A Sure Way To A Happy Day!
Happiness is something we create in our mind. It's not something you search for and so seldom find—It's just waking up and beginning the day by counting our blessings and kneeling to pray. It's giving up thoughts that breed discontent, and accepting what comes as a gift "heaven sent". It's giving up wishing for things we have not. And making the best of whatever we've got. It's knowing that life is determined for us, and pursuing our tasks without fret, fume or fuss.
For it's by completing what God gives us to do, that we find real contentment and happiness too.

Tobacco setting 82% complete

Setting of tobacco is 82 percent complete, the Kentucky Crop Reporting Service says.

Last year, the service says, setting was 75 percent complete at this same time.

The set burley is reported in mostly good condition, with some pythium soft rot and wireworms causing a few problems. Some plants are reported turning yellow in low areas because of excessive moisture.

Insect and field damage has caused some re-setting where the plants had been set too early in dry soil.

The Crop Service reports that the Maysville weather station is now reporting a near normal amount of rainfall for the year, with the Lexington station still behind about two inches since April 1. However, Lexington does report normal rainfall for the last four weeks.

L&N Depot last November. It has been used by the Rotary Club weekly and other civic and private groups since then. The Carlisle Community Woman's Club is presently preparing to landscape the courtyard at the Depot, and to build a patio there.

A recent membership drive successfully obtained 60 new members, bringing the total Society membership to over 250. This is the largest membership since the Society was incorporated in 1974, except for the around 350 charter members who are listed in The History of Nicholas County. A list of this year's members will be printed in the November 1982 Society quarterly Newsletter. Dues for the June '82-June '83 membership year are now being collected.

The Society printed a list of the Carlisle High School graduates from 1893 to 1963 this year. All members received copies and there are a few copies available for sale at $6 each.

Plans to participate in the Blue Licks Bicentennial, Aug. 19-22, are now underway, and more will be written about these plans in future editions of The Mercury.

Directors resigning were also recognized by Poline. Besides himself, they are Dick Lettton and Mrs. Nate Young Jr. Also, recognized for attending most meetings throughout the year were Mrs. Walter Kendall, Thelma Linville, Mrs. G.C. Myers, Mrs. Harry D. Galbraith and Mrs. Anglia King Buckley. Mrs. Buckley is in charge of acquisitions for the proposed museum. The museum will be one of the first orders of business for the new board of directors.

Future projects being considered by the Society, Poline said, include an evening with Mark Twain, pig roast, open house tour, and Joe B. Hall.

The evening was concluded with performances by the "Entertainers." Members of the group are David Hopkins, Kevin Rawlings, Archie Smith, Keith Smith and Kirk Smith, Nicholas County students, and Vonda Smith and Linda Vanlandingham.

Edgar Allison played organ music for entertainment during the dinner hour.

County gets $169,000 road money

The state Department of Transportation has announced a $169,700 allocation to Nicholas County for rural secondary road maintenance and improvements in fiscal year 1982-83.

The funds will provide maintenance along 54.2 miles of rural secondary roads in Nicholas County, Transportation Secretary Frank Metts said.

The rural secondary program is financed with 22 percent of the motor fuels taxes collected in Kentucky. It was established in 1948 to help maintain and improve farm-to-market and other essential rural roads.

To improve Licking bridge

The state Department of Transportation will improve the slope under the bridge over the Licking River on U.S. 68 in Nicholas County.

The river is cleaning the earth beneath the bridge to slide. The project will stabilize the river bank to prevent erosion.

Bids will be accepted on the project June 18.

Kentucky Afield

by John Wilson

Weekends can get pretty crowded on Kentucky's waters, with boaters, skiers and fishermen forming a seemingly endless parade up and down our lakes and large rivers.

Fishermen who have a day off in the middle of the week can usually find conditions a lot calmer than those who only have weekends to fish. But there is a way to fish on weekends without being bothered by the crowds — fish at night.

Not only do you have the lake more to yourself, but you'll also probably find your catch rate increasing. Remember, anglers aren't the only ones bothered by heavy boating traffic or other activities on and around the water. Chances are that most game fish (and particularly the larger ones) find a deep-water hideout during the day and do most of their shallow water cruising and feeding at night when things are more peaceful.

Some white bass and crappie fishermen are quite skillful at night fishing. They use lanterns or battery-powered sealed beam lights to attract plankton, which attracts shad, which in turn attracts game fish. This angling system involves anchoring in a fixed location, setting up the lights, lowering a baited hook and waiting (sometimes until just before dawn) for action to develop.

Trout fishermen at Laurel Lake in Southeastern Kentucky have discovered that this technique works well on trout, but instead of minnows, their favorite baits are worms, whole kernel corn or small cheese balls.

Bass fishermen tend to move around more, searching for feeding fish in shallow water. Black lures are generally the most productive. Noisy surface lures and large black plastic worms are two favorites with confirmed night bass casters.

Since it's difficult (and sometimes impossible) to see the shoreline, hang ups and snagls are much more frequent than when fishing in daylight. So light tackle isn't recommended. Another reason for heavy gear is the size of bass the fisherman can encounter at night. Lunker largemouths seem to do most of their shallow water foraging at night, so the angler's chances of meeting up with a really big bass are enhanced if he doesn't quit fishing when the sun goes down.

With visibility reduced to near zero, it pays to be particularly safety conscious at night. Make sure your boat has the proper running lights as required by state law and that they are in working order. A powerful spotlight is helpful while underway, and reduced speed is a must.

It's a good idea to be familiar with the particular section of the lake where you'll be fishing. In particular, make sure you can find your way back to the dock or launching area — an unlighted ramp can sometimes be hard to find on a pitch-black night.
