BIG HAPPENINGS OF THE WEEK CUT TO LAST ANALYSIS.

DOMESTIC AND FOREIGN ITEMS

Kernels Culled From Events of Moment in All Parts of the World—Of Interest to All the People Everywhere.

Washington

Renunciation of President Wilson's peace terms by Germany's reichstag was greeted almost to their utmost severity at any time within 25 months after peace is declared was proposed in a bill introduced at Washington by Senator Chamberlain of Iowa.

• • •

Rear Admiral Nilden, commanding American naval forces in the Adriatic, informed the navy department at Washington that the action of the Italian authorities in hauling down the American flag on the steamer Ionian was due to a misunderstanding and that the Italian commander had apologized and ordered the flag restored.

• • •

The house at Washington passed and sent to the senate the bill appropriating $15,000,000 for constructing hospitals for disabled soldiers and sailors.

• • •

General March, chief of staff at Washington, informed the senate military committee that shipping arrangements had been made by which 300,000 men might be transported monthly, and that all of the American expeditionary force could be returned home and demobilized within six months.

• • •

Savings of more than $15,000,000,000 in the consolidation was expected as one of the war and navy departments were reported to congress at Washington on a bill framed by the house appropriations committee. The same report provides for the cancellation of army and navy contracts aggregating $1,170,000,944 and for the withdrawal of authority for the construction of ships by the government for $8,221,829,294 additional.

• • •

The bill appropriating $100,000,000 to the reconstruction fund for the civilian population of Europe was passed by the senate at Washington by a vote of 52 to 18. Thirty-four Democrats and 18 Republicans voted for it and three Democrats and 15 Republicans against it.

• • •

The first open opposition to seating Victor Berger of Wisconsin as a member of the house at Washington came in a statement from Representative Gilbert of Missouri, majority floor leader, in advance of the opening of congress.

• • •

To solve the problem of unemployed discharged soldiers, the war department at Washington has ordered that no man in service shall be given his honorable discharge until such time as he can obtain employment in civil life.

Foreign

Complete failure of the requisite steps to be taken to make established according to latest word from Lisbon.

• • •

French and Roumanian troops have entered Hajin, Bessarabia, on the Dniester according to a dispatch received in Vienna.

• • •

A Copenhagen dispatch says Soviet armies have broken out in Germany. The rulers arrive in provisional headquarters and a huge industrial region is in threatening.

• • •

Plans for the establishment of a local election movement in the Saar basin, the rich gold mining region of the Ural Mountains, have been started in Perm according to a dispatch from Johannesburg.

• • •

A London dispatch says the coal miners have won their short but severe strike. Immediate and full restoration of Thousand strikers resumed work.

• • •

The bourgeoisie of Narva and the entire population of surrounding villages were killed by the bolshevist before the Esthonians and Letts drove out the bolshevist forces, says a dispatch from Copenhagen.

• • •

An Amsterdam dispatch says settlement of the dispute between Great Britain and Germany is reported near. Negotiations are under way for an economic exchange. Poland to send food to Germany and the latter to furnish the Poles with coal.

• • •

Trotzendorf to bring left to the mercy of gangs of bolshevist soldiers and criminals, who are dividing the town into districts for looting purposes, according to the newspaper Rosnoj Listok.

• • •

Lithuanian troops have inflicted a defeat upon the bolshevists near Kovno, duty, about midway between Kovno and Vilna, according to a dispatch from Kovno received here. The casualties of the bolshevists were heavy and they are reported to have lost 2,000 men in the engagement, a Paris dispatch says.

• • •

The mutilated body of Rose Liberta Seurg, who was bracked by a mob in the streets of Kiev, a week ago, has been found in the Lenderski canal, according to a Paris dispatch.

• • •

Five Spain, reports that former King Manuel entered Portugal on a visit last Sunday morning, having crossed the Monte river at Cumbia.

• • •

Czech troops have captured valuables from the Poles after sanguinary fighting, according to a dispatch from the Bessian national council.

• • •

Jack of All Trades.

Edinburgh once enjoyed the distinction of possessing the most prolific stepfather on record: "John Main, Stabioner, Hillside, Tenhouses, Fairnie, Hymns, Prayer Books, Unwelcome, Testaments, Bibles, Sermons, Lectures, one hundred of literature. Money or exchange for old Books; Papers, Rags and Bale Wax and Shellac; Bonds, Bill Heads, Bill and Their Counterfeit Covered Books, Memorandum Books, Religious Tracts. Books neatly bound at moderate terms."

Poor Buddy.

Carlisle had been put before the court and asked if he was fond, so when one of them was killed by a neighbor's dog he felt bad about it. Not long after this the other fellow acted Gaspip and sick. When asked what was the matter and what ailed he would, he went to his mother and said: "I think the dog has nodded itself sick."

Dizzy Thought.

A little visit thinking truth into and the fire.—Detroit.

GAS MEN PLAY A BIG PART IN WINNING WAR

Ten Thousand Soldiers Toil at Turning Out Shells to Rout Germans.

MANY ARE INJURED AT WORK

Edgewood Arsenal in Maryland Won Place of Leadership Over Allies in Scientific Progress and Development of Output—Gas Factory City in Itself.

Baltimore, Md.—While the men who have been working in shipyards and munition plants have received just praise for their fulfillment of patriotic duty, there is an army of men 10,000 strong who have worked faithfully, carefully screened from public notice, performing some of the most important work of the war, work which was largely responsible for the early signing of the armistice, who have received little credit for it.

They after day they have secretly worked in the manufacture of the poisonous gases which routed the Huns and impressed upon the Germans the ingenuity and resourcefulness of the American brain.

These men of the Edgewood arsenal stayed on American soil, never had the excitement of an ocean voyage or adventure in a foreign country or the companionship of those who have been overseas, and yet while staying right in the United States they took the risks that many of the men on the firing line.

300 at One Time in Hospital.

The hospital at Edgewood is now occupied by 300 men who have been gassed or burned while about their country's work. There have been 1,200 gross horses at Edgewood as on the battlefield. There is in the hospital a blue-eyed boy in early manhood, smiling bravely though scars which are today as vivid as the first day, when he was hurt. He is known there as a writing kid of the army, the hospital. Nor is he the only one. There are others, some of whom have been gassed twice and thrice and are today invalided to Edgewood, having developed tuberculosis.

Hundreds of others are maimed and will always bear the marks of their sacrifice for Uncle Sam, which they gave so gladly without any of the glory, stripes, promotion or excitement sent given to the men in the ranges of battle.

The signing of the armistice made it possible for the public to have the first insight into the vast work which has been accomplished at the Edgewood arsenal, where has been manufactured and shipped safely "over there" more gas than has been made by England and France combined. Far removed from prying eyes, these thousands of men have produced gases which will go down in history as among the greatest achievements of the war.

Gas Factory a City in Itself.

Here on October 24, 1917, stood a new waste of forest, now stands what is in its activities a busy city and in its activities a busy chemical plants have risen with lightning rapidity. There are the chlorine, phosgene, chloralin and mustard gas plants, and then there is the great Chicago Bridge & Iron Works plant where the big shells were filled with deadly poisons and sent on their errand of freeing humanity.

Edgewood arsenal covers a tract of 3000 acres, adjoining its companion unit, the great Aberdeen proving grounds, where the biggest of the big guns are tested and where the range finders search the strongest of fortifications for weaknesses that will show results if was confidently predicted. It was decided, would be more effectively secured, and of smaller bulk and weight, than the gas products which

President Wilson and Mme. Poincare, wife of the French president, hold a ring a procession leaving the railway station at Paris. President Poincare is shown behind President Wilson with Mrs. Wilson.

ARE TAUGHT HOW TO "JANIT"

Aspirants Are Instructed in the Secrets of the Janitor's Profession by Atlanta Watcher.

Atlanta, Ga.—An institution dedicated primarily to teaching janitors how to "janit" has just been established in Atlanta under the management of R. S. Hardy, director of the department of vocational guidance. He

has a long list of business men—more allowed through the plant last week and they are one of the enumerated of cable auditors, salt, being made into one of the most fatal poisons. This chlorite gas passes from 2,502 electrolytic cells, is dried by sulphuric acid and pumped to the chemical plants. Here chlorite gas is bubbled into the common sulphur in tanks and becomes a basic raw material in the production of mustard gas, which was one of the deadliest poisons used in the war.

Then there is the phosgene plant, and there also is received by rail and burned by a common steam boiler. Four oxygen, obtained from liquid air and carbon dioxide, are passed together through a tube of silver producing phosgene monoxide. Dry chlorine gas and carbon monoxide are suitably mixed, and by passing over a catalyzer, converted to liquid phosgene. Finally, the liquid phosgene is filled into one-ton cylinders for overseas shipment and was the gas most largely used in the war.

Chloropicrin, one of the commonest war gases in another product of Edgewood, and was produced at the rate of 30 tons a day.

Chloralin gases are another important feature of the arsenal. Here shells are filled with the deadly phosgene, chloropicrin, diphosgene and mustard gas mixtures. From the chemical plants either war gases are obtained from tanks connected by pipes. The mustard gas is poured into shells in the first unit, both ends of the shell are closed and it is sent on to the entire situation to be rapidly handled, and the work of organization, with the exception of a few military personnel, began to increase rapidly. Within a few months after the height of its operation the construction personnel had represented by 6,000 men in its employ; new camp buildings and streets had been constructed at top speed.

When we consider that last winter we helped swell the amount needed for the Red Cross drive by $1,000 we think is the foundation. This plant produced the largest single plants of its kind in the country. For the first time the

M'NULTYS' DEEDS WIN THEM LASTING FAME

Washington.—What's in the name McNulty?

The encyclopedia is silent concerning its origin, but two members of that name have written themselves into the history of one another, had lived on the same street in Washington, one another, and both had distinguished themselves as heroes on the battlefields of France. Which is the more famous, the world will long debate.

Their names were nearly alike—Thomas John McNulty and John Grafton McNulty. They were friends until the beginning of their fortune—they were both in the marines—and they were the first two sergeants—and both had been wounded in the battles of Belleau Wood and Soissons. Moreover, they fought in the same battles in France and both were awarded medals.

And the climactic result of this strange

Silk Stockings Banished In Kansas Gymnasium.

Lawrence, Kan.—Silk stockings are a thing of the past in the women's gymnasium of Kansas State, the last barring knee one of the first rules placed by the authorities of the institution. Even after all girls in the gym classes must wear cotton stockings. The new rule is made in the interest of uniformity, economy and decency.

AMERICA RECOGNIZES POLISH GOVERNMENT

REGIME IN WARSAW GREETED BY SECRETARY OF STATE IN MESSAGE TO LIBERATOR.

Recognition of the Provisional Government of Poland Has Been Accorded By the American Government, State Department Says.

Western Newspaper Union News Service.

Paris—The Supreme Council met with a full attendance, and discussed the questions of the German colonies and instructions given to commissions which is to be sent to Poland. The council, after considering the matter, by decision, as great progress was made concerning it. It is understood a compromise is to be adopted, which fully will preserve President Wilson's plan for international administration, but giving the various nations certain priority of action in exercising their control of the colonies.

Washington.—Recognition of the Provisional Government of Poland has been accorded by the American Government, officials of the State Department said, in making public a message which Secretary Lansing, at Paris, has sent by direction of President Wilson to Ignace Jan Paderewski, the new Polish Premier. Mr. Lansing congratulated Mr. Paderewski upon becoming head of the Polish Government, and said the United States would be glad to enter into relations with the new government at the earliest possible moment.

"The President of the United States and the people of the United States," says Minister and Secretary of Foreign Affairs Lansing, addressing the Polish Government, its sincere wishes for the success of the new state which you have assumed, and his earnest hope that the friendship existing between this nation and elected Lester—the latter to be a member of the cabinet. It is purely an oratory office, with no duties, it is said, without salary."—Kansas City Star.

Twentieth Century Ranch.

The twentieth century ranch is the latest institution of the age in the United States. It is situated in the heart of the cattle ranch of western Texas has been established. Instead of the old ranch scenes, the traditional cowboy, the lariat and the bronco, the latest metalworks, even in his prime, is engaged in the work. Here is a man who is capable individual who handles a lathe, a drill press, a planer, a shaper, a boring machine, drives a mule or a motor truck, and is equally at home at each.

WOMEN OF MIDDLE AGE

Need Help to Pass the Crisis Safely—Proof that Lydia E. Pinkham's Vegetable Compound Can be Relied Upon.

Urbana, Ill.—"During Change of Life, I had an attack of nervousness that left me all winter and half the spring. I could not sleep and at times that I would be afraid I would die. I read of Lydia E. Pinkham's Vegetable Compound and what it did for other women and decided to give it a trial. I got a bottle through Co-Operative Store, and I believe after I would try it I felt like a new woman. I kept on taking it and the annoying symptoms gave a disappeared and your Vegetable Compound has my highest praise. You are at liberty to use my testimonial as you wish. I always recommend Lydia E. Pinkham's Vegetable Compound to my friends passing through the Change of Life."—Mrs. Ida Hall, 1005 Illinois Street, Urbana, Ill.

Women who suffer from nervousness, "the blues," backache, or headache and "the blues" should try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

A Marriage.

"I've been to have a grudge at that clerk.

"I moved into the house he moved out of.

"Didn't he leave things in good condition?

"I have no kick on that score. But the fellow is married to my wife's sister and I'm not on speaking terms with him."—Detroit Free Press.

Filing papers are another important feature of the arsenal. Here shells are filled with the deadly phosgene, chloropicrin, diphosgene and mustard gas mixtures. From the chemical plants either war gases are obtained from tanks connected by pipes. The mustard gas is poured into shells in the first unit, both ends of the shell are closed and it is sent on to the entire situation to be rapidly handled, and the work of organization, with the exception of a few military personnel, began to increase rapidly. Within a few months after the height of its operation the construction personnel had represented by 6,000 men in its employ; new camp buildings and streets had been constructed at top speed.

GREATEST OF ALL TONICS

No Medicine Ever Concocted Makes Fair Comparison With a Brisk Walk in Value.

Of all the tonics the most world over tonic is a good, an sure to give results and as invigorating as the exercise of walking.

To walk one must be in the out-of-doors, and it is in the out-of-doors that we find health.

If you don't believe that this is true join the procession of men and women who walk.

Do you ever notice with a sea dog to and from their work?

Do you ever observe about walking that does one good mentally, as well as physically.

Sometime, when you are depressed—in the dumps—go outdoors and commence walking. It is understood a compromise is to be adopted, which fully will preserve President Wilson's plan for international administration, but giving the various nations certain priority of action in exercising their control of the colonies.

Washington.—Recognition of the Provisional Government of Poland has been accorded by the American Government, officials of the State Department said, in making public a message which Secretary Lansing, at Paris, has sent by direction of President Wilson to Ignace Jan Paderewski, the new Polish Premier. Just as soon as you eat a tablet of Pape's Diapepsin all the dyspepsia, indigestion and distress caused by sour stomach or heartburn disappears. These pleasant, harmless tablets of Pape's Diapepsin are the quickest and surest relief in the world, and they cost so little at drug stores.—Adv.

Using Big Words.

Henry, aged five, had a habit of using in his conversation words that he happened to hear, regardless of its meaning. One day he came in from the street and said to his mother: "Mother, the armistice went into effect. He has a big piece of it in his hand." It was the 1913 Boonet street, Scranton, Pa.

Dog's Tail a Novelty.

Why is a dog's tail a great novelty? **Because a wag seldom is before.**

Supply of Biemuth.

South America and Australia are the principal sources of supply of the bismuth compounds required for industrial purposes in manufacturing, in any, but most of the South American deposits are now refused in works in England.

Woolworth Oblige.
