THAT SUGAR BOUNTY.

The Democratic claim that protection is disobtainable in favor of the cane sugar planters, A grand and sonorous object lesson is set forth in the following article on the sugar bounty:

For several years Louisiana sugar planters have been feeding on the fat of the land furnished by this bounty.

The average quantity of sugar made in Louisiana in years of normal crops is 250,000,000 pounds. Upon this was paid 2 cents per pound bounty, which added $5,000,000 upon the market. And $5,000,000, making an average of $10.00 per acre, is an income total of $125.00.

The 13 parishes of Ascension, Assumption, Iberia, Iberville, Lafourche, Plaquemines, St. Charles, St. James, St. John, St. Martin, St. Mary, Terrebonne and West Feliciana comprise the principal sugar growing parishes. Of these the last three parishes produced 70 per cent. of the entire crop of the State, according to the census of 1880 their population was 57,290.

During the year ending July 1st, '92, 586 sugar factories in the State, owned and operated by 671 persons, with a total expenditure, around some from 300, 000 acres of land, made 227,000,000 pounds of sugar, and received $11,000,741.70 in bounty alone.

Cash has been drawn in this perfect manner by the owners of the land, and by the usual plantation methods of the South at the rate of $667 an acre bounty on a crop of $10 an acre. Cash in hand, and cash and every factory in the State be paid in the average of $12,000.

Does this not mean ending April 1st, '94, will have A. O. Stanley of the Cumberland district, and Wednesday night Hon. W. F. Kinkaid, of Kenton, will address the people.

The State League of Democratic Clubs has been called to meet at Lexington, Tuesday, Oct. 30th.

Went in love of Shelby County is also an item of every other county in the State in which is located a town of any importance, and it is desirable that such is the case. The Sentinel says: "Shelbyville is the last town in Kentucky without competition." Shelbyville is among the best in the State, and the people in both, as a class can not be excelled. But there is in this county, as on previous times is in every city, town and community in the State, and more to overcome all parties or rights, and the interests of the town and county. The element to be shown, and on this principle that the town is not a part of the county, and that if the Board of Magistrates does anything for the benefit of the town, it robs the county of that much money, regardless of the fact that fully one-fifth of the entire tax revenue of the county is derived from the town, or the fact that regardless of the fact that every dollar of county funds is spent in the town against the Magistrates, the fact that the Magistrate who stands on the town ticket for the support of half the money necessary to make improvements on the public square in the town. Yet the appreciation of these facts which will be so necessary to the town and a convenience to the people at large, county as well a small part people, were no cottage demand for the town. Yet the fact that the town is the home of one of our county boards, and that the vote against
