Solid Fact.

Glasgow Times: Twenty-four years ago the average price of tobacco was less than two cents a pound; now it is 20 cents per pound; today it is fifty cents per pound. It is estimated that the acreage will be one-sixth less this year than last year, but the crop will be worth more during these twenty-four years has been over $100,000,000. When a coal famine was imminent last winter and the whole country was clamoring that something be done, a Republican congress acted like statesmen by promptly meeting the trouble and placing it on the free list. It did this for the reason that free coal would not only be cheaper but more plentiful than high taxed coal. The same arguments that apply to coal apply to iron ore, and therefore the ore has been placed on the free list.

A Queer Law Case

The daily papers not long ago reported a trial case where a man sued a medicine concern which had offered a hundred dollars for a cure their remedy could not cure. It seems that the man had not been cured, though he had taken the remedy. The defence was that he had not taken the medicine long enough. He did not get his hundred dollars.

We allude to this because Veed does not give a slippery guarantee. We sell it on its merits and leave it to the user. If the user comes back with his empty bottle and says—"I took that bottle of Veed, and I can't see that it did me any good," we don't argue the matter. We say, or our clerk says, "Sorry that you happen to be among the few—below a per cent. Refund."

The fact is, they are very few—less than one out of a hundred, according to the experience.

Veed is a scientific nonsecret compound of cod liver oil (greatest nutritional food known), organic iron (which can be taken up into the blood and used), and a mild tasteless wine. It is pleasant to take.

Our Veins, for constipation, is Veed's companion remedy, sold on the same guarantee.
