Why Not Waterworks?

The erection and maintenance of a system of water works by the City of Carlisle should not be regarded as a remote possibility to be taken up by a future generation. There is no time so good as the present for the citizens of this town to formulate plans for such a system to be owned and operated by the municipality.

The city is in a prosperous condition, and we believe an adequate system of water supply could be installed and paid for without the entailing of any hardship upon the tax-payer.

There has been some talk of pumping the water from Licking, or of building a reservoir lake on a nearby hill.

Both of these plans are, it seems to us, feasible and both have their good points.

We would suggest, in order that such plans may be more definitely formulated, that a mass meeting of citizens be called, and that the matter be discussed in conjunction with the city authorities.

The question of water-works, we know, has been up before, and has from one cause or another been allowed to languish, which, however, should not deter these interested from seeking to arouse the interest of other citizens in the plans.

The columns of the MERCURY are open to any citizen who wishes to discuss the matter, and we pledge ourselves to give any movement looking to definite action support and publicity, both in the editorial and news columns of this paper.

We need a system of waterworks; it is possible for us to build them. Another town than Carlisle have installed systems of under conditions not so favorable. Why not Carlisle?

NICHOLAS CIRCUIT COURT, KY.
Mollie W. Stewart, ... Pff.
vs.
Anne Hopkins ... Deft's

IN EQUITY

By virtue of a Judgment and Order of Sale of the Nicholas Circuit Court, rendered at the February term thereof, of 1913, at the cause, setting forth the estate of William Hersey, I shall proceed to offer for sale at the County house door in Carlisle, Ky., to the highest bidder, at PUBLIC AUCTION, on Monday, the 17th day of March, 1913, at 2 o'clock, p. m., or thereabout (being County Court day), upon a credit of Six Months, the following described property, to wit:

"A tract of land located in Nicholas County, Ky., on the waters of Cane Run and Caraway Creeks and bounded and abutted as follows: On the north by the Cane Run turnpike and the lands of Charles Shannon, on the east by the land of T. L. Clark; on the south and west by the lands of T. W. Ratliff, containing thirteen acres.

For the purchase price the purchaser with approved security or securities, must execute Bond, bearing legal interest from the day of sale until paid, and having the force and effect of a judgment. Bidders will be prepared to comply promptly with these terms.

U. M. SWINFORD, Commissioner.

SOME BUSINESS NO POLITICS

(This column is conducted solely by The Carlisle Mercury and we are not responsible for error appearing in it.)

Say, folks, we certainly have a good time here on Cane Run. We have 170 acres of the best land we have ever seen, and as beautifulest, a no-fuss picture to look at, as you can find in the pikes in all the country, within a few miles of both Cynthiana and Millersburg, gateway to the feeding of second crops at our three elevators, which sells all the grain every acre of this land will pay for itself with one year's cultivation. Half mile to school, mile to local churches in Kentucky. Time table equals 3 trains 7:00 to 9:00 an hour, but we will sell it to you for $11,000. It's a snap and the prettiest and best farm we have ever had to sell.

Once more, probably for the last time we offer you that good 124 acre farm on the River, ville pike for SIX THOUSAND dollars. Only $3000 an acre. It is not hard time prices. Good land, corn, stone, productive land, and pretty place to live. Any one desiring to sell this place within the next year can have it, if it looks good to you, come on and get it.

How would you like a farm of 100 acres in Bourbon that is all good tobacco land? We have such a farm. 20 acres timber, 2 barns, new home, on good pike, close to school and church, it is a fact that all does have first class land, and you can buy it for $85.00 an acre.

Also a good farm of 95 acres, right on the pike, 2 miles out of town the junction of the Carlisle pike. This location is hard to beat. Splendid barn, good house, and lays fine, and a very desirable farm. The price is low at $85.00 an acre.

Some of you folks are making a great mistake in not waking up to these farm bargains. This has been proved a number of times this season, people wanted large farms that have been withdrawn from the market. We still have a number of first-class farms, improvements and buyers should wake up and get them before they are withdrawn.

We had a very pretty business last week, selling a number of good town properties, among them that good cottage of Mrs. Ella Mayfield on Main and Flora; also sold Will Bonnell's property to Ben Hopkins; and withal, of it we sold the property of the Paris Hill Assembly Company to Mrs. Ella Mayfield. This piece includes the entire property of the Paris Hill Co., real estate, furnishings, rock, stock and fairest. This is a historic old place, filled with many happy memories for a great many people. Mrs. Mayfield will move to it, and will put the property on the market. Don't forget that we sell anything on earth, if we only get the property to sell with. We are in position to practically certain that there will be no Chautauqua meeting again. We put it out for sale, and have an advertisement in big week's MERCURY, describing it. Certain property as having four acres when it has not that much. This is a case of "Buy and Be Sorry." We sell up on the buzz man. We have a 5 room house on Pike to sell, cheap property and we will just take off $100 and sell it cheap, making it $450.00 for the place, and it is just about the best MERCURY, describing it. Certain house, big cistern, house, stable, smokehouse, everything nice and very cheap.

We have so many good houses for sale in town, and so many good farms for sale that it is almost impossible for us to begin to suggest; but we are so fixed that we can fill almost any kind of an order, in town or country, and at this time of year it is well to see us at once if you have in mind buying a farm. Our friends have found that it is economy to put their pockets to see us, whether they want to buy or to sell. If they want to buy we have a nice place to suit them; if they want to sell we have a buyer for just such a place.

Now about a Ford automobile, do you know that you can hardly afford to be without one of these excellent machines? The Ford people have gotten the cost of production down to the 1 point and that is the secret of their ability to sell you a first-class machine at such a low price. The Ford does as good work as a $2500.00 machine and better work in this country. Then the cost of keeping it up is so very little compared with the up-keep of a big heavy machine that it amounts almost to nothing. Any man who can afford a horse and buggy can afford a Ford automobile, while the advantage to his business is almost beyond belief. Do not forget the low price of the Ford—$525, $600.00 for the touring car, and $800.00 for the five-passenger, freight added. Now, believe us, nobody can sell you a better automobile than the Ford at a price under $1200.00 to $1500.00, and then it will not be any better, just a few "jim-cracks" added to make you pay more money. Would like to have an your order at once so that we can have the machine for you when you want it. REMEMBER, you can afford-a-Ford if you can afford anything.

Comparative Digestibility of Food

Made with different Baking Powders

From a Series of Elaborate Chemical Tests:

An equal quantity of bread (biscuit) was made with each of three different kinds of baking powder—cream of tartar, phosphate, and alum—and submitted separately to the action of the digestive fluid, each for the same length of time.

The relative percentage of the food digested is shown as follows:

Bread made with
Royal Cream of Tartar Powder:
160 Per Cent. Digested

Bread made with
phosphate powder:
68¾ Per Cent. Digested

Bread made with
alum powder:
67¾ Per Cent. Digested

These tests, which are absolutely reliable and unprejudiced, make plain a fact of great importance to everyone: Food raised with Royal, a cream of tartar Baking Powder, is shown to be entirely digestible, while the alum and phosphate powders have to largely retard the digestion of the food made from them.

Undigested food is not only wasted food, but it is the source of very many bodily ailments.
