The Golden Text is: "The grace of the Lord Jesus Christ, and the love of God, and the communion of the Holy Ghost, be with you all." (II Cor. 13:14)

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "The cup of blessing which we bless, is it not the communion of the blood of Christ? The bread which we break, is it not the communion of the body of Christ?" (I Cor. 10:16)

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Are all who eat bread and drink wine in memory of Jesus willing truly to drink his cup, take his cross, and leave all for the Christ-principle?" CO-WORKERS BRIGHTEN HOLIDAY FOR FERBACK

The Christmas holiday season for Charles Ferback, a native of Nicholas county, whose household furnishings were burned in a Christmas Eve apartment fire in Paris, was made brighter by the generosity of his fellow employes at the Veterans Administration hospital at Lexington.

As soon as Ferback's fellow employes heard of his loss, they made up a collection of $200 for the couple. Feeback is an Army infantry veteran.

2. Use liberal amounts of commercial fertilizer, manure, tobacco stocks and vetch humus mixed to increase yield and quality. Growers applying commercial fertilizer report an increase of potash, as the only source of potash, and yields are from no more than 1000 pounds an acre provided the mixture contains six units of potash. Discusses Tobacco Program

Growing tobacco field agent from the Kentucky Agricultural Experiment Station, at a meeting of the Nicholas County Farm Bureau Committee that grower progress in adopting the use of black root-resistant varieties, vetch as a cover crop and fertilizer as an extensive use of commercial fertilizer. He stated that these practices have been neglected by local tobacco growers. These are the keys of the demonstration at a plant bed treatment to prevent root, stunted and leafspot, and wildfire and inadequate curing. Wildfire did extensive damage last year in plant beds and in the field with most infected fields traced from wildfire infested plant beds. Blue-stone lime is inexpensive and easy to apply. Income from tobacco is further decreased by improper curing of the crop. House burn was the cause of much loss in weight in this year's crop. Hunt emphasized that more and more growers should use coke as an aid in preventing house burn and better curing. Frank Ballard, a local grower, for more than 20 years has used a mixture of fertilizer for tobacco, said that firing of tobacco is one of the more profitable practices he uses.
