The Economy of Buying Good Tires
It's mighty good economy to put cheap tires on your car. If you can't depend on your tires, you can't depend on your car, and you can't get the high grade of service it ought to give you. It pays to buy good tires—United States Tires. They represent the highest value it is possible to build into tires. There are five different passenger car treads—the only complete line built by any tire manufacturer. Each has the built-in strength that means your money back in extra miles. Among them are exactly the tires you want for your car, and your driving conditions. Our nearest Sales and Service Depot Dealer will gladly help you. United States Tires are Good Tires
