FOR SALE

I am offering my farm for sale, containing one hundred and ninety (190) acres, for forty thousand dollars ($40,000.00). It is situated one and one-half (1½) miles from Sharpsburg, Bourbon county, Kentucky and eight (8) miles south of Paris, on the Morgan and Falmouth Turnpike.

The location is ideal, lying in the Licking River Valley, and is in high state of cultivation; every acre can be utilized and is well improved.

It has on it a large, modern, eight-room residence, with entrance hall, basement and all necessary out buildings; tobacco barns, new house, ice house, garage and all necessary out buildings; long house, concrete feeding floors, four cisterns, two wells, double corn crib, spring veins, good fences and gates, everything essential for a modern, desirable home, and anyone desiring to purchase an up-to-date farm should see it. Sharpsburg has a graded High School, Churches, Bank, Post Office, stores and is in a good neighborhood.

MORGAN, PENDLETON COUNTY, KY.

MARRIAGE IN AFRICA TAKES NEARLY YEAR

Africa is a very hard place to get married in, as was found out by Rev. Thomas E. Reese of Calhoun, Georgia, and Miss Etha Mills, a pretty school teacher, formerly at Alpharetta, Ga.

The two young people are missionaries of the Methodist Episcopal Church South, in the Belgian Congo. Reese left the mission at the Wembo Nyama House, San Francisco, California, and went to Nashville, Tennessee, and Big Virginia, the three days to go direct to central Africa.

After a courtship that was wonderful with much interest at the offices of the mission boards, the two decided to preach to the people that threatened the missionaries during their wedding. The laws of the Congo State required that both their birth certificates and marriage certificates had to be approved by the Belgian consul at Boma, and by the governor as the General Minister of the Congo at Boma.

However, a way was found out of their difficulty by moving to and engaging their thirty-day residence in Matadi, Congo.

Rev. Mr. Reese was born at Atlanta, Ga., on January 1, 1890. His father was a well-known Georgia physician, who died in 1908. In 1894 the family removed to Calhoun, Ga., where Rev. Reese grew to manhood. After studying in Shorter College, at Rome, Georgia, and Vanderbilt University, Nashville, he was entered his first santorate in 1911 at Woodland Park, Nashville. There he spent a year and served a two-year pastorate at Alpharetta, Ga., after which he became pastor of Wesley House, San Francisco, Cal.

He was also a specialized of the Pacific Conference Epworth League. At the Wesley House in San Francisco, he was familiarly known as "Doc." The bride graduated in 1910 from the French at Peabody College, Nashville, and in 1914 received her degree from the University of Virginia, after which she graduated in 1906 from Blackstone Female Institute, Virginia.

Their work in Wembo-Nyama, Africa, is under the auspices of the Board of Foreign Missions of the Methodist Episcopal Church South, with headquarters at Nashville, Tenn.

Their work as missionaries in Africa will be greatly enlarged, it is expected, as the result of the great extension for $10,000,000 now under way as part of the celebration of the Methodist Centennial of missions.

Only a few 11¼x15 ft. rugs left, this size is very scarce, get one from Wilhite's.

Our Shirt Sale is on buy now and save money. Agee 14 to 18. Effort's

Why not save 4% years interest on the price of an overcoat. Sam Veach is selling them at 25 per cent off for cash.

The Tri-State pays more for each man's cream in his own can because the quality of the cream is better.

You use, the agency system of buying cream mixes all patrons' cream when shipping and all the patrons' care and attention to the cream goes for naught for one gallon of your cream will affect many gallons of good cream and that's exactly what happens and the result is an inferior quality of cream when received at the creamery.

The Tri-State way of DIRECT DEALING gives to each man's cream in his own can.

The Tri-State Pays the Freight and

63c PER LB. FOR BUTTER FAT

Week of March 17th to 23rd

Your cream and cash are guaranteed against loss. If you have no cans write for Free Trial Cans.

A photographic study one week of a Lead and Zinc mine showing the ore being mined, the ore being run to the mill, the mill and the mill's daily capacity for ten to twenty years.

A view of the interior of a lead and zinc mine showing the process of getting out the ore.

Interior of mill showing how the ore is separated from the rock.

Repeating A Pronounced Success

The unqualified success and splendid prospects of the Kentucky Mansfield Lead & Zinc Syndicate, composed almost entirely of Louisville men, has led to the formation of another company, headed largely by the same gentlemen, for the purpose of further development of additional holdings.

The Mansfield District

The mineral wealth of the Missouri district is abundantly shown in the birdseye view at the top of this page. Mines and smelters paying prodigious profits are to be seen on every hand.

The reason lies in the fact that there is to be found the richest and purest ore deposit in the entire region.

In fact, the State of Missouri is the largest lead and zinc producing State, producing 32% of the output in the entire United States.

It is the theory of geologists that this point, Mansfield, on the highest ridge of the Ozarks, marks the spot of a gravitational volcano, which deposited this vast store of mineral wealth by an eruption.

At any rate, it is there and is being mined and smelted at tremendous profits.

It is an absolute fact that T. T. Baxter refused last Friday an offer of 250,000 cash for forty acres of their holdings immediately adjoining the Top and Hollow. This is the forty acres north of the spot where the new company is to be located. Immediately adjoining is the Red Bird lead and zinc mine of W. E. Caldwell (of Louisville). Very rich ore was found in this mine at a depth of only twenty-five feet.

The first company was composed of T. M. Crutcher, President; N. C. Cureton, Secretary, and W. E. Newbold, Treasurer, with the following directors: T. M. Crutcher, Neil Wilson Ferris, William Phillips, N. C. Cureton, H. N. Crafle, Charles A. Funk, T. T. Baxter, G. W. Scott, with Hon. E. J. McDermott as attorney.

The Capital Stock was placed at $100,000 and is owned almost entirely by Louisville men and those of nearby towns.

The Capital Stock is $500,000 and is divided into 5,000 shares of $100 each and issued, 1,000 of this stock has already been taken up, but the rest will be offered immediately to those desiring a very profitable and safe investment.

that this statement may be readily verified either by mail or telephone.

The Louisville Mansfield Lead and Zinc Company has just been organized with T. M. Crutcher, President; T. T. Baxter, Vice President; N. C. Cureton, Secretary; W. E. Newbold, Treasurer, and with the following Directors: J. C. Mahon, T. M. Crutcher, N. C. Cureton, T. T. Baxter and W. E. Newbold.

The Capital Stock is $500,000 and is divided into 5,000 shares of $100 each and issued, 1,000 of this stock has already been taken up, but the rest will be offered immediately to those desiring a very profitable and safe investment.

Profits in Lead and Zinc

When you buy stock in a lead and zinc mine you are not taking chances or buying a "pig in a poke," but you are what you are getting. The property is proven by drilling, and you absolutely know that the mineral is there in vast quantities before mining is commenced.

A striking example of the success of the mills is the Eagle Picher Co. This company made forty millions of dollars in the past five years.

Five years ago this district was an empty proposition—today there are several hundred mills in successful operation and one acre of this land has produced a million dollars in ore.

A picture of ore showing how rich it is in lead and zinc. Ore as it comes from the mine.

OPINIONS OF SUCCESS.

Mr. Crutcher says: "Foundation for wealth in the Tri-State district."

Mr. Cureton says: "Investments have been made by men and women of comparatively small means who have become wealthy. Others have become rich in a few months."

Mr. Williams the chemist of city and expert says: "Unquestionably rich in lead and zinc."

Louisville Mansfield Lead & Zinc Co. Inc.
409 Starks Bldg. Louisville, Ky.

I am interested in your proposition and would be glad to have an investigation made of your property. Kindly send me copies of your booklet and further information.

COMMENT

Because they did such a good job at making the world safe for democracy is perhaps the reason so many of our soldiers make the tragic mistake of thinking they can do as well in settling free speech.

Won't some of our neighbors down the road in Fleming and Mason help us make an effort to get the town back on the straight and narrow path? Some of the National Administration doesn't seem to know it.

Evidently our boys across the sea want to come home. Frank Young writes that he has been over there eight months and longer. The design of how they were spent are as follows:

"Money paid our debt to La Fayette $1.00
Was the boys do as we now to"

The Thrift Stamp and Liberty Bond campaigns have had the effect to soon the "Dime Store" to the "Thrift Stamp." I'd our postmaster the other day: "How many stamps are they worth?" said the man who was being chiefly beginning to dig in his purse.

"If it takes Congress, composed of all the wise men of the time, a whole session to decide what is 'mail,' and 'mailable,' and 'unmailable,' and 'non-mailable,' and 'second class mail matter,' and 'third class mail matter,' and 'postage,' and 'postage due,' and 'postage paid,' and 'postage prepaid,' and 'postage stamps,' and 'postage stamps not to be used,' and 'postage stamps to be used,' and 'postage meter stamps,' and 'postage meter stamps not to be used,' and 'postage meter stamps to be used,' and 'postage currency,' and 'postage currency not to be used,' and 'postage currency to be used,' and 'postage currency not to be used,' and 'postage currency to be used,' and 'postage currency not to be used,' and 'postage currency to be used
