JAS. McCONOUGHHAY.

ANNOUNCEMENTS

FOR CONGRESS.

We are authorized to announce Hon. R. A. Alvis as a candidate for re-election to the Forty-sixth Congress, subject to the action of the Democratic voters of the Ninth District of Kentucky, subject to the action of the Democratic District Convention.

FOR JUDGE OF ROBERTSON CO.

We are authorized to announce Hon. Wm. Bramlette as a candidate for re-election to the office of Judge of Robertson county, subject to the action of the Democratic voters.

THE Convention to nominate a candidate to the Congressional Convention will be called for court day in September.

MR. JOHN BLAIR believes in rotation in office. He wants to retain himself out of the County Commissionership into the County Judgeship. It is thought he will resign as County Commissioner in order to be elected County Judge. We hope he will not be so reckless, as he will be beaten for Judge, and then we would be without a Blair in office in the county—wouldn't even have a gauger and storekeeper—in short the county would go to the dogs completely.

Trial Four Dollars Per Day

Mr. Wallace Blair was about to climb our county frame last Saturday for having stated in our last issue that he was drawing four dollars per day as a Government gauger in the county, and produced a circular from the collector showing that he had been relieved of duty.

It appears that Banta & Barden are not distilling at present, and so there is not enough whisky in the storehouse to justify the Government in paying Mr. Blair four dollars a day for the arduous and responsible duty of carrying the keys, so he was promptly relieved by the collector. Not knowing this fact, we made the statement in question, having recently overheard Judge Banta make such an order in the case. He still holds his commission however, and is liable at any time to be invited to take another trip at the Government's expense in the Government mules.

He is not holding an office because there is no office to hold. If there is a Government store in the county or anything four dollars per day to be had, we would be pretty sure to have found tugging away at the heavens end of it. He has been turned on Government milk for he "does many years, and it will be a hard matter for to many to know that at present he is not drawing a Government salary.

What is Kentucky—A Word to Farmers.

Kentucky when, it is said, is being the largest tobacco in the world markets, and is truly sought after. Our farmers of all sections have an abundant harvest, and by co-operation with their neighbors can be induced up to or better than the average per acre in this, the best tobacco State, however for output as in quantity because the fact of growing some counties having an average of forty, fifty and sixty thousand pounds against eighteen hundreds to the acre. The farmers of these and other counties in Kentucky should make an effort to increase the yield of this fall's sowing, and prepare the ground to receive about putting in the seed. It is said extremes—hyper extremes—in weather in its minor forms and therefore we are likely to have a severe winter, and to prevent any wheat against heavy freezes, the drill should be used as much as possible in planting wheat. Where the drill is not used, the seed should be put in furrow, and the furrow turned so as to cover the seed to the depth of three inches from the inside outside. The North western states are the drill in planting, hence their success as to the certainty of crops.

Those Mutilated Records of Headquarters.

The report had been diligently engaged for several days past, and on last Monday, that the poll books of the primary election at Hendersonville election Judges, William Jones and Alex Taylor, Sheriff Henry Bell, Clerk Green Smith. The mere fact that these gentlemen had charge of the polls was thunderbolt evidence that no fraud could be perpetrated, but it was submitted as additional evidence that the books were examined by the present James Sadler, Esq., last Monday in three lasting made the charges, and were found to be correct, with the exception of one name which by mistake had not been counted. The books were carefully found in the case of Judge Hillock's election, and therefore the matter of tampering and mutilation is therefore to fairly refuted.

The following from L. M. Campbell, Esq., a gentleman and Democrat of unstained character, should set at rest any further rumors in this direction:

"We, the undersigned members of the Executive Committee of the Democratic party of Nicholas County, having learned that there was some dissatisfaction in regard to the poll books of the primary election held on the 19th of March, 1878, hereby certify that we examined said books, and find same correct, or reported at that time except one vote at Headquarters precinct counted for Banta and Colville, both when in reality it was for Colville and we so counted it. James Stokes Esq., counted the same, and made them just as we did. The poll books in the Carlisle and Union precincts were irregular, in that they were not signed by any of the officers both precincts giving a majority for Colville, and we so counted them, notwithstanding their irregularity.

L. M. CAMPBELL, Chairman.
CHARLES SCARCE,
JAMES GAYLE.

All parties concerned express themselves as satisfied that the report of fraud in Headquarters was an infamous falsehood, now, and early losing the case, we forbear further comment on the matter and close now on the enemy.

COMMUNICATED.

Our Normal School.

The school year just closed has been the most successful of the existence here, and—having enrolled about one hundred and forty pupils, nearly half of the number coming from a distance. Four teachers were employed, were kept constant. In a business point of view, it has been a source of keeping about $5,000 in cash to the town of Carlisle, and I have every reason to believe that the time that amount will be left here. The school opens on the 1st Tuesday in September with a full corps of teachers as students are expected to enter a week before the 1st of January. I shall spend the vacation in conducting Teachers' Institutes in different parts of the State, and thus have an opportunity to address teachers on the subject of better preparation for their work, which, no doubt will result in bringing many persons here who, on knowing the character of the school, would remain satisfied with their present surroundings.

The school having been recognized by a charter as the only institution in the State for the education of teachers for the public schools, I feel in duty bound to reciprocate the inducement, by offering free tuition to one pupil from each county in the State. Certain requirements are demanded and the County School Commissioners have the power to make the appointment. It is expected that a large majority of the one hundred and forty students will send representatives.

The above is by way of preface. To speak frankly, there are a few persons in this county, and that are not doing what they should toward building up an institution of learning that would be the greatest source of wealth to the village, and the county at large.

It is the duty of every true citizen to lend his support and influence by word, co-operation and patronage, to any enterprise that will build up and advance the interests of our county. Our school Commissioners have the power to make the appointments as it is expected that a large majority of the one hundred students present
