## Churches

**THE PRESBYTERIAN CHURCH**
**W. R. Rainey, Minister**

The Church-Going Family is the Happier Family.

9:30 Sunday School.

There is a class here for you.

10:45 Morning Worship and Sermon: "Giving Thanks".

6:00 Presbyterian Youth Fellowship.

7:30 Union Welcome Service for Mr. and Mrs. Norman Kiser in the Carlisle Christian church.

Wednesday evening at 7:30 Union Thanksgiving Service in the First Christian church with Larry Miracle, Minister of the Moorefield Christian church, preaching. You will find a welcome at church.

**FIRST CHRISTIAN CHURCH**
**(Disciples of Christ)**
**E. Ambrose Stump, Minister**

9:45 a.m. Sunday School.

10:45 a.m. Morning Worship.

Nov. 16, Friday at 3:30 p.m.: Chi Rho Fellowship meeting.

Sunday, Nov. 18, at 7:30 p.m. Welcome Service at the Carlisle Christian Church for Rev. and Mrs. Norman Kiser.

Union Thanksgiving Service, Wednesday, Nov. 18, at 7:30 p.m. at the First Christian Church.

The CWF night circle will meet Wed. Nov. 14, at the home of Mrs. William Threlkeld, 7:30 p.m.

Woman's Day — Sunday, November 25. Mrs. Ben Hobgood will be guest speaker.

**SHRINE OF OUR LADY**
**Father Edwin H. Trimbur, Pastor**

HOLY MASSES:

Sundays—9:00 a.m.

Weekdays—7:15 a.m.

SACRAMENT OF PENANCE: Before all the Masses.

Nov. 18: Company Keeping is permitted to those and with those who are free to marry. Whoever puts away his wife and marries another commits adultery against her, and if the wife put away her husband and marries another, she commits adultery." Mark 10:10 Luke 16:18. Romans 7:2, 3. I Cor. 7:10-11, 39.

**CARLISLE METHODIST CHURCH**
**O. S. Gardner, Minister**

9:30 a.m. Sunday School.

10:45 a.m. Morning Worship.

6:00 p.m. MYF Groups.

7:30 p.m. Sunday Evening Worship.

7:30 p.m. Wednesday: Church Night Service. The Methodist church invites you to come and worship the Lord, in the Lord's House, on the Lord's Day. A friendly welcome awaits you.

A Union Welcoming service at Carlisle Christian church Sunday evening at 7:30 for Rev. and Mrs. Norman Kiser.

**CHRISTIAN SCIENCE**

Spiritual healing will be a topic dealt with at Christian Science services Sunday in a Lesson-Sermon on the subject "Mortals and Immortals".

Scriptural selections will include this verse from Matthew: "And when he had called unto him his twelve disciples, he gave them power against unclean spirits, to cast them out, and to heal all manner of sickness and all manner of disease."

One of the correlative citations to be read from Science and Health with Key to the Scriptures by Mary Baker Eddy states: "Every day makes its demands upon us for higher proofs rather than professions of Christian Power. These proofs consist solely in the destruction of sin, sickness, and death by the power of Spirit, as Jesus destroyed them. This is an element of progress, and progress is the law of God, whose law demands of us only what we can certainly fulfil" (p. 233).

## Deaths

**Russell Calvin Vandy**

Russell Calvin Vandy, 53, a Bourbon county farmer, died at 1:45 a.m. Saturday at his residence, Larue road, Paris. He was a native of Laurel county.

Survivors are a daughter, Miss Betty Vandy, Nicholas county; a stepson, J. D. Thomas, Nicholas county; his mother, Mrs. Elizabeth W. Vandy, Bourbon county; two sisters, Mrs. Ida Vandy and Mrs. Wallace Roe, Bourbon county; four brothers, Oscar Vandy, Paris, Isaac Vandy and Thelma Vandy, Cynthiana, and J. B. Vandy, Indianapolis, Ind.

Services were conducted at 10:30 a.m. Monday at the Davis Funeral Chapel by the Rev. Fred Moffatt. Jr. Burial in Paris Cemetery.

**Charles Edgar Hollar**

Charles Edgar Hollar, infant son of Mr. and Mrs. Billy Wayne Hollar, Ewing, died at 1 p.m. Friday at the Nicholas County hospital.

Services were conducted at 10 a.m. Saturday at the Mathers-Shearer Funeral Home, by the Rev. O. S. Gardner. Burial in Carlisle Cemetery.

**Stanley Carson Carter**

Stanley Carson Carter, 67, died Saturday at his home in Anderson, Ind. after suffering a heart attack. He was a native of Carlisle.

Survivors are his wife, four stepchildren and a sister, Mrs. Frank Simons, and a brother, George Carter, both of Carlisle.

Services and burial were conducted Monday at Middletown, Ind.

**Carlisle F. H. A. Holds Regular Meeting**

The Carlisle Chapter of the F.H.A. held its monthly meeting Thursday morning during activity period in the Home Ec. room. The meeting was called to order by our president, Leanne Roberts. Phyllis Rawlings had the devotional. After repeating the Lord's Prayer the meeting was turned over to Miss Mary Logan Gilley who introduced our speaker, Miss Nancy Talbert. She spoke on "Staying in School". After her talk, Annette Carpenter read the minutes of the last meeting. Our president conducted the business meeting. We decided to send a Thanksgiving basket to a needy family for the holiday. A committee was appointed to decide on the family. The next business was the Christmas party for needy children. It will be held December 17, after school. After the business meeting our chapter Parliamentarian lead us in a game. The meeting was then adjourned.

**Carlisle West Homemakers**

The Carlisle West Homemaker Club met Friday afternoon at the home of Mrs. Frank C. Henry, with Mrs. A. T. Gardner as co-hostess.

Mrs. Eugene Neal, president, presided at the business session and presented Miss Ernestine Eads, a former member, as the recreation chairman. Miss Eads gave each member a piece of paper and instructed them to tear a turkey. Mrs. Russell Shrout received first place with Mrs. Margie Wilson and Mrs. Grimes Caywood, second place winners.

Mrs. Neal announced the next meeting will be at the home of Mrs. W. G. Irvin. An auction will be held at this time.

**SATELLITE**

A satellite that observes the sun's corona may flash the go-ahead for the first manned moon shot.

Storms of X-rays erupt from the corona, or solar atmosphere, to bombard earth and space with lethal particles. The dense air about the earth stops most of them, causing auroras and blacking out radio broadcasts, but space travelers might be harmed.

United States scientists hope to predict and understand the storms by studying the corona with satellites, says the National Geographic Society. Before the first astronaut takes off for the moon, they want to be certain the corona is quiet.

**Hard to See**

The sun's corona is difficult to study on earth. It is very faint despite temperatures above 1,000,000 degrees. For all but 100 minutes every century the dazzling sun renders it invisible.

Only while the sun is eclipsed can astronomers see the corona. Then it glows with a soft, pearly light through the darkened skies. To mechanical eyes in satellites, however, the corona would appear continuously etched against the blackness of space.

The gaseous corona extends tens of millions of miles from its parent. Observations from mountain tops and instruments borne aloft in rockets and balloons have revealed much about the denser part of the corona immediately surrounding the sun. Astronomers hope that satellites will give the coronal picture to a radius of 20 million miles.

The corona consists of rarified gasses, including many mundane elements such as iron and nickel. Extreme heat ionizes or electrically charges the atoms, creating the light of the corona.

Photographs taken during eclipses show rays, loops, and domes in the coronal structure. When the sun is dotted with sunspots, the rays protrude equally around the sphere. But when the spots are few, the rays extend only from the equatorial zone. The patterns suggest great magnetic forces at work.

No one is sure how the X-rays are formed from the hot, turbulent corona, but activity within the sun seems to control their flow. The number of solar storms and flares rises and falls in an 11-year cycle. This affects the intensity of radiation streaming toward the earth.

**Silences Radios**

Normal radiation ionizes a layer in the earth's atmosphere that aids radio transmission. However, an exceptionally strong burst can break this layer down completely and silence radios for an hour or more.

Tricks are played with all types of communications. Somehow, a provocative telephone conversation between two people in New York City, who thought they had complete privacy, was transposed to a radio program and enjoyed by millions.

The first Orbiting Solar Observatory, launched in March, 1962, has already added to man's picture of the corona. The success makes it perhaps the most important scientific satellite to date.

TRANSYLVANIA STUDENT Robert Biddle (left) discusses career opportunities in Kentucky State Government with M. L. Archer, recruitment officer with the State Department of Personnel. The Transylvania campus at Lexington was one of the first Archer visited in his current swing around the state which will take him to 33 college campuses before the school year ends. Aim of the project is to recruit the best-qualified persons for State employment. Biddle, from Mayaville, Ky., is studying for a teacher's certificate in biology.

## Social Security

**QUESTIONS AND ANSWERS**

Note: Questions for this column should be directed to "Questions", Social Security Administration District Office, 950 Winchester Road, Lexington Kentucky.

Question: My daughter, who will be eighteen soon, has been receiving social security benefits since the death of my husband. She plans to go to college. Will her benefits continue?

Answer: No. Under present law benefits stop at age 18 unless a child becomes disabled before that time.

Question: I am 16 years and my mother is receiving social security payments for me. If I work during the summer, will my payments stop?

Answer: You are allowed to make $1200 per year without loss of benefits. Unless you exceed this amount, your benefits will not be affected.

Question: After 72, I understand I can receive all social security benefits regardless of earnings, but do I still have to pay the social security tax?

Answer: Yes, there are no age limits, minimum or maximum, that excuses the tax. As long as you have earnings under the law, the tax must be collected and paid.

Q. How much time do I need to work to qualify for Social Security benefits?

A. Sorry, but since you did not give your age or sex we can't answer the question. Please request leaflet 855 from any Social Security Office.

**HAVE YOU . . .**
AN UNKNOWN DIABETIC IN YOUR FAMILY?

MORE THAN ONE MILLION DIABETICS DO NOT know they have this disease. A simple urine test, to find out if sugar is present, can save years of future trouble.

DIABETES IS AN INCURABLE DISEASE that is easy to live with if the diagnosis is early and medical advice is followed. Proper diet, insulin if needed and certain precautions, enable diabetics to live a normal and happy life.

MIDDLE OR OLD AGED PEOPLE, particularly those overweight, can develop diabetes and not know they have it until it is too late to prevent its serious consequences.

DIABETES WEEK NOV. 11—17
