We are authorized to announce **A. V. (Doc) ALLISON** of Carlisle as a candidate for county clerk of Nicholas county, subject to the action of the Democratic voters at the Primary Election to be held on Saturday, August 6, 1949.—Paid Political Adv.

A NEW ATTRACTION—Famed though it is for its thoroughbred horses, Kentucky in the past has never offered horseback riding in its state parks. That situation has now been remedied, with the first riding stable established at Cumberland Falls State Park. In the photo above, a group rides along the river just above Cumberland Falls. Saddle horses also have been placed at Kentucky Dam State Park, and arrangements for others are being made.

COLORED NOTES

Aurelia Hamilton

District conference of the C. M. E. churches will begin here Wednesday morning.

Miss Ethel Williams of Chicago is the guest of Mr. and Mrs. Floyd Washington and mother.

Mr. and Mrs. Harve Lathern of Paris and Miss Carrie M. Lathern of Detroit, Mich., visited here Thursday.

Myers—

Rena Crawford

Mr. and Mrs. Huston George of Burning Springs visited Mr. and Mrs. Leroy Bowles one night this week and also visited his parents, Mr. and Mrs. Sam George and family near Carlisle.

Mrs. Otha Crawford spent Tuesday in Carlisle with her parents, Mr. and Mrs. Millard Snapp.

Miss Jean George and Rondel George and Patsy Curtis spent one day the past week with Mr. and Mrs. J. Shields near Picasant Valley.

Mrs. Sam George visited her sister, Mrs. Mary Cassidy, one day this week.

Mrs. Carl Trussell of Williamsburg and three sons are visiting Mr. and Mrs. Sam George.

Miss Ella Coffman was in Lexington Tuesday.

Mrs. Ebert Jones was in Paris on business Tuesday.

Mr. and Mrs. Wood Bowles visited Mr. and Mrs. W. R. Flora and Mr. and Mrs. W. D. Crawford from Indiana one afternoon last week.

Mr. and Mrs. Leonard Fite of Carlisle and two children visited her sister, Mr. and Mrs. Otha Crawford one night the past week.

Mr. and Mrs. Willie Rose and family of Otis county, Indiana, are spending the weekend with her parents, Mr. and Mrs. L. T. Parson.

Mr. and Mrs. Millard Snapp and daughter of Carlisle spent Sundays with Mr. and Mrs. Otha Crawford.

Mr. and Mrs. Sam George visited her daughter Sundays, Mr. and Mrs. LeRoy Bowles.

Miss Frances Sue Flora visited Kathleen and Rosemary Crawford Sunday afternoon.

Miss Carolyn Cameron of Lexington visited her mother, Mrs. Blanch Cameron, Sundays.

Mrs. Lucille Fite and children and Sister Chiroman and children visited Mrs. W. D. Crawford Monday afternoon.

Diversion Ditch Saves Lush Grass

William Rathbold of Powell county has a lush pasture of grass and clover because he paid $20 for the work of a bulldozer in 1945. At that time he had a diversion ditch made above 50 acres of pasture land. The ditch extended County Agent D. R. Rice, serves as a break for the water coming off a hillside, directing it into three open ditches, leading through the pasture to Hatton Creek. Previous to the ditch construction, much of the pasture was washed.

Veterans still account for more than half of the enrollment at the University of Kentucky, according to a report released last week by the U. K. Personnel Office. The report shows a total of 2,063 veterans—54 percent of the over-all summer session enrollment of 3,802—currently continuing their studies under terms of the G. I. Bill.

Grass Silage Tops Field-Cured Forage

"Kentucky farmers who have tried grass silage are finding that two acres of forage properly ensiled are equal in feeding value to three acres of the same forage cured in the field," states Dr. W. P. Garrigus of the College of Agriculture and Home Economics, University of Kentucky, in Circular 361, "Grass Silage."

He further states: "Good forage, properly made into grass silage, retains a higher percentage of its original feeding value than when preserved as field-cured hay. Bluegrass grown on fertile land and ensiled before bloom will make silage containing nearly three times as much digestible protein and slightly more total digestible nutrients than are found in the best corn silage.

"The unreliable hay-making weather for which Kentucky and the Southeast are noted, is an added reason for making grass silage, since only one to four hours of field wilting are required before the crop is ready to put away.

"Dairy farmers should be especially interested in grass silage because it enables them to provide the benefits of an even supply of year-round pasture at a cost well below that of a grain-and-hay ration. Sheepmen are finding that it far surpasses both in quality and economy, hay or corn silage as winter roughages."

It is only during the past 12 years that farmers have learned about grass silage, according to Dr. Garrigus. They have found it to be an economical and palatable feed for dairy cattle, beef cattle, sheep, poultry and even hogs.

Circular 361 which tells how to make grass silage, feed it, and its advantages, is available from offices of counties and home agents, or from the college, Lexington.

Station Field Days Set For Aug. 11-12

Dates for the annual summer field meeting at the Station Experiment Station, Lexington, have been set for Aug. 11 and 12, Dr. H. L. Ware, director, announced. Persons are invited to see the work of the station.

On the tours of the experimental farm, visitors will see the future crops, corn, tobacco, soybeans, and other farm crops.

Hogs of Spotted Poland China and Hampshire breeds, and Angus cattle, poultry will be ready for inspection at the farm.

In order to accommodate all visitors, the meeting has been planned to be repeated the second day. Farmers from counties beginning with letters A through H are invited to attend the first day, Aug. 11, and those from counties I through Z, the program is primarily for farmers from the remaining counties. However, farmers may attend either or both days, it was stated.

Given under my hand, this the 30th day of June, 1949.

JNO. F. SUGG, CLERK

Catholic Information

MISTAKES ABOUT MARY. . . .

There is much misinformation and unnecessary argument about the devotion to Mary, the Mother of Jesus Christ, the Son of God. If a person mentions that he pray to Mary, sometimes it happens he is accused of adoring a human being while only God is truly worthy of adoration. The fact is that all Catholics agree without reservation that adoration may be given only to God. In fact, Catholics define adoration as an act whereby they recognize the supreme authority and the infinite perfections of the Creator, and the creature's obligation of submission and obedience to Him. To adore any person or thing other than God alone constitutes the sin of idolatry. Catholics know that the Mother of Christ is a creature, like them-selves brought out of nothing into being by God, and that to adore her in word or in action would be gravely contrary to the first commandment.

Everybody agrees that when God determined to walk the earth as a human being, to fish in the waters of Galilee, and to feel the bite of winter and the warmth of summer, he gave special privileges to those men who actually saw him work, and heard the tones of his voice. And surely everybody agrees that he gave most extraordinary privileges to the maiden who bore Him in her womb, nourished him, and watched over him in sleep as all mothers do their children. God has honored her surely and this is the root reason why Catholics honor her too. There is no Catholic chapel or church that has not a picture to represent the mother of God.

Sometimes it is suggested that it is odd for her pictures to be hung and honored in all the Catholic Churches of the world. But certainly it is no odder than the many pieces in every home we enter where pictures of those we love are displayed. Surely it is no more strange than that in many a wallet along with money, and addresses, and a driver's license, is a small picture of somebody very special.

Catholics feel that their devotion to Mary is founded on wisdom and reason. All of them will give these reasons gladly.

If it's anything Catholic, ask a Catholic.

CHRISTIAN SCIENCE

"Life" is the subject of the Lesson-Sermon which will be read in all Christian Science churches throughout the world on Sunday.

The Golden Text is: "This is life eternal, that they might know thee, the only true God, and Jesus Christ, whom thou hast sent." (John 17:3).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "For with thee is the fountain of life: in thy light shall we see light." (Ps. 36:9).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Barker Eddy: "This is life eternal,' says Jesus,—is, not **shall be** and then be dishes everlasting life as a present knowledge of Love, Truth, and Life." (P. 410).

BIBLE COMMENT . . . Psalms Exemplify Joy In Praise And In Worship

"I was glad when they said unto me, Let us go unto the house of the Lord."

So writes the Psalmist in Psalm 122. That note of joy in praise and worship is expressed in many Psalms, and is typical of them all.

This joy was in the certainty concerning God and the spiritual foundations of the world and life. It had its deepest expression in the 23rd Psalm, in which the writer was sure of God as a refuge, a "very present help in trouble," even "though the earth wax removed, and the mountains carried into the midst of the sea."

That note of joy in religion is, of course, uppermost in the Christian experience. Paul centrally proclaims it, and it was expressed in that scene in the darkness of a Philippian jail (Acts 16), when at midnight, in the inner prison, with their feet fast in the stocks, he and his companion, Silas, prayed and sang praises unto God.

The New Testament counterpart of the 46th, Psalm—of enduring and incorruptible faith—is found in the closing verses of Romans 8, where Paul, having listed all possible human experiences, and then all possible powers and forces, says that none of these "shall be able to separate us from the love of God, which is in Christ Jesus our Lord."

The devout Christian had the advantage of the example of the Master, Jesus Christ, and the faith in the Resurrection in its triumph over death and the cross, so that the depth of the note of joy in the Psalms, written many years earlier, is all the more remarkable.

Whence came this strong faith, and this triumphant joy?

Its deep foundation was in a sense of right and wrong, a faith in the Lawgiver of the universe. "There are set thrones of judgment: . . . "Shall not the judge of all the earth do right?"

Say You Saw It in The Mercury

NEWS OF THE WORLD OF RELIGION By W. W. REID

The American Tract Society (21 W. 46th St., New York, N. Y.), which annually distributes millions of Christian leaflets, booklets and tracts throughout the nation, is now in the process of enlisting 100,000 "tract distributors", each pledged "to give one tract to someone each day and to pray definitely for the recipient." In this manner the Society hopes to increase its work by several million tracts per year. Dr. Henry G. Perry, executive secretary, is in charge of the movement.

Dr. Stanley I. Stuber, chairman of the committee which Church World Service is waging to resettle displaced persons in American communities, under the guidance and care of Protestant churches, reports a sharp rise in the number of DP's arriving under its auspices. From May 1 to June 11, 773 DP immigrants, assigned to CWS, arrived, and there are assurances received from churches tassurances of jobs, homes, and welcome to communities for 1539 more. But there are still thousands of persons of all faiths in the DP camps of Europe, awaiting only American sponsors, Dr. Stuber says.

The world-famed Chandag Heights Leper Colony, which was organized more than fifty years ago high in the Himalaya Mountains of India by the late and saintly Mary Reed, a Methodist missionary, is now in charge of Dr. Katherine Young, of the Scottish Church Missions. The American Mission to Lepers, and its associated Mission in London, are erecting a Mary Reed Memorial Hospital at Chandag Heights in honor of the founder who died there at the age of 88 in 1943. It is one of three mission-supported leper colonies in India under the auspices of the Methodist Church.

Protestant churches of all denominations across the nation will be marking "Reformation Day" on October 30, with special services and united community mass meetings. Sermons for the day will note the causes of the Reformation, the meaning of Protestantism for the year 1949, and the need for unity among Protestant forces. Within the last few years there has been a growing consciousness of Protestantism's distinct point of view and teachings, and most churches are endeavoring by educational means to inform their members of the meaning of their distinctive beliefs.

There are 176 missionaries of the Board of Missions and Church Extension of the Methodist Church still in service in China, despite the fact that seven annual conferences served by the Church (covering north China and the Shanghai areas) are in communist control. Dr. Frank T. Cartwright, associate secretary of the Board, reports. Of the total number of missionaries, 88 are representatives of the Board's Division of Foreign Missions, and 88 are women missionaries of the Women's Division of Christian Service. Only thirty-two missionaries have been evacuated to the United States because of the political conditions, and most of these are mothers with young children, he says. "The Christian witness is still being lived and preached in China," adds Dr. Cartwright. "The work of Christian schools, hospitals and churches goes forward with surprisingly little hindrance. Methodist missionaries inside communist territory are allowed to move about freely in the cities of their residence, but with few exceptions they are not yet free to travel to other cities in the countryside."

In calling the 13th quadrennial World Convention on Christian Education to meet in Toronto, Canada, August 10 to 16, 1950, the president of the World Council of Christian Education—Lord Mackintosh of Halifax—says: "For years since 1936 (when the last convention was held) have been long and bitter and filled with anxiety and pain, fruits of ignorance and sin. Man has used his genius to release nature's enormous powers, but these have been turned to the enslavement of body and mind. Idealism without God has become the weapon of Satanism. Even man's understanding of man has become a tool for cruelty and oppression. The very meeting of East and West has become the occasion of suspicion and conflict. But even in these dark times God has not left himself without witnesses. Men have kept the faith. Christ has been proclaimed with joyous and steadfast devotion. There has come into the Universal Church a new sense of world-wide unity in Him who 'is the revelation of what God is and what man may through Him become.' . . . The purpose of this Convention is to extend and strengthen Christian Education throughout the world, that always and everywhere in their daily lives children, young people, and adults will manifest in word and deed their allegiance to Jesus Christ as Teacher and Lord." Five thousand delegates are expected to attend from 75 nations and every continent.

Alfalfa Field Pays Off Well

G. C. Oliver of Cumberland county has reason to be pleased with the five-acre field of alfalfa he sowed last fall. He estimates his first cutting made seven tons of hay, valued at $30 a ton, which paid for the fertilizer, seed, labor and rent. County Agent Earl Kilbourne notes that Mr. Oliver had his soil tested, and so followed the best fertilization program.

AN EIGHT FOR LESS THAN MANY SIXES!

The '49 FORD, America's lowest-priced 8 cylinder car, is yours for hundreds of dollars less than 6 cylinder models of 10 other popular cars!
Only Ford in the low price field can offer you the power of luxury cars. Only Ford in its field, offers a V-type engine . . . eight cylinders . . . 100 horsepower. And not only does Ford offer the America's lowest priced "Eight" but also the great new Ford "Six" at even lower cost. Gas savings of up to 10% (up to 25% with automatic Overdrive, optional at extra cost)!
And you get the new FORD "FEEL" too!
The sweeping power of Ford's new engine is only part of the new Ford "Feel." With it come the new, easy control of "Finger-Tip" Steering and 35% easier-stepping "Magic Action" Brakes. You get the bump-erasing "feel" of "Hydra-Coil" and "Para-flex" Springs. The comfort of sofa-soft, "Sofa-Wide" Seats with more hip and shoulder room than any car in Ford's field. Ask for a ride and you'll order now.

The Garden

By John S. Gardner, Kentucky College of Agriculture and Home Economics

A NEW INSECTICIDE

For controlling flies in dairy barns and on cattle generally, spraying with DDT has been a successful practice for the past few years. Recently, however, farm magazines have been carrying the warning that as DDT is of a somewhat poisonous nature, the more safe material, Methoxychlor, be used instead.

Vegetable gardeners, too, have been using DDT for killing flea-beetles, Colorado beetles and leafhoppers on potatoes and other crops whose tops are not food parts. Although DDT kills green worms on cabbage and greens, there is the danger of the material being absorbed by leaf tissue. Although DDT kills cucumber beetles, there is the danger of killing the vines, too. It has no effect against the Mexican bean bite.

Because of Methoxychlor's fine behavior in killing flies, and because its poisoning danger is so much less than DDT, an inquiry was started to see what it might do toward stopping vegetable pests.

It killed fleabeetles, Colorado beetles and leafhoppers with perhaps more dispatch than DDT. It killed the striped cucumber beetle, with no apparent harm to the vines. Best of all, it stopped the Mexican bean beetle, and had marked effect on the bitter beetle, the old-fashioned potato bug, an exceedingly difficult insect to control. In short, Methoxychlor appears to be a good general insecticide for use in the garden.

For the present only the 50 percent strength has come on the market, the kind that is used in wet spraying, two level tablespoons in one gallon of water. Doubtless ready-to-use dusts of 3 percent and 5 percent strength soon will appear to be applied through a dust gun.

Recipe Of The Week

Frozen foods are always delightful in summer, particularly when they contain fruit. Here is the recipe for such a dessert from food specialists at the College of Agriculture and Home Economics, University of Kentucky.

Frozen Fruit Pudding

1 orange
1 banana
1 cup peaches
2 tablespoons lemon juice
¼ cup pineapple cubes
1-3 cup sugar
1 cup fruit salad dressing
1 cup whipping cream
12 maraschino cherries

Cut orange sections in small pieces after the fine membrane is removed. Cube banana and peaches and add lemon juice. Add pineapple and cut-up cherries. Chill thoroughly. Whip the cream, add chilled fruit salad dressing, then fold in the fruit. Freeze in a mechanical refrigerator, or place in a mold and pack in ice for three hours, using three parts ice to one of salt. Serve 6 to 8.

Fruit Salad Dressing: Three tablespoons each of orange and lemon juice, 4 tablespoons pineapple juice, 1-3 cup sugar, 1 tablespoon flour, 2 eggs.

Mix sugar and flour and add heated fruit juices. Cook in double boiler for 5 minutes. Pour slowly over well beaten eggs and cook 2 minutes longer. Cool.

Jelly Making Secrets From College Experts

Now that jelly-making season is here, housewives' attention is called to some of the pointers on making this delicacy, as given by Pearl Hauk and Miss Florence Imler, food specialists at the College of Agriculture and Home Economics, University of Kentucky.

1. Select fruits which contain enough pectin and acid to make the juice jell, such as tart apples, crab-apples, currants, gooseberries, sour plums, citrus fruits and slightly under-ripe grapes, blackberries and raspberries.

2. After extracting juice from the cooked fruit, cook only two or three cuplfuls at a time. Cooking a large amount of juice at once may make the jelly strong flavored, dark colored and gummy.

3. Use a broad bottomed pan or kettle which makes for quick cooking.

4. If the juice is rich in pectin, use 1 cup of sugar to every cup of juice; if it is only moderately rich in pectin, use ¾ cup of sugar to every cup of juice.

5. To test for pectin, pour two tablespoons of cooked fruit juice into a glass and add an equal amount of denatured alcohol. If the juice is rich in pectin, a solid mass of gelatinous material will form; if moderately rich, several small particles; if poor, many tiny pieces will form.

6. With fruit juices poor in pectin, use a commercial pectin or crabapple juice.

7. To test jelly for doneness, let it drip off the side of the spoon. When two drops run together to make a sheet, the jelly is done. Jelly cooked too long becomes tough and leathery.

Copies of Circular 447, "Jellies, Jams, Preserves and Marmalades," may be had from offices of county or home agents, or from the college, Lexington.

The tobacco yield in Green county has increased in 15 years from 610 pounds to 1,433 pounds per acre.

When this dressing is to be served on a dessert or salad, add ½ cup of cream whipped.

Menu: Fried chicken, lima beans, broccoli, carrot and cucumber strips, rolls, butter and frozen fruit pudding.

POSTMAN'S LOSS — Rose Marie Couch, who short weeks ago was an unnoticed mail girl at Universal-International Studios in Hollywood, has forsaken the mails to please the males. Rose Marie may soon be opening fan letters of her own for her first screen performance in "The Kid From Texas."
