inexpensive way to bigger crops and richer pastures.

RUPTURE

Expert Coming to Paris Again

GEO. L. HOWE

Well-known expert, of Indianapolis, and ex-U. S. Army Medical Corps man, will personally demonstrate his method without charge at the Bourbon Hotel, Paris, Tuesday, Oct. 12th from 1 p. m. to 6 p. m.

Mr. Howe says the Howe method contracts the openings in remarkably short time on the average case, regardless of the size or location of the rupture, and no matter how much you lift or strain, and puts you back to work the same day as efficient as before you were ruptured.

The Howe Rupture Shield has no leg strap, waterproof, sanitary, practically indestructible, and can be worn while bathing. Each shield is skillfully molded and fitted to the parts under heat, which gives a perfect fit and satisfaction.

Large and difficult ruptures following operations especially solicited.

Do not overlook this opportunity if you want gratifying results. Mailing address P. O. Box 5233 E. Michigan St. Station, Indianapolis, 1, Ind.

Soil Conservation Notes—

Farmers Estimate Face-Lifting Job Has Doubled Value Of Fleming Farm

Men and machines swarmed over the farm of Glen T. Brown in Fleming county, Sept. 24, and in one day completely made over the farm, while thousands of visitors watched the transformation in amazement.

A month ago, Brown's farm was a typical Fleming county farm, no worse perhaps than many, but decidedly eroded and in need of soil conservation. Today it is a good example of how thousands of old, worn-out Kentucky farms can be brought back into productiveness.

To see this miracle, an estimated 4,000 people came early and stayed late. Automobiles, trucks, and buses covered acres of parking space. Press and radio representatives were present. Photographers made pictures, and agricultural experts observed and directed.

More important was the volunteer workers and the $150,000 worth of farm equipment without which the job could not have been done.

But done it was. Work got underway at 7 a. m. Friday. By 11 a. m. various pieces of equipment were already idle, their jobs completed. By 3 p. m. much of the Caravan had been assembled and was rolling down Highway 32 enroute to another face-lifting job in Morgan county.

Achieved in the one day was a complete farm remaking, a soil conservation program established that would take the average farmer from three to five years to accomplish. Farmers present estimated that in the process the farm's value had nearly doubled.

Conservation practices established included the construction of soil holding terraces on cultivated land, pasture land established, a farm pond built, cultivated land limed and fertilized, an old pond torn down and smoothed out, and many others.

Preparations for the face-lifting had been underway for some time. Several months ago the State Association of Soil Conservation Districts Supervisors began casting about for some means of speeding up soil conservation in the state. Someone came up with the idea of assembling a lot of heavy farm equipment in a caravan, take it about over the state, and hold a series of field days at which complete soil and water conservation programs would be established in one day.

The caravan left Louisville September 18. The Huey farm in Boone county was the first one to be visited. A total of 12 farms over the state will be remodeled before the caravan ends in Lake county, October 19. The 30 days the caravan will be on the road has been proclaimed Conservation Month by Governor Clements.

At 1 p. m. Friday, visitors assembled at a central spot on the farm for a speaking program, just after lunch had been served by the William Dudley chapter, Daughters American Revolution and the Woman's Society of Christian Service, Nepton Methodist church.

Dr. T. S. Buie, regional conservator, Soil Conservation Service, Spartanburg, S. C., and A. Threkeld, president of the Kentucky Association of Soil Conservation District Supervisors were the principal speakers on the program.

Dr. Buie pointed out that we must take care of our land, that the conservation work must go forward if America is to be a prosperous country and if we are going to keep our children from going hungry. "We cannot have freedom from want, freedom from fear, unless we do protect our land and provide the food, fiber and other necessities of life from the soil," he said.

"This great occasion, taking the message of Soil Conservation to the people of Kentucky, is a wonderful idea, showing how the land can be made to produce indefinitely," Dr. Buie said. "The use of land somewhat parallels with the Kentucky Derby. We would not expect a percheron horse to win the Derby neither should we expect land suited only to pasture to continually produce good tobacco. Use land for the purpose it is best suited. I don't like to think of the job being completed today when the equipment leaves this farm, but when the message has been taken to others and conservation speeded up in the State."

Threlkeld said, "It is hoped the Caravan will help to let people in Kentucky know about soil conservation. Soil conservation must be applied on all Kentucky farms. The soil conservation district is the answer to that challenge. The state is almost covered by districts, however, there is still much to be done. There is still too much land being lost."

Dr. Buie and Threlkeld congratulated Brown on his vision in working with the District. Both pointed out that it's a step all must make if we are to preserve our American way of life.

Fertilizer, Grass Improves Thin Land

How thin sandstone land can be built up with fertilizer to make good pasture was demonstrated on a farm in Crittenden county. Farm Agent Oakley M. Shelby tells of a check-up on three 10-acre pastures at the close of a 20-year period.

In 1928, the same seeding mixture was used in each of three fields which have since remained in pasture. One field received no special treatment, the second field received rock phosphate, and the third field, limestone and superphosphate. A careful record shows that the average yearly gain of steers grazing on the first field was only 480 pounds live weight, from the second field where rock phosphate was applied, 1,619 pounds, and from the third field where limestone and superphosphate were used, 1,621 pounds.

The seeding mixture per acre used on all the fields consisted of orchard grass, 6 pounds; redtop, 2-3 pound; Canada bluegrass, 2 pounds; Kentucky bluegrass, 2 pounds; white clover, 1 pound; sweet clover, 1 pound; common lespedeza, 1 2-3 pounds, and Korean lespedeza, 1 2-3 pounds.

Montana's first paper appeared in Virginia City in 1864.

Nelson Farmer Shows Champion Ton-Litter

Eight pigs weighing 1,960 pounds when 165 days old won the state ton-litter contest championship for Marvin Greer of Nelson county. They sold for $34 a hundredweight.

The champion single pig was shown by Glen Gooden of Taylor county. It weighed 250 pounds and sold for $36 a hundred.

"10½ Tons at 7⅗ miles per gallon
with my new FORD F-8 BIG JOB"
Roadside Report
C. Crouse
Maryland
GEORGE R. NORRIS
"The drivers of the trailers we passed on the hills came over filled with curiosity and most anxious to look over this powerful Ford BIG JOB", reports Clifton C. Crouse of Chase, Maryland.
"I made my first run with this new unit hauling a 10½-ton payload from Baltimore to New York and was pleased with the ease I was able to pass other trailers dragging on inclines . . . the visibility and ease of handling made it a pleasure to drive . . . I averaged 7-3/5 miles per gallon."
