THE CHAMPION.

For ten years we have been selling the Champion Reaping Machine. Its great superiority over all competing machines is now the possession of all farmers who are content in what is the best. Our trade has grown for beyond our expectations, and today our tools for the coming season are much further than ever before. With the growing crop we expect to ship more than a million machines this year. With our facilities for furnishing machines and repairing them, we can keep a constant supply of such low rate, given to us by our large and growing trade.
