A Remarkable Circumstance.—The Death of a Mother.

[From the Cynthiana Democrat.]

Esoleen Smith, the son of Robert and Mary Smith, of this (Harrison) County, Ky., was born November 17th, 1822, and died the 3d of October, 1869. His parents are still living, and are each seventy-four years old.

Esoleen was a bright and beautiful child, until he was about four and a half months old, when he was taken with the dropsy. For nine times forty or six months he had spasms every day, at the close of which the growth of his head ceased. He never appeared to have any more mind than he had when he was first taken sick. He never learned to talk, except to utter a few unconnected words. Most of the time he was afflicted with spasms, and he lay without motion of hand, foot or eye.

During the last fifteen or twenty years of his life he slept only on every other night, and he sang and hallowed all night when he was awake. For at least one third of his life he seemed to suffer the most excruciating pain. Drs. Joel Frazier, of Cynthiana, Shropshire, of Millersburg, and Sharp, of Shawhurg, attended him in his early sickness, but his devoted mother, though much afflicted herself, was his constant nurse, during his long and painful life. All the food he ever ate was placed in his mouth by her, except at short intervals when she was unable to attend him. She has gotten up on an average of at least three times every night from the time he was four months old, until his death, to attend to, or care for him. Her earnest wish and fervent prayer has been that she might live to see him pass away. Her pray r has been answered, and through the goodness of God she still lives. This is certainly one of the most remarkable cases on record, and the unwavering life of the afflicted child is not more remarkable than the love and devotion of his mother. Truly no earthly love is like that of a mother's.

A Noble Indian Chief.—A correspondent of the Chicago Tribune, writing from the Indian country, says of the Snake Indians: This

THE

ECONOMY BUTTER CO'Y.

Ask the attention of all interested in the question of the extravagant cost of butter to the most practical and economical system ever offered for the purpose of

Extract of Butter Plant.

A brief allusion to the origin of this important discovery may prove interesting. Among the authenticated records of the Peruvian and Captain Cook's voyages around the world, is found the statement, that while sojourning for a short time, on the Brazilian coast of South America, he observed the natives, using in the preparation of their food, a peculiarly, which upon examination, he found to possess the appearance, taste and flavor of butter; upon further inquiry, he ascertained that it was simply a substance that the natives distilled by a crude and imperfect manner, from a tree which grew abundantly in that section. Subsequently, a few years ago, a botanical visit to the tropics, while in connection with this remarkable production of nature, and succeeding in extracting a concentrated essence of the plant. The formula for its preparation, and the sole right for its sale in this country are the exclusive property of this Company, by whom it was purchased from the original discoverer. We claim for this remarkable, and yet simple and harmless preparation—

1st.—That by its use a net gain of from 50 to 200 per cent. is made from the manufacture of Butter.

2d.—That Butter, which from age or whatever cause, may be strong, rancid, streaked or coarse-grained, and comparatively useless for general use, by the aid of this extract is restored to its original freshness and sweetness, fine grain and even color.

3d.—By the use of this extract, one pound of delicious, fresh butter is actually made from one pint of milk.

4th.—Less salt and excellent table butter can be made, at a cost of from 15 to 20 cents per pound. The chief expense thereby being butter, which is the essential item.

5th.—That butter manufactured by the aid of this extract, is equal in every respect to the best butter made by the ordinary method.

6th.—The extract, after thorough analysis, by able chemists, is pronounced perfectly free from any deleterious substance, the ingredients being purely of a vegetable nature.

7th.—In proof of the foregoing assertions, the factory of this company is making one ton of butter per day, which meets with ready sale in the New York market, and is consumed from the tables of the first hotels, restaurants and private families in that city and elsewhere.

A sample package of the extract, sufficient to make fifty pounds of butter, with full instructions for use, will be sent to any address on the receipt of one dollar.

CAUTION.—As all articles of real merit are subject to spurious imitations, we would respectfully caution the public against counterfeits and worthless imitations advertising to [illegible] Extract of Butter Plant, as the genuine article is manufactured by the Economy Butter Co. [illegible]
