Jest Among Us

By Jack Wild

More years ago than I like to mention I was a country school teacher up in Kenton County. One day I asked a little black wasa what words mean and how they should be used, but those seventh and eighth graders told me things I never knew about words. They told me, among other things, that **specific** is "a great big ocean," that **ego** is "what makes a man feel big," that **symmetry** is "what you get when dead folks are buried," and that **feminine** is "something like Ex-Lax."

When we are young, we are sure we know all there is to know; as we grow older, we begin to worry because we don't know all there is to know, then comes the awful truth.

Whenever I think of the late Dr. W. D. Funkhouser, of the University of Kentucky, I am reminded of his dramatic Zoology I lecture on snakes. "You know, snakes are the devil of a man," he told the class. "You should be afraid of them. They're not the cold and slimy things you probably think they are. They're warm and dry." As he continued to talk, he reached into his shirt front and casually drew out a big, black, wriggly snake! After matters calmed down a bit, a few of the girls asked Dr. Funkhouser if he could go to the lecture table and let the students see the snake. Dr. Funkhouser had intended to do that, but the snake was warm and dry. I know, I asked a fellow who touched it.

Open-mindedness too often is confused with empty-mindedness.
