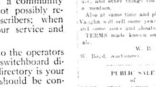
Help the Operators Serve You Better



Telephone subscribers are urged to call by number and not by name. In a community of this size the operators cannot possibly remember the names of all subscribers; when you call by name you delay your service and hamper its efficiency.

All telephones are known to the operators by numbers which are on the switchboard directly in front of them. The directory is your key to the switchboard and should be consulted before calling a call.

Call by number and help the operator serve you better.
