Why Doctors Treat the Blood with Iron

When the doctor treats your blood, he gives you iron, for iron is the best blood medicine. It helps to build up the blood. Sometimes he prescribes Peptiron, a tonic for regulating your diet—sometimes he administers iron in the form of pills or tonics. But always he aims to help you get the most iron into your blood. For it is by getting iron into the blood that great builder—iron—which it has not.

Quick Improvement From New Form of Iron

The new way to restore iron to the blood—the surest and most dependable of all methods—is through the use of Acid Iron Mineral. This is a natural form of soluble iron—it is not prepared artificially by chemists but is made by Nature itself, combined with certain vegetable principles. These principles are the result of the discovery of Dr. James Hamilton, famous Pittsburgh physician, who has devoted a lifetime to the study and treatment of blood troubles. Acid Iron Mineral has proved its remarkable blood-making powers.

Acid Iron Mineral may be procured in liquid form at any drug store. It contains no alcohol or injurious drugs and will not blacken the teeth. It has been especially noted that pale, weak, run-down persons and those who are afflicted with a form of blood trouble soon have proof of improvement in their health. Increased strength almost immediately after taking the first dose. Get a bottle and see how much better you feel in a few days.
