Keep the Egg Basket Full! The food elements that make whites of eggs are entirely different from those that make yolks. When hens aren't fed both the whites and yolk making elements, they can't keep the egg basket full. The usual method of feeding mostly grain makes yolks but not enough whites to make the 100 lbs. of white, one, two, three and four times as much as the yolk. This is the result of short breeding and feeding.

The Most Welcome Tire That Ever Came to Market. Men Who Appreciate Superior Values Prefer The Brunswick. In every great tire factory, the chief question is: "How much can we give for the money?" And the answer to that question depends on the policy adopted.

Every man who has become acquainted with Brunswick Tires knows that Brunswick standards are again evident. This famous concern is noted as a leader in every line it entered since 1845—has done more for that policy in its right.

But standards come first. For in tires making there is vast room for skimping, for subtle economies, for hidden short-cutting. Makers without the highest standards don't build high-grade tires. The Brunswick organization of tire makers includes a brilliant staff of technical experts. Not a man among them has spent less than 20 years in handling rubber.

Then good tires will have a new meaning to you. The Brunswick-Tire is a combination of acknowledged features—plus Brunswick standards of manufacture. The result is a super-tire, the life of which you have never known before. The kind of a tire you will gladly join in welcoming.

Yet Brunswick costs no more than like-tire tires. Try ONE Brunswick. We propose a surprise. And we feel certain that you will want ALL Brunswicks. Then good tires will have a new meaning to you.
