Comparative Digestibility of Food

Made with different Baking Powders

From a Series of Elaborate Chemical Tests:

An equal quantity of bread (biscuit) was made beach of three different kinds of baking powder-

The relative percentage of the food digested is shown as follows: Bread made with Royal Cream of Tartar Powder:

100 Per Cent, Digested Bread made with 68% Per Cent. Digested

Bread made with

alum powder: 67% Per Cent. Digested

These tests, which are absolu unprejudiced, make plain a fa to everyone: Food raised wi tartar Baking Powder, is show tible, while the alum and phosph to largely retard the digestion of them.

them.

Undigested food is not only wasted food, but is the source of very many bodily allments.
