1916 CALORIC PIPELESS FURNACE 1917
Take a Lesson From Last Year
Last year you suffered a world of discomfort and trouble from stoves. Take solid furnace comfort this year. It's the modern heating method. No need to carry, no constant attention, but a steady uniform heat throughout all parts of the house. Don't say "it can't be done" because your house is already built. The Caloric Pipeless Furnace can be put in any house, new or old, because it heats without pipes—just the register—and you don't have to cut holes for pipes or flues.

THE ORIGINAL PIPELESS CALORIC FURNACE
Guaranteed to Save 25% of Your Fuel
Manufactured by the Monitor Stove & Range Co., Cincinnati, Ohio
It burns houses of every size, from the smallest cottage to the largest mansion. It is the only furnace that can be put in any house, new or old, without cutting holes for pipes or flues. It is the only furnace that can be put in any house, new or old, without cutting holes for pipes or flues. It is the only furnace that can be put in any house, new or old, without cutting holes for pipes or flues.
