

# HOW DOCTORS TREAT COLDS AND THE FLU

First Step in Treatment is a Drink  
Frequently With Chicken  
Broth and Bed Rest

Doctors have found that the best way to treat a cold or the flu is to give the patient a hot drink and bed rest. The hot drink should be a chicken broth, and the bed rest should be in a warm bed with a blanket. This treatment is the first step in the treatment of a cold or the flu. It is the most important and the most effective. It is the only treatment that is recommended by all the doctors. It is the only treatment that is simple and easy to follow. It is the only treatment that is safe and sound. It is the only treatment that is effective. It is the only treatment that is recommended by all the doctors. It is the only treatment that is simple and easy to follow. It is the only treatment that is safe and sound. It is the only treatment that is effective.
