MUST KEEP EPIDEMIC
FROM NEXT YEAR'S CROP

"Wildfire" is being spread by the tobacco fields all over the Blue Grass as an alarming rate, principally because of the recent rains and winds, according to Dr. W. D. Valleau, plant pathologist of the Experiment Station of the University of Kentucky, who has been making special investigation of the tobacco disease this season.

Dr. Valleau said that the disease had probably infected fifty per cent of the tobacco fields of Fayette county, and that the damage could not be measured. All over the Blue Grass the disease has spread with a speed that nearly justifies its name.

The disease is easily spread by contact. It may be carried on the hands of the person who has handled the infected plants, thus infecting many other plants. For it is more commonly spread by wind and rain, so that it is practically impossible to prevent it from getting nearly to all the tobacco fields in the State, unless it is wiped out by some unchanged hot natural agent.

Dr. Valleau was of the opinion that the only assurance to be taken next year, which would prevent the propagation of the disease into the ground for next year's crop. The disease will remain in the seeds all winter and come out probably as bad as ever in the next crop, he said.

The farmers of the State in the opinion of Dr. Valleau, should be urged to take all possible pains to keep the infection from being admitted into the soil of next year's crop.

The seed plants should be selected in a section of the field as far as possible from any of the infected plants. They should be bagged and watched closely to keep all bollworms and other insects away. Only the seed from the pods should be allowed to ripen thoroughly under the hot. Nothing but the seed from these pods should be used with the next bunch that would carry the germ of the disease.

The seed should be sown in a steam-sterilized planting bed. The soil for the bed would eliminate the necessity of watering, which would be another means for the spreading of the infection.

If the disease can get a foothold, experts say, it can be stopped only by the most drastic and rigid methods, which it has been.

Quick Improvement From New Form of Iron

The new way to restore iron to the blood—the surest and most dependable of all methods—is through the use of Ayrd Iron Mixture. It is a natural form of soluble iron—it is starting treatment.

ACTS 1926—CHAPTER 128

1 That all banks created, organized and doing business under the laws of the Commonwealth of Ky., and all national banks authorized by the Comptroller of the Currency of the U. S. of Am., to engage in the banking business in the C. of Ky., shall be authorized, permitted, and are hereby given power to act as agent of attorney in fact for the transaction of any business or the management of, estates, collection of rents, accounts, interest, dividends, notes, bonds and demands of every character; provided, however, that such bank, either state or national, shall have unimpaired capital and surplus aggregating eighty thousand dollars or more.

2 Before such bank shall engage in the business of act as fiduciary as herein authorized, it shall first obtain from the banking commissioner of the C. of Ky. a permit so to do, which permit will be granted by said commissioner upon application and a showing that said bank has an unimpaired capital and surplus aggregating eighty thousand dollars or more.

3 Each and all banks herein authorized to act in a fiduciary capacity shall be subject to the same duties and responsibilities, have the same rights and powers, and receive the same compensation as is allowed the individual holding or exercising similar offices of trusts; except that upon all bonds required to be executed by such corporation in, or before, any court, the compensation shall be taken and considered as the only security required for the faithful performance of its duties, and no other security shall be required, unless the court or officer in or before which the bond is executed, or some party in interest demands it.

3 All acts and parts of acts in conflict herewith are hereby repealed.

Frankfort, Ky., Aug. 19, 1926
Deposit Bank
Carlisle, Ky.

I hear this Department is in receipt of your application for permit to act in fiduciary capacity and in support of said application you have filed affidavits of your President and Secretary together with a statement of your financial condition showing your institution to have more than double of unimpaired Capital and Surplus, wherefore permission for you to act in a fiduciary capacity as provided by the Kentucky Statutes.

Yours very truly,
W. W. Byrnsley
Deputy Banking Commissioner.

Public attention is respectfully called to the foregoing copy of an act of the Kentucky Legislature—session of 1926—and also to a permit granted from the Banking Commissioner of the State of Kentucky, to the Deposit Bank of Carlisle, Kentucky, to duly authorizing and qualified to act as fiduciary in any and all of the various ways as indicated in said act by and from said permit.

One important advantage in providing for such service by a bank in the community is that, it being a corporation, its appointment can be regarded as permanent, and not subject to necessity of changing, as may sometimes occur on account of the death or change of residence of a person. Then too, bank officials by reason of experience are usually well fitted and qualified to perform the duties involved promptly and efficiently.

Respectfully submitted
9-19-tf Deposit Bank of Carlisle, Ky.

EVERY BLEMISH REMOVED IN A FEW DAYS

By A New Method, and This, Pale Bright Substance Works Quickly By Simply Using A few 5-grain Argo-Phosphate Tablets. They Are Like Magic.

Even in many stubborn cases that have baffled physicians and beauty specialists for years, you have never in your life heard of anything like it. They make muddy complexions clear, pimples, eruptions, red spots, blackheads vanish quickly. Your complexion can be clear and pure, and have a beautiful rounded figure. Your face, hands, arms and shoulders can be made beautiful beyond your fondest dreams in a few days by this wonderful new discovery which phosphatizes the system. The effect many claim is marvelous, this treatment is absolutely harmless and is the most delicate person and plump and to use.

SPECIAL NOTICE—Ladies wishing to increase bust development should secure one or two ounces of Emulsion from their druggist and apply once or twice daily. This is a most effective remedy and perfectly harmless when used in connection with argo-phosphate. It will round out your form and increase your weight like magic; unless you desire to increase your weight do not use argo-phosphate. Dispensed by Hopkins Drug Co.

End Your Gate Troubles

No more heavy, trouble-down, sagging gates. No more bent and twisted gas-pipe gates. Put up "Can't-Sag" — made of an ideal combination of iron and steel holed securely together. Simply open the gate, close it and fasten, the "Can't-Sag" Gate is perfectly balanced at both ends—each can't break through and destroy growing crops.

"Can't-Sag" Gates

Can't Sag a Fraction of an Inch

In order to sag even a quarter of an inch, 45 bolts and 8 pieces of angle steel would have to bend. You know that is impossible. The steel gate costs less than the old-fashioned kind. Thousands are in use on large and small farms everywhere. Drop in—see these gates when in town.

Carlisle, Kentucky

Why Doctors Treat the Blood with Iron

When the doctor treats your blood, he gives it iron, for iron is the one thing in all medicine that builds up the blood. Sometimes he does this by regulating your diet—sometimes by administers iron in the form of pills or tonics. But always he is searching a way to get the most iron into your blood. That is why Ayrd Iron Mixture is the great blood-builder—because it has iron.

Quick Improvement From New Form of Iron

Tire Treads
Improved 25%

The latest Miller triumph is a super-grade tread. It excels the best rival treads today by an average of 25 per-cent. This has been proved, under careful watch, by many road comparisons.

The Miller-Tire mileage is the talk of the day. But these new-grade treads outwear the balance of the tire.

Not one Miller Tire, built with this new tread, has ever come back with the tread gone.

These treads do not vary. Every day the Miller tread stock is vulcanized and tested in the laboratory. It must prove up to these new standards before a tread is made.

Miller Cord Tires, in the factory tests, now average 15,000 miles. Miller Fabrics from 8,000 to 9,000 miles. And these factory tests are extreme.

Watch your mileage on one Miller Tire. Compare it with any other and it will win you. You owe that to yourself in view of Miller records.

Tread Patented

Center tread smooth, with motion cups to firmly grasp wet asphalt. Scientific Gum-Dipped side treads mean bite cogs in dirt.

Suppose You Had to Rebuild Every 14 Years?

If you knew that most everything in your house had to be rebuilt every 14 years you wouldn't you were—only a little one-fourteenth of the cost every year. So be true in replacing the stairs, windows and other parts when they wore out.

If you were renting that house to someone else, you would have to charge enough to provide that one-fourteenth a year, besides taxes, insurance, current or temporary repairs and interest.

That is exactly what the telephone company must do if it is to stay in business permanently —there enough for its service to provide each year's quota of this rebuilding. Some parts last all other expenses.

That constant wearing out is "depreciation", and the annual quota to meet it is the "depreciation reserve"—and it is just as necessary as the wages for the company's employees.

"At Your Service."

Kossuth on Liberty.

But if you say "Liberty, liberty" and take that for your policy, I dare say the time will come when you will have to mourn over a new Bastile and a new despotism. Let me get community national freedom I never care. No one should ever say "Down liberty" now "Liberty"—then liberty will be found forever sure in Australia.—Louis Kossuth.

Nations Among Monosaurs.

In Monrovia enrollment the tenth of persons of note are often topped with caps and gowns and robed with arabesque of cloth.

Lake Rielly Says, "The Rat Died Before Eating the Biscuit."

"Since moving near the river, 2 years ago, we've always used RAT-SNAP. Watched a visitor feed RAT-SNAP outside the house. About 15 minutes later he darted off for the water, to cool his burning stomach, but he died before reaching it." Three sizes, 35c, 65c, $1.25. Sold and guaranteed by

Contest with Little.

"It seems to me," said Smith, with the wisdom that the simple in heart often exhibit, "that the secret of this world a woman's only chance of happiness is to marry a man she doesn't make her so. Lord! a fire, so it must seem feel to have it right, but a woman's fire needs only time and that is supplied by time perhaps, for she seldom gets married."—Harry Hervey Hurst, in Ayrd Letters.
