Chicks Are Money!

Every baby chick you hatch and buy costs you good, hard cash. Dead chicks are lost money!

Tuxedo Starting Mash cuts down the death rate and speeds the growth of baby chicks. Feed it to them from the time they are 72 hours out of the shell until they are six weeks old.

Tuxedo Starting Mash contains all the elements necessary for quick growth—including codliver oil, dried buttermilk, and PURE CANE MOLASSES.

Have a six-weeks' supply on hand, ready for the first hatching, and you can expect the lowest of death rates and quickest of growth.

AVOID FLU!

Fortify yourself during epidemics by building up resistance against the onslaught of colds and grippe. Every member of the family should take a good tonic--sleep plenty and not worry.

Kampf's Blood Tonic

Contains ingredients and herbal extracts recommended by doctors as a positive aid in preventing colds and grippe. Make it a daily habit -- particularly NOW--when the sun's rays are laying down on the job, to pep up with Kampf's Blood Tonic.

OVER 100 YEARS OF DOING GOOD

BONUSES FOR PUNCTUALITY PROVE SUCCESS IN BUSINESS

By S. W. Straus, President American Society For Thrift

It would be interesting to know how much time is wasted in the aggregate by the people of this country. Translated into terms of dollars it would doubtless run high into the millions annually.

Noted throughout the world for their energy and capacity for hard work, Americans are conspicuous also for their to be guilty of the small vice of tardiness.

In all large business organizations tardiness among employees is one of the constant problems confronting the executives. A few years ago many employers tried to enforce punctuality among employees by a system of fines and penalties. These plans, however, did not seem to work out successfully from every standpoint. They aroused resentment among the workers which was reflected in carelessness, indifference to their work and in some cases to absolute viciousness.

More recently large concerns have adopted the plan of establishing honor rolls and creating bonuses for punctuality. The results have been astounding. One company in 1921 installed a bonus amounting to about 4 cents an hour paid weekly to employes who worked full time with no lateness. The plan is said to have resulted in a 33 1-3 per cent reduction in absenteism. Another large concern pays a cash bonus of ten per cent of one week's salary, maximum bonus not to exceed $6.00, to clerical employes who establish a perfect record for any thirty consecutive days. As a result 98.66 per cent of the 8,000 employees reported on time every day last year.

Other concerns give half-day or whole-day holidays as rewards for perfect attendance covering various periods.

Punctuality is an excellent example of thrift. It is not a difficult virtue for the average person to be on time. It is a form of self discipline that should be cultivated by all for it will bring its full rewards.

AUTOS KILLED 27,000 PERSONS PAST YEAR

Eight hundred thousand automobile accidents in the United States during 1928 cost 27,000 lives and involved an economic loss of $850,000,000, the National Safety Council reported.

Although the fatalities represent a 5 per cent increase over 1927, it is the lowest increase for any one year since 1920.

Chicago had the highest death rate for the year—28.8 for each 100,000,population.

LEGAL ABSURDITY?

No public school in Arkansas can legally possess Webster's dictionary, for the dictionary definition of evolution transgresses the new anti-evolution law of that state.—Woman's Home Companion.

White men who first explored America found growing here beans, corn, peppers, squash, tomatoes, potatoes and sweet potatoes.

SHERIFF'S SALE

By virtue of execution No. 2334, directed to me which issued from the Clerk's Office of the Nicholas Circuit Court in favor of Dersey Bros. & Fisher against W. P. McIntire, I will on Monday, March 11th, 1929 between the hours of 1 o'clock p. m. and 2 o'clock p. m. at the Court House door in Carlisle, Nicholas County Ky., expose to public sale to the highest bidder the following described property or so much thereof as may be necessary to satisfy the plaintiffs debt, interest and costs, towit:—

The one-sixth undivided share or interest of W. P. McIntire in the following lands subject to the life estate therein of Lucy McIntire under the provisions of the will of John McIntire of record in the Nicholas County Clerk's Office in Will Book No. 1, page 183, said lands being more particularly bounded and described as follows:—

Tract No. 1. Beginning at a stone corner to Lot No. 1; thence S. 47 W. 27.28 poles to a stone on the West side of the C. & S. Turnpike road corner to Nos. 5 & 6; thence S. 57 E. 18 poles to a stone corner to No. 5; thence N. 24½ E. 2.80 poles to a stone in the South margin of the C. & S. Turnpike road corner to No. 5; thence with said pike S. 63 E. 28 poles; S. 75½ E. 24 poles to a corner of No. 3 in said pike; thence leaving the pike N. 3 E. 81.12 poles to a stone in Gore's line and corner to No. 3; thence S. 44½ W. 25.85 poles to a stone corner to Gore and No. 1; thence S. 22 W. 38 poles to a stone corner to No. 1; thence S. 79 W. 12.36 poles to the beginning, containing 14 acres and 12 poles, legal measure. Being Lot No. 2 in the Division of the lands of David McIntire deceased.

Being the same property conveyed to John McIntire by George R. Martin, Special Commissioner, by deed dated May 11th, 1896, and recorded in Deed Book No. 16, page 276, in Nicholas County Court Clerk's Office.

Tract No. 2. Beginning in Dick McIntire's line in the center of the C. & S. Turnpike Road; thence with said pike N. 75½ W. 20.30 poles to a corner of No. 3 in said pike; thence leaving the pike N. 3 E. 81.12 poles to a stone corner to Gore and Wm. Wyatt; thence with Wyatt's line S. 3 W. 61 poles to a stone corner to Gore and Wm. Wyatt; thence S. 1½ W. 43.28 poles to a stone corner to Wyatt; thence S. 3 W. 61 poles to the beginning, containing 11 acres, 1 rood and 36 poles legal measure. Being Lot No. 3 in the Division of the lands of David McIntire deceased.

Being the same property conveyed to John McIntire by W. P. McIntire by deed dated March 26th, 1898, and recorded in Deed Book No. 21, page 89, in Nicholas County Court Clerk's Office.

The above sale will be made upon a credit of three months, with approved surety.

The amount of debt, interest and costs to be raised on day of sale is $515.51.

L. B. Barton, Sheriff Nicholas County, Ky.

EXTENSIVE SEEDINGS OF LESPEDEZA IN BLUEGRASS

Thirty-six counties reported farmers sowing common lespedeza in bluegrass in 1928, and a total of 1,770 men are known to have seeded approximately 13,300 acres of lespedeza on old bluegrass pastures last year, as the Experiment Station of the University of Kentucky.

Counties in which the largest acreages were made are Mercer, Pendleton, Carroll, Bracken, Harrison, Scott, Nicholas, Anderson, Garrard, Grant, Fayette and Kenton.

In this same general area, it is estimated that 17,625 acres were sown in bluegrass by 1,414 men in 1927; that 2,580 acres were sown by 391 men in 1926, and that 1,344 acres were sown by 124 men in 1925, which was practically the first year that any notice was taken of the idea of seeding lespedeza in bluegrass in Kentucky.

Practically all of these fields have been seeded at the rate of from 3 to 5 pounds per acre. There has been no preparation of the sward bed and no covering of the seed. The pastures have been grazed at the same times and with as much livestock as though no lespedeza had been sown there with this exception, that after the first year the carrying capacity on the thinner portions of such fields has been doubled or even more largely increased during the month of August, September or October.

At first, many farmers feared that lespedeza would interfere with their bluegrass and might smother it out. The past five years' experience has proved that it is the lespedeza which becomes smothered out. Close grazing of the bluegrass in early summer favors the lespedeza, but where it is sown on heavy sod and especially fields that are not grazed until the bluegrass seed crop matures, lespedeza at a late date is practically kept out in the thin spots where there is no grass.

By taking nitrogen from the air, lespedeza adds fertility to old, thin pastures and results in larger, more vigorous growth of the bluegrass. Such pastures will tend to have the bluegrass spread rapidly and cover up thin spots.

BASKET BALL NOTES

(By John Parker Ross)

Last week end proved a hoodoo to the high school basketeers in that they dropped two games each to Maysville and Winchester. On Friday night the girls—lost to Maysville 31 to 8 after having Maysville on the run the first quarter, and the Musketeers dropped one to the Bulldogs by a score of 28 to 15 after being tied 9 all at the end of the first quarter. In the girl's game Carlisle gained the jump on the locals and at the halftime mark were leading 11 to 4, but the Musketeers found themselves to some extent in the last half and staged a rally to garner 9 points while Winchester made 6. It was a case of too much Keffer at center for the local girls to overcome, Keffer scoring 16 of her team's points. Everett was high point for Carlisle.

The Musketeers playing the team that stands second in the conference, forced the game to one extra period to divide the winner. At the half Winchester was leading 9 to 7, at the end of the game it was a tie 14 all. In the overtime Winchester scored first with a shot from mid floor, and a crip making the score 18 to 14, but Clark came through with a shot to make the final 18 to 16 for Winchester. This was one of the greatest games the Musketeers have ever played, causing a team that was doped to lose them 15 or 20 points to play an overtime. Mahan and Jones were really the best for Winchester, while the Musketeers as a whole played great ball.

Lineups. Maysville Girls

Carlisle (8)		Maysville (31)
Everett	F	Owens (12)
Kennedy (1)	F	Mathews (7)
Wilson (3)	C	Simpson
Ross (2)	G	Atkinson (12)

A NICHE FOR THE HARMONICA

(Christian Science Monitor)

Just as the city dweller finds in a window flower box an expression of love for the beautiful, so does the small boy, and sometimes the boy not so small, find in a harmonica, or mouth-organ, a vehicle for his musical talent. To concertgoers, accustomed to the masterly technique and finesse of a symphony orchestra, the mouth-organ may be a thing of contempt, but to many a boy it is all-sufficing. It hearkens him on his errand, puts rhythm into his step, and although it has sung to the level of the pavement artist, it has also risen to the heights as a companion to the sailor at sea.

It is well to remember these facts in searching for an explanation of the popularity of the mouth-organ. Popular it is. Germany alone exports 50,000,000 mouth-organs every year. But it does not propose to stop there. A huge trust has been completed in Berlin, by which it is intended not only to control the mouth-organ market but also to increase the demand for the instruments to which the ingenuity of the boy has given such range and variety. The fact is important to the United States, since it is Germany's best customer, taking 40 per cent of the whole output.

It would be idle to pretend that the mouth-organ comes into any career than the lower brackets of music. But it would be equally unwise to put it down as a mere toy. Many a boy whose career has been been cut of the rock of classical music has made his start, on a mouth-organ, and has found in its somewhat crude arrangements an opportunity for self-expression which otherwise might have been denied him. All men do not sing. Some play. To some the memory of their first adventure into music with a mouth-organ is still sweet, and to them the mouth-organ will remain an instrument which, while lowly, is not necessarily low.

Will this structure survive ?

Will the enormous industry of American steam railroads, the most efficient transportation system in the history of the world, survive the continuing efforts of ill-informed, misguided and prejudiced labor influences which are constantly undermining their earning capacity and tending seriously to impair their public service?

This is the great problem which concerns not only the management of the railroads but the entire public because these ways are our economic pathways, vitally interests every man, woman, and child in this country.

The inroads on railroad revenues being made by competing forms of transportation, which are not subjected to the burdens of taxation imposed on the railroads and are not required to share proportionately in the public burden, the constant rise in the level of wages and in other operating costs; the increasing assessments for railroad taxes, which in 10 years have increased 100 per cent in the same period; the gradual tendency toward regulations which, measured by the ten-mile reverse, have declined over 1 per cent since 1921—through the constant whittling away of the rate of return, which is the life blood of the railroad resources which are decreasing the income of the railroads and preventing them from earning the fair return to which they are legally entitled under the Transportation Act.

Unless, through the force of sound public opinion, the trend of these and other elements of these kinds, it is feared that before long the American railroads will be unable to perform their part in their history. You should interest yourself in these matters and use your influence to establish a public policy more in keeping with facts.

It is now in the high standard of service and safety provision for the future, there must be an adequate margin between railroad revenues and railroad expenses. This can be secured only as the public understands and realizes as to the facts and conditions and demands a fair rate and regulations, and just laws.

THE STORY OF RELIABILITY
L&N

Fuel system of the new Ford has been designed for reliability and long service

THE practical value of Ford simplicity of design is especially apparent in the fuel system.

The gasoline tank is built integral with the cowl and is unusually sturdy because it is made of heavy sheet steel, terne plated to prevent rust or corrosion. An additional factor of strength is the fact that it is composed of only two pieces, instead of three or four, and is electrically welded—not soldered.

Because of the location of the tank, the entire flow of gasoline is an even, natural flow—following the natural law of gravity. This is the simplest and most direct way of supplying gasoline to the carburetor without variations in pressure. The gasoline feed pipe of the new Ford is only 18 inches long and is easily accessible all the way.

The gasoline passes from the tank to the carburetor through a filter or sediment bulb mounted on the steel dash which separates the gasoline tank from the engine.

The carburetor is specially designed and has been built to deliver many thousands of miles of good service.

Since all adjustments are fixed except the needle valve and idler, there is practically nothing to get out of order.

The choke rod on the dash acts as a primer and also as a regulator of your gasoline mixture. The new hot spot manifold insures complete vaporization of the gasoline before it enters the combustion chamber of the engine.

As a matter of fact, the fuel system of the new Ford is so simple in design and so carefully made that it requires very little service attention.

The filter or sediment bulb should be cleaned at regular intervals and the carburetor screen removed and washed in gasoline. Occasionally the drain plug at the bottom of the carburetor should be removed and the carburetor drained for a few seconds.

Have your Ford dealer look after these important little details for you when you have the car oiled and greased. A thorough, periodic checking-up costs little, but it has a great deal to do with long life and continuously good performance.

MINISTER'S SONS

The often repeated belief that ministers' sons are wild is discredited strongly in the results of a questionnaire undertaken for the American Eugenics Society, Inc., by Dr. Henry S. Huntington, of Scarsdale, N. Y.

Himself a minister, Dr. Huntington set out to learn where ministers come from, himself expecting that farmer boys would prove the largest source of supply.

He analyzed the ancestry of 104 of America's leading clergymen and found that two-fifths of them are ministers' sons.

Nearly 30 per cent more proved to be sons of church officers, such as deacons, elders and Sunday school superintendents. Twenty-one came from homes in which neither father nor mother was a minister, or a lay officer of a church.

Dr. Huntington drew no conclusions as to whether environment or heredity was the principal cause of entry into the ministry, but he received numerous opinions from the 104 ministers themselves that their inclinations away from worldly pursuits were direct results of their home lives and the beliefs of parents.

ACCURACY

An American editor had a notice stuck up above his desk that read: "Accuracy! Accuracy! Accuracy!" and this notice he always pointed out to the new reporter.

One day the youngest member of the staff came in with his report of a public meeting. The editor read it through, and came to the sentence: "Three thousand nine hundred and ninety-nine eyes were fixed upon the speaker."

"What do you mean by making a silly blunder like that?" he demanded, irritably.

"But it's not a blunder," protested the youngster. "There was a one-eyed man in the audience!"—Kansas Farmer and Mail and Breeze.

COMMISSIONER'S SALE

Nicholas Circuit Court
Bertha G. Throckmorton, Extrix, Et Al
Plaintiff
Vs. Notice of Sale in Equity.
Permelia Hughes Throckmorton, Et Al
Defendants

By virtue of a judgment and order of sale of the Nicholas Circuit Court, rendered at the February, 1929, term thereof, in the above styled case, the undersigned will on Friday the 22nd day of February, 1929, being a day of the regular term of the Nicholas Circuit Court, at 2 o'clock p. m. or thereabouts, proceed to offer for sale at public auction to the highest bidder on a credit of six and twelve months, on the premises in Fleming county, Kentucky, the property mentioned and described in the judgment entered herein, to-wit: A tract of land situated in Fleming County, Kentucky, on the waters of Flemming Creek and bounded and described as follows:

Beginning at a large Sycamore tree in the hollow, a corner to J. T. Fern; thence with his line S. 5¾. E. 15 chains; to a white walnut; thence S. 18½ E. 2.05 chains to a honey locust; S. 16½ E. 3.34 chains to a honey locust; S. 18½ E. 28.60 chains to a set stone corner to A. H. Mitchell; thence with his line S. 87 E. 4.88 chains to a small hickory; S. 62½ E. 2.10 chains to a gum tree; S. 89½ E. 3 chains to a point in Tea Run Branch; thence up same S. 23½ E. 1.24 chains to a stone corner to S. I. Earle; thence with his line S. 62½ E. 4.50 chains to a set stone; N. 7½ W. 18.85 chains to a point in center of Fleming Creek; N. 55½ W. 3.27 chains; N. 32½ W. 2.6 chains; N. 12 W. 3.60 chains N. ½ E. 2.57 chains; N. 23½ E. 4.42 chains; N. 27 E. 2.84 chains; N. 36½ E. 29 chains; N. 56½ E. 4.20 chains; N. 76½ E. 2.25 chains; N. 67½ E. 2.84 chains; N. 50 E. 3.76 chains; N. 62 E. 3.36 chains; N. 34½ E. 2.56 chains to a point in the center of Creek; thence leaving the Creek with Jas. Jackson's line N. 37½ E. 2.20 chains to a point between two stumps corner to said Jackson; N. 56½ E. 3.10 chains to an old stump; N. 5½ E. 3.23 chains to a point; N. 3 W. 4.44 chains to a stump; N. 3½ W. .80 chains to a red oak stump corner to J. T. Fern; thence with his line N. 55 W. 4.50 chains to a set stone; thence down the hill S. 41 W. 8.75 chains to center of Fleming; thence down same with the center thereof N. 70 W. 7.21 chains; N. 86½ W. 4.40 chains; S. 77½ W. 2.21 chains; S. 62½ W. 2.10 chains; S. 40½ W. 2.07 chains; S. 21½ W. 3.71 chains; S. 27½ W. 2 chains; S. 21½ W. 1.43 chains to the beginning containing 122 acres and 28 poles.

It is agreed and understood by the parties hereto that two certain tracts embraced in the above styled hereinfore sold off the same are exempt from and not to pass under this conveyance, said tracts are described as follows:

A tract of three acres lying across the Pine branch and sold heretofore to S. H. Fortune; also a tract of about 4 acres lying across Fleming Creek heretofore sold to Henry Wagoner.

Being the same property sold to H. L. Throckmorton by John H. Gray by deed dated the 17th day of April, 1922 and recorded in Deed Book Lo. 90, page 450 in Fleming County Court Clerk's Office.

The interest in the land sold herein belonging to the infant defendants Permelia Hughes Throckmorton and Mary Mitchell Throckmorton, shall remain a lien on the land sold herein until the same shall arrive at the age of twenty one years or until a guardian shall have been qualified and executed bond according to the provisions of Section 452 Civil Code.

The purchaser will be required to give bond with approved surety for the payment of the purchase money, to have the force and effect of a replevin bond, bearing interest from date of sale at six percent per annum until paid, said bonds payable to Wm. Conley, Master Commissioner of Nicholas Circuit Court.

A lien will be retained on the land sold to secure the payment of the purchase money.

Wm. Conley, Master Commissioner N. C. C.
F. V. Ooo, Attys. for Plaintiffs.

SAVINGS

Savings represent much more than mere money value. They are the proof that the saver is worth something in himself. Any fool can waste; any fool can muddle; but it takes something more of a man to save and the more he saves the more of a man he makes of himself. Waste and extravagance unsettle a man's mind for every crisis; thrift, which means some form of self-restraint, steadies it.

—Rudyard Kipling.

GEN. NEVILLE SUCCEEDS GENERAL JOHN LEJEUNE

Major General Wendell C. Neville, commander of the Marine Corps base at Quantico, Va., last Thursday was nominated by President Coolidge last week to succeed Major General John J. Lejeune as commandant of the Marine Corps. General Lejeune asked to be assigned to active duty.

PATRIOTIC CORN

(Campbellsville Journal)

Last week D. W. Crawley living in this county, brought in this office an ear of corn that is very unusual, and which may be seen in our window. The grains on the ear are variegated in color, carrying out the national color scheme of red, white and blue.

THIRSTY RAT TAPS WATER PIPE

A bill of $40.80 was recently paid by a cooperator of the Biological Survey of the United States Department of Agriculture for repairing the damage caused by one rat and its family. It was first noticed that water was dripping from the ceiling of a room directly under the bathroom, and then more than a square yard of plastering came down. The plumber who was called in had to move the bathtub and take up the floor to locate the trouble. He found that a rat had gnawed a hole about a quarter of an inch in diameter in the lead water pipe near the trap, apparently to quench its thirst. The water drip from this little hole ruined the ceiling below. The householder invested immediately in a box of barium carbonate and a rat trap, and no more traces of rats have been found since this expensive visitation. The Biological Survey states that it is not at all an uncommon occurrence for rats to gnaw lead pipes or when thirsty to go long distances to get water.

PUBLIC SALE

I will sell at my home and store at Milltown on

SATURDAY, FEBRUARY 23, 1929

at 10 o'clock, the following:

2 wooden bedsteads
1 lounge — 1 washstand
1 writing desk
