MRS. BREWER RECOMMENDS PERUNA FOR GRIP AND FEMALE CATARRH

The Home of Mrs. Lizzie M. Brewer at Westerly, R. I.

Mrs. Lizzie M. Brewer, of Westerly, R. I., writes the following letter concerning the great catarrh remedy, Peruna:

"In the Narragansett Quarterly Court—I. B. Tilley, Clerk—Solomon Robertson, Deputy Clerk—Solomon Robertson. Master Commissioner—H. C. Kimbrough.

CITY OFFICERS.

Mayor—W. J. Kennedy.
Treasurer—Jas. Harding.
Tax Collector—Jas. Hilliard.
City Marshal—Christopher Dunn.
Street Commissioner—L. W. Cooper.

City Physician—Dr. H. Mangum.
Police Judge—Commonwealth vs. Jas. H. Powell, J. Finley Gaines vs. W. J. Dorsey and C. D. Dailey.

BOARD OF HEALTH.

Dr. R. F. Reynolds, Chairman. Dr. M. Dills Secretary and Health officer. Dr. W. B. Mason, member of Board. O. M. LEWIS POST, NO. 95, G. A. R.

Commander—C. W. McDonald.
Sen. Vice Com.—I. E. Hobbs.
Jr. Vice Com.—John Kennedy.
Quartermaster—Henry W. Hill.
Quartermaster Sergeant—R. H. Faris.
Officer of Day—Jas. Hilliard.
Officer of the Guard—J. W. Campbell.
Delegate to Department Encampment—Johnson Fountain.
Alternate—W. L. Stevens.

MINISTER SAVED

Rev. Henry Langford entirely cured of Nervous Prostration by Dr. Greene's Nervura Blood and Nerve Remedy.

REV. HENRY LANGFORD.

Rev. Henry Langford, the eminent Baptist divine, of Weston, W. Va., has had an extended and successful pastorate in Ohio and other States. For one year, he said, "I have been so run down in my health as to be unable to preach. During the last two months I have been confined to my bed. I had a complete nervous prostration, and thought that I would not recover. I was under the care of two physicians, but got no relief.

"I was unable to hold my head steady in the night, nor could I sleep more than two hours at a time. I had a terrible pain in the back of my head, and took much relief from applying hot cloths to the spine. I was absolutely unfitted to study, and to converse. Dr. Greene's Nervura blood and nerve remedy was recommended to me, and I began its use. I had not taken it long before I began to sleep and grow better in every way. I continued its use for a few months, and was entirely restored to health, and have since been able to preach and work more than ever before."

DR. GREENE'S OFFER OF FREE ADVICE.

Dr. Greene, Nervura's discoverer, will give his counsel free to all who write or call upon him at his office, 25 Yesler 14th Street, New York City. His great success in curing nervous diseases is well established, and will mention the case for health. Thousands come to him and write to him constantly. Do not put off getting the right advice, if you are ill.

GENIUS IN MATHEMATICS.

A Missouri Professor Has Discovered a New Theorem in Geometry.

When William G. Romney, of Beth, England, an obscure school teacher in Missouri, announced the discovery of a method of solving a certain class of any degree the answers was received by the leaders of Great Britain. The Royal Society of London sent a committee to find Professor Romney. The committee reported that his "Theorem of Projection" is correct, and that it is the most remarkable method in the way of mathematics that has been known since the days of Euclid. Professor Romney's method is not a method in the ordinary sense of the word, but is a method of discovering the answer by the use of the diameter of the inner chamber, in which the ball is placed. The ball is applied to the outer chamber from the combustion chamber by the steam, and when heated to a temperature of about 400 degrees Fahrenheit it will not go out of the inner chamber. It is one of the methods of application that has been discovered by Professor Romney.

All attempts to solve mathematically any of the fifth degree have proved failures, and the discovery of Professor Romney is demonstrated to be the most valuable that has been made in the last century. Experiments are being conducted in the two cities, Worcester and Hertal, and the results are being watched with great interest. Professor Romney has been offered a position at a salary of $10,000 a year, but he has declined it.

FINDS NEW POWER.

Edison Has Device to Utilize Wasted Energy in Coal.

Appearance Consists of a Chamber Within a Chamber—Only Its Ten Seventy-Nil of the Energy Stored in Coal Is Used.

Thomas A. Edison is perfecting a device for utilizing all or nearly all the energy stored in coal. At present only about one-tenth of the energy is ever put to use, the rest escaping in the form of heat, principally by the chimney. The device is the result of this and other attempts. It is a chamber within a chamber, the inner chamber being about 10 inches in diameter. The outer chamber is about 12 inches in diameter of the inner chamber, in which the ball is placed. The ball is applied to the outer chamber from the combustion chamber by the steam, and when heated to a temperature of about 400 degrees Fahrenheit it will not go out of the inner chamber. It is one of the methods of application that has been discovered by Professor Romney.

Mr. Edison has been experimenting with this new combustion ball at his works at Edison, N. J., and at his laboratory in this city, and it is said that he has been spending three months with it and at West Orange at the same time. The results have been worked satisfactorily, and the engine is now ready for the market. The cost of the apparatus is small. That for use on a street car need be no more than $100 in diameter and would be portable. The invention may be sold to the Edison Storage Battery Company.

COVETS GOULD'S YACHT.

Venezuela, It Is Reported, May Seize Dictator Castro's Palatial Steamer.

Venezuela does not fancy the way Castro has acted of late and events may occur any day that will result in the latter's being forcibly deposed from the presidency. According to the report of the vessel last summer and the terms of the charter party, the vessel is to be returned to the owners in the condition in which she was when delivered to Castro. This is to be done at Port La Guayra, and it is said that the Columbian government has already given notice to the effect that it will not permit the vessel to leave that port. Castro's friends assert that the vessel will be returned to the owners in the condition in which she was when delivered to Castro. This is to be done at Port La Guayra, and it is said that the Columbian government has already given notice to the effect that it will not permit the vessel to leave that port. THE USUAL RESULT.

Dog Fights in Kentucky Do Not Turn Out Any Differently.

"The second and last calling under I should say in favor of the game dog," said Frank Lewis, of Louisville, who has been spending a few days in Cincinnati, to a reporter for the Enquirer. "I have been a dog fancier for years, and I have had a number of fights, but I never saw one that was so one-sided as the one I saw last night. I guess that will be the last fight of the kind in Kentucky, for the law will be enforced hereafter.

"The second and last calling under I should say in favor of the game dog," said Frank Lewis, of Louisville, who has been spending a few days in Cincinnati, to a reporter for the Enquirer. "I have been a dog fancier for years, and I have had a number of fights, but I never saw one that was so one-sided as the one I saw last night. I guess that will be the last fight of the kind in Kentucky, for the law will be enforced hereafter.

"My dog was a white bull terrier, and I have forgotten the name of the other dog. It was a brindle, and belonged to Frank Fraser, who lives on the Louisville side of the river. The fight was pulled off on the farm of Frank Fraser, on the Louisville side of the river. The fight was pulled off on the farm of Frank Fraser, on the Louisville side of the river.

"
