Getting Ready For The Big Barbecue

To-day we publish a list of Committeemen for the Big Barbecue to be held at Blue Licks the latter part of this month, and it is important that every member be present at the Court House in Carlisle Saturday, August 12th, at 2 o'clock p. m., as the matter of the great meeting will be taken up. There is no doubt but that we are going to have the grandest rally held in the state in years, and it will require the united effort of every friend to make it a success. It is going to put us to the test and there must be no laggards! There must be no such thing as thinking of failure! You must not only help work but you must see that others help to feed and provide for the crowd which will run into the thousands.

Treatment of Inebriates and Tramps

For centuries inebriety and idleness have been very evident in all countries and the individuals or members of society in every case, from the poorest and most humble to the wealthy and those of high position.

No class has been free from the invasion of them, and it is a fact that left the border ingrafted even if by the victims of drink and the votaries of the laziness.

The consensus of opinion has been that in the cases of inebriety, also in many instances of lunacy, a disease and should be treated as such by the persons directly in charge of the case, and it is recognized that under circumstances in which municipalities, counties or states have to free confinement from the jail or the workhouse will produce better results, not only to the unfortunates themselves, but to the state and society in general.

In a number of states of late years there has been inaugurated a movement that leads to the placing of inebriates in farm colonies, where they can at one and the same time be subject to treatment for relief from the vice of drink and be employed at useful work, so they will no longer be costly financial drains upon their families nor nuisances to the public.

It is believed by those who favor this colonization and employment for inebriates that the great superiority to the methods of treating inebriety afforded by this class of unfortunates under legislation in the past.

It is now proposed in New York state to apply the farm colony treatment to that class of idlers known for the past few years by the name of "tramp."

It is said that an average of twenty thousand of such are annually sent to the penitentiaries, jails and other disciplinary institutions of that state, and that an expense of more than two dollars is incurred by the state in caring for them.

The Legislature of New York has passed a bill for the creation of a commission to consider the matter and to report to the next session of the legislature with a view to the feasibility of having a state-owned farm to which the tramps and vagrants may be committed and kept working for the state until they are ready to go to work to keep themselves.

Public opinion in favor of the state at Hamlin, in favor of the adoption of this method of dealing with tramps, vagrants and their sisters who subsist upon the earnings of others, and through it making them actual producing members of the community.—Herald.

Too Much Pepper

Too much pepper in the blood makes the temper short. Too much pepper in the stomach makes the head ache. Too much pepper in the kidneys makes the back ache. Too much pepper anywhere makes you miserable. Ballard's Snow Liniment takes away pepper pains. It is a good thing to have in the house. Sold by Hall Bros.

Very few cattle on the market Monday and so few sales that quotations could hardly be given. However, the market has declined the grass and stock water is getting scarce in many places. The corn crop looks fine and will be more and high and there will be a big demand for feeders. Prices were on the market that very few prime heavy loaders landed at the market board.—Courier-Journal.

Save the Robins

When it is remembered that a single robin destroys 17 destructive insects every day, and that there are 365 days in a year, it is easy to see that a pair of robins will destroy 6,205 insects in a season. Robins are the first birds to come north in the spring and the last to leave in the fall. They are always welcome, and should be protected by every one.

I. N. & F. E. Meaker marketed Monday a load of 19 head of very fine feeder cattle that topped the market at $5.65, and topped the market at $5.65. These cattle were of Hereford blood and had been bought on the Kansas City market in November, 1909, weighing at that time 750 pounds and were grazed for twelve months then fed for ninety days on corn and cut meal, and were about as fine a lot of cattle as has been on the local market in a long while.—Farmers Home Journal.

CARNIVAL FEATURES

Splendid List of Shows Has Been Secured For the Blue Grass Fair.

A splendid list of shows, carnivals, balloons and riding devices has been secured for the Blue Grass Fair to be held in Lexington the week of August 21st to 26th, and these are furnished by Mr. Herbert A. Kline of Pittsburg, who are under his personal direction. Mr. Kline has the reputation of being the best caterer to the amusement loving country today as such a reputation is necessary to the success of a fair as has Mr. Kline. He knows the people and what they want and he always gives them the best. The fact that you never fair has gone back to the fair fairs of the country and each succeeding year has been a record breaker.
