CHRISTIAN SCHOOL
Divine healing which cures our evil and removes harmony are the basis of God's unfailing power and goodness will be set forth in Christian Science services this Sunday.
The Lesson-Sermon includes the Ancient and Modern Necromancy, alias Mesmerism and Hypnotism, Denounced will include the subject of healing as recorded in The Acts of the Apostles (5:12, 16): "And by the hands of the apostles were many signs and wonders wrought among the people: There came also a multitude out of the cities around about unto Jerusalem, bringing sick folks, and them which were vexed with unclean spirits: and they were healed every one."
Also stressing the practical power of Christian healing is the following passage to be read from "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "God will heal the sick through man, whenever man is governed by God. Truth casts out error now as surely as it did forty-seven centuries ago" (495:1-2).

Social Security For Families

There is a special provision in the 1954 amendments to the Social Security Act for the families of workers who died before September 1, 1950 and after June 30, 1946, according to R. A. Tweedy, District Manager of the Lexington Social Security Office. To measure the survivors of these families, broadwinners were told that they could not get Social Security benefits because the work or had not been under Social Security long enough to be considered fully insured under the old law. Tweedy said he explained that under the new law the workers who died after June 30, 1946 but before September 1, 1950, is considered fully insured if he had at least six quarters of work under Social Security. His survivors, with the exception of a former wife divorced and a dependent widower, may collect benefits beginning with September 1954. No benefits may be collected for months before September 1954.
Delay in filing a claim by those survivors who may qualify will finally result in the loss of some or all monthly payments which may be due. In some cases proof of support must be furnished. When this evidence is required, it must be submitted to the Social Security Administration before September 1954. Tweedy concluded by saying, "Survivors of such an individual who believe that they may qualify for these monthly benefit payments should immediately get in touch with their nearest Social Security Office." The Lexington Office is located on the sixth floor of the Brook of Commerce Building.

Weekly Recipe

Winter vegetables are often neglected when it comes to making salads. Here is a tasty one suggested by Sarah Blackstone of the University of Kentucky.

Tuna and Celery Salad
2 Tuna (dried cooked tuna)
1 cup celery diced
2 hard-cooked eggs
1 mayonnaise dressing
1 prepared mustard
1 Worcestershire sauce
Drain and flake salmon, saving the liquid. Melt butter, stir in flour and gradually add the liquid from salmon and milk. Stir constantly, and cook until sauce is thick and smooth. In a greased casserole, arrange layers of potatoes, salmon, chopped egg and sauce. Continue remaining ingredients and spread over the top of the fish mixture. Bake in moderate oven, 375 degrees, for 30 minutes. Serves 4.
Menu: Salmon surprise, buttered green asparagus, cabbage slaw, corn sticks, butter, and frozen peaches with cookies.

Swimmers

(Continued from page 1)

creeks but walks across the bottom of narrow streams.
The star-nosed mole, with its 22 fleshy tentacles, has a flair for aquatics, occasionally moving under ice. A resident of Canada and the United States, the restless mole swims among flooded cattails and probes the ground for worms.
The four-inch-long brown hummings, arctic inhabitants of old and new worlds, are dogged swimmers. Tawny, with short tails and furry feet, the creatures sometimes assemble in the millions to migrate. Neither lakes nor streams stop their march. When reaching the sea, as in Norway, they plunge in and, letting on some mysterious impulse, swim away to death.
The brawniest lifeguards can't compare with a polar bear in water. Occasionally, after the seasonal retreat of ice, the big white bears are seen in open sea far off the Labrador coast. A wounded female once swam from danger while shielding a cub twice the size of a Newfoundland dog between her forelegs. One ship's company watched a bear climb an upturned ice pan, lie on its side and slide 40 feet head-first to a watery splash.
