Whooping Cough

Whooping cough comes first with a severe cough, which is dry and hard. Soon the cough changes, and is followed by a loose cough, and finally by whooping. Then the disease is at its height. Now comes the time to relieve the child by shortening the whooping and making it less severe. Ayer's Cherry Pectoral will do this promptly. Keep the bowels open with Ayer's Pills. Do not fail to procure these remedies at once. Be sure you get Ayer's.

THAT COLD YOU HAVE

may bring sickness, distress, bills and doctors. Don't risk it. Get relief now. Coughs usually starts with a cold, and a cold only exists where weakness exists. *Remember that.*

Overcome the weakness and relieve the cold—that is the law of cure. Carefully avoid drugging pills, syrups or stimulants; they are only frauds and leaches and whips.

Take a preparation containing tonic properties. Ayer's Sarsaparilla is such a tonic—a true tonic—and helps heal the air passages.
