ANNOUNCEMENT.

We are authorized to announce MAJOR JOHN M. FARRIS a candidate for Representative from the 90th Kentucky district, composed of the counties of Bracken and Mason, subject to the action of the Democratic party.

We are authorized to announce E. REBMAN, of Kenton county, as a candidate for Representative from the counties of Kenton and Boone, subject to the action of the Democratic party.

We are authorized to announce W. J. GAITHER as a candidate for Representative from the counties of Nicholas and Robertson, subject to the action of the Democratic party.

We are authorized to announce the name of JAMES BLAKE as a candidate for Representative from the counties of Harrison and Bourbon, subject to the action of the Democratic party.

I announce myself a candidate for representative for Clerk of the Nicholas Circuit Court, subject to the action of the Democratic party. JAMES BLAKE.

THURSDAY, MAR. 19, ... 1891

JNO. M. FARRIS was born in Scott County, Kentucky. How would he do to run for the Presidency?

PRESIDENT HARRISON, it going to rain about the first of April, will start to California. He will go via Atlanta and New Orleans.

DR. CLARKE, candidate for Governor, has taken to blackguarding Mr. Day from the stump. Dr. Clarke must think Mr. Day is dangerous man to the people.

SINCE the rush hung the Scribbins at Paw Orleans, Fairy Gustaine is doing nothing to do with the World's Fair at Chicago. We hope they won't do that, what will the kids do for the delighted "Gustaine?"

MR. FARRELL has sent two men to this county to take up a reference to him. The other day when Mr. Farrell was sued in Pulaski he was learned that he was hidden away with Mrs. Clifford.

SOME of the Republican papers are trying to make it appear that many of the ex-Confederate soldiers are still mad at them. Please to be consoled, boys, for again all about Palmer and the war. This is the era of peace.

AS we predicted some time back, Gen. Henry B. Palmer, was elected United States Senator from Illinois. The two Farmer's Alliance men joined the Democrats as they ought to have done long ago.

THE Democratic Committee of this District, composed of Nicholas and Robertson, met in this city, last Saturday week, and ordered a primary election, to be held on the 2nd day of May next, for a candidate for Representative. They will select officers in due time.

ONE would judge in reading after the Democratic Governor and Register that Mr. Day is having some terrible candidate's clearance for Governor. These half-way of time to explain away, trying to fix or save County or town, can't be done. Democrats are not to be fooled by such tactics.

THE CHOLERA has managed to mind on the Commonwealth's Attorney's office. Mr. Hendrick has announced for Democratic nomination for Commonwealth's Attorney, instead of Boitnott once. It has also demonstrated the proposition to cut the district down, to 10 members, and has left the matter as at present. The people are certainly that it will not change upon the work.

THE Republican of Illinois are kicking over the election of Gen. Palmer to the United States Senate. They forgot any of them to explain why, and left looked party organization. The 101 Democrats never Richard Oglesby to the 151 ballots, while the Republicans voted for a man who had been dead a year in the State. They should go off and shoot themselves.

MANY bad errors incident to the Bad Business Congress' Democratic Legislating business have already come to light, but each one that comes to hand only adds to the disgust of the people. The people will be delighted to get a chance to vote for some Workers man who is opposed to such work. The people will never vote for a Democrat who is opposed to such work. A black eye for to be received from Democratic hands.

COL. BENNETT H. YOUNG suggested to the Democratic State Committee that it be appointed to "issue an address to the people of Kentucky on the subject of the next constitution." The Courier-Journal thinks the newspapers will publish it if it is sent to them. We would like to have Col. Young tell to what he is going to do with those papers after they are interested—not included under the head of "free" matter. The people will have to vote on all of it at once. Col. Young is a lawyer himself and can also, no doubt, to be bridge over the unpleasantness.

THE first application for repayment of the State's money, on account of the last Congress, was received at the Treasury department Friday. It was from Gov. Hill, of New York, and the amount of money called for was about $2,225,000. The application must be approved by the Secretary of the Treasury, the First Controller and the Commissioner of Internal Revenue, the officer who audits the original collections. When the amount is verified, a draft for the amount will be sent to the Governor of New York, the money to be held in trust for distribution to the persons who paid the tax, or their heirs.

What We Eat and Drink.

An old adage, "an ounce of prevention is worth a pound of cure," is one of the most valuable that has come down to us. A severe cold occasioned by standing or sitting in a draft of air, followed by pneumonia, catarrh, etc., and several weeks in bed, all could have been avoided by a little judgment. I believe it an much the duty of the physician to prevent disease as it is to cure it. Why shouldn't a man consult a hygienic advisor, that would save us many dollars and much suffering? Many complaints from eating impure meats, food, and perhaps the loss of all or part of our family! Why, I say, employ a physician who was competent to examine the drinking water, to see and look into the hygienic condition of premises and thousand diseases and deaths, that we have to undergo both risk of sickness and pecuniary loss? Oh, the people of China are not so bad after all, a physician is paid to keep the families well and as they get sick, he gets less. Now, in this country, we have a class of men who bring good health to pure drinking water, free from all animal and vegetable germs. I am led to simply call the attention of the people to a fact they can not be ungrateful of.

The purity of our drinking water and the wholesome of the food we eat, are the main the closest attention for the welfare of any town, city, or community.

All over the country we find the best physicians and druggists are employing special boilers and keeping the people advised through the secular papers of the health of the town. Why not look for this short and necessarily crude article, as it would be impossible to give any detailed statement as to the hurtful results of the neglect that some from our failure to watch the two life giving principles of a good sound body and good quality of what we eat and drink.

I shall only speak of the importance of water in this article. Absolutely pure water is impossible to obtain, but we can not approach to pure water in eastern water well filtered and aerated. Take a specimen of water from a well in our town and examine it. Is it pure in itself and without an accurate analysis we could ascertain the substances in solution matter to be at least 1 per cent. of the whole mass. Now, we can not drink this water, because it contains in such a healthy condition the system might be overcome with disease, such as typhoid fever and diphtheria, dysentery, cholera, etc., and the water is unfit for use. Now, I do not say that all water is unfit for use, but I do say that almost all diseases are traceable to impure water, and that the most dangerous kind, because it is the most unseen and unknown. Now, I do mean to say that everybody would have their town examined by a chemist, to find out the water, any more than that all would have their premises examined by a physician, but I do mean to say that the continuous use of such water would produce some of the many diseases mentioned, below. Boils, Diarrhea, Disease of Bones, Dysentery, Fever, Fever Diphtheria, Goiter, Cholera, Typhoid Fever, Intermittent fever, and many others. Tuberculosis.

Now it has been truly demonstrated that almost all diseases are traceable to impure water, and that the most dangerous kind is the unseen and unknown. Now, Mr. Farmer's Alliance men joined the Democrats as they ought to have done long ago.

Organic material that is found in drinking water and that is seen, is not the congenial soil in which such organisms flourish and reproduce their kind, but that they are introduced into our body by water we drink, producing sickness and the above diseases. Who feel how many of us, in the past, have been the majority of you, is that baked bread stones, that have not experienced the heat sufficient to destroy the organic material exist due to the action of the yeast germs, and it sets aside from its source the county display of the kind of wealth that might serve to show the world what a county we have. Let us not be ashamed of Harrison, Kentucky. Let us feel our county is not necessarily from impure water in our midst, and resolved in the sympathies of the parent.

"The land that we should not have the pride of belonging to a nation that can not be ashamed of, and all the common members, and do
