High Mark in Wheat
Following the rather surprising report of Angus' first crop, the wheat crop in this section is reported to be the best in years. The report is based on a survey made by the U. S. Department of Agriculture. It is stated that the yield per acre is about 45 bushels, which is a record for this section. The wheat is of a fine quality and is well adapted for export. It is expected that the crop will be a profitable one for the growers.
