LITTLE INSECT SERIOUS ENEMY IN GREEN-HOUSES

Under Favorable Conditions Pest Multiplies Rapidly, Demanding Fallacies by Stacking Out Cold Green House.

The promise of this widely-diffused green-house pest, *Trialeurodes vaporariorum*, is that it will be a serious pest to the grower in the future. It is now only a pest of the greenhouse, but it is likely to become a pest of the open air in the future. It is a pest of the greenhouse, but it is likely to become a pest of the open air in the future.
