## Wheat quota

(Continued from page 1)

will be in effect for the 1957 wheat crop. Under quotas, too, price support to growers in the commercial area who comply with their wheat acreage allotments will be at the full level available—between 75 and 90 percent of parity.

If more than one-third of the farmers voting disapprove quotas, the quotas will not be in effect, and the available price support on the 1957 wheat crop to those who comply with farm wheat acreage allotments will be at a level of 50 percent of parity.

When a marketing quota program is in effect, the excess wheat of a grower who does not comply with his farm wheat acreage allotment and who has more than 15 acres of wheat for harvest as grain on the farm will be subject to a marketing quota penalty. This penalty will be equal to 45 percent of the May 1, 1957 parity price for wheat.

Chairman Gray emphasized that the vote is on wheat marketing quotas and not wheat allotments. Whether or not the vote is favorable on the quotas, acreage allotments will be in effect for the 1957 wheat crop.

## Voting place for wheat quota at ASC office

The voting place in Nicholas County for the wheat marketing quota referendum to be held Friday, July 20, will be at the local ASC Office, located in the basement of the Courthouse. The polls shall be opened at 8:00 a.m. (CST) and will be closed at 7:00 p.m. (CST).

Growers eligible to vote in the wheat quota referendum are all those who will have more than 15 acres of wheat for harvest on a farm in 1957. These farmers have been notified of their wheat allotments. Quotas do not affect those farmers who harvest 15 acres or less of wheat for grain on a farm.

If quotas are approved by at least two-thirds of the growers voting in the wheat referendum, the quotas will remain in effect for 1957 and price supports will be available to farmers who have complied with their farm wheat allotments at a level between 75 and 90 percent of parity. Those farmers who exceed the larger of the farm allotment or 15 acres will be subject to a penalty of 45 percent of the parity price for wheat on the excess production.

If more than one-third of the growers voting disapprove the quotas, they will not be in effect, and price support will be available to farmers who have complied with their farm wheat allotments at 50 percent of parity.

Dr. B. F. Reynolds of the Nicholas County health department will not be in his office Thursday or Friday of this week.

The health office will also be closed Wednesday, July 25, due to personnel attending the State District meeting at Georgetown.
