The New Way To Put Iron in the Blood

The highest medical authorities have always taught that iron was the best tonic for the blood and all agree on the great medicinal value. The trouble is that iron in the old fashioned way of taking it is not to be relied upon. So, scientists have sought to make iron in a medicine may have a reliable source of information this announcement is made:

Quick Results Noted

The new way to restore iron to the blood is to use Nuxated Iron, which contains nuxated iron, which is not precipitated by chemicals like most

medicinal iron, but is found in Nature itself, combined with other highly beneficial remedial agents. The story of the discovery of this new form of iron reads almost like a fairy tale and medical science has proved in thousands of cases that it is remarkable blood-making powers.

Acid Iron Mineral may be procured in liquid form at any drug store. It contains no alcohol or injurious drugs and will not blacken the teeth. It has been especially noted that pale, puny children, nursing mothers and nervous sufferers seldom fail to gain strong improvement and exhibit increased strength almost immediately after starting treatment.
