Silage Reaches Cov. Easy Way . . . Job Handled By Made-On-Farm Device

By IRA MILLER
Farm Electrification Bureau

The young man standing beside the collection of chains, pulleys and other mechanical components in the picture below has given both himself and his 22 milkers a welcome break. He saved himself a lot of work, and provided the cows with all the silage they want—the easy way.

Above—cows are shown eating their fill from manger filled automatically. To the right—farmer is pictured at mechanized end of his home-made silage feeder.

Although he still pitches silage—but because his twin silos aren't suitable for the installation of unloaders—he has mechanized feeding chores. All of the chores. From the silo, silage moves automatically into the barn by means of a conveyor operated by a 1 horsepower motor.

This "made on the farm" feeder is 48 feet long, including a 16-foot section which extends into the barn. Silage is carried to the chute, operated by metal cleats about 1 foot apart, drag the silage into the 3-foot wide manger. The section outside the barn has a solid floor. There is no floor in the conveyor inside the barn, the chains "riding" on 2 x 3-inch wooden strips fastened to the sides of the manger.

The conveyor line is located approximately 16 inches above the manger, the sides of which are about 15 inches high. Silage is evenly distributed along the entire length of the manger at the morning chore round of the silage as it piles up in the chute. By the time the last cow in the manger is filled the manger is full of silage.

Now a look at the driving mechanism. A 2-inch pulley on the motor is bolted to an 18-inch pulley attached to one end of an old truck axle. Another 18-inch is bolted in another pulley. This provides a speed reduction ratio of transmission of 9 to 1, making a total speed reduction of 45 to 1.

At the other end of the truck axle is mounted a 6-inch sprocket which drives the chain. This arrangement provides a conveyor speed of approximately 45 feet a minute.

As may be noted from the illustration, the dual chains are continuous, with the return made on supports 2 feet above the floor. Bracing is 2 feet apart on the barn floor. Hangers are bolted to extend from floor to ceiling at intervals of 10 feet for added support so that the floor can be easily cleaned.

It's clean

"...pans, curtains, walls stay bright."

It's cool

"...surface heat goes into the pan, oven heat stays in the oven."

It's safe

"No flames, no matches, no fuel to store."

It's automatic

"...the clock-controlled oven starts and stops itself."

It's an Automatic Electric range

Cook the modern way... Electrically, to be sure!

KENTUCKY UTILITIES COMPANY

You don't need a "BUNDLE" to wrap up this BONUS-BARGAIN

Thrill of the year is Buick—

Biggest-selling Buick in History!

(So we're trading high, wide—and then some!)

WHEN BETTER AUTOMOBILES ARE BUILT BUICK WILL BUILD THEM

GALBRAITH BUICK

228 West Main Street PHONE 333 Carlisle, Ky.

SOMETIMES, a bargain is measured by how little you pay.

Sometimes, it's measured by how much you get.

But here's one that's a whopping bargain by *both* measures.

Because right now—for the leastest money of the year—you can buy the mostest Buick in history.

That, Mister, is because we're adding a profit-sharing *bonus* allowance on top of the long trade-in allowances we've been making all year.

And when we say the "mostest" Buick, we mean the most-wanted Buick ever built—the one that has broken every record in the book—outselling by far all other cars except the two most widely known smaller ones.

We mean the Buick that brings you the most for your money in terms of mighty V8 Power—of real family-size room—of bold fresh styling. The one that gives you the most buoyant ride ever born of all-coil springing.

And we mean the *only* car blessed by the smooth magic of Variable Pitch Dynaflow*—world's first transmission built on the switch-pitch principle of the modern plane's propeller.

Come on in. We're ready and waiting to make you the deal of your life on the most thrilling Buick ever.

*Variable Pitch Dynaflow is the only Dynaflow Buick builds today. It is standard on Roadmaster, optional at modest extra cost on other Series.
