JEWELS IN THEIR TEETH
Many a woman has been surprised to find a jewel in her teeth when she has been eating a piece of candy or a slice of pie. This is due to the fact that the teeth are often filled with a substance which is called "tooth decay". This substance is often found in the form of a small hole in the tooth, and it is often found in the form of a small hole in the tooth. This substance is often found in the form of a small hole in the tooth, and it is often found in the form of a small hole in the tooth.
