TO THE STUDENT BODY OF THE COMMONWEALTH OF KY.

The present titanic contest is justly named a World's War, since it involves nothing less than the civilized nation's proportion to their numbers. One of the earth and upon its successful conclusion depends the civilization and liberty of all mankind.

Every man and every woman should vividly realize a personal relation to it, and should be ever conscious of a solemn duty to give time, treasure or life, if need be, to this great cause.

The unique and superb part this nation has already played in this death struggle of Kingdoms and Empires is due to the splendid "team-work" of heads, hearts and hands—clear heads and clear heads directing, expert and willing hands. If matters not how patriotic we may be, how willing or how anxious a serve, if we are not prepared—specially, thoroughly and skillfully prepared—for the contest that requires a knowledge of all the forces of nature and resources of science, our zeal is comparatively vain.

Fortifications can be erected and great guns accurately fired only by carry out their plans to do so. Each those possessing a knowledge of the mathematics and calculations. The successful operation of every modern military engine requires skilled chemists, men with his local board on the registrars, engineers, physicists and others. No one must possess a knowledge of As soon as possible after registration these sciences, and a well trained mechanical and electrical engineer—men skilled in the construction and operation of every character inducted into the Students' Army of machinery. The call is for thousands Training Corps will be sent to camps for young, alert and plastic intellects, they are in attendance. Thus the ready, willing and capable, who will qualify for training before the colleges and universities. valuable knowledge or experience to complete a final victory.

It is gratifying to know that institutions, as well as individuals, have responded to the call for war, and that the great Universities and other institutions of higher education have made of a principle, the scientific and practical to be placed on full active duty and branches of study which are essential ordinarily to the conduct of this war and to the ability to the colleges for the training development of our industry after the war, of specialists in various lines of activity are to be undertaken. under soldiers.

The President of the United States has issued the following proclamation:

"Whereas, the Congress of the United States, recognizing the necessity of developing to the utmost the physical, mental and moral efficiency of the young men of the country, has provided by the Act approved July 9, 1918, for the organization, training and equipping of the Students' Army Training Corps, and

"Whereas, the Secretary of War has requested me to call into the service of the United States the men who shall be selected for
