TOBACCO'S FOES LOSING GROUND

Canvass of 7,847 Editors Shows 7,393 Communities Against Abolishing Weed.

ANTIS LOSE THREE STATES.

Utah, Under Mormon Influence, Only Commonwealth to Adopt Prohibition Measure During Year.

"In tobacco going to have its scalp added to the belt of the prohibitionist bombs that of the innocent but ne'er-do-well weed that has never yet been put altogether late alcohol?" is the question asked by Garret Smith in an article in the current issue of Leslie's Magazine."

The writer reaches the conclusion that while there has been increased agitation and legislative activity on the subject of tobacco following the success of the drive for prohibition of liquor the efforts of reformers seeking to abolish tobacco have no general support. This opinion is based on the results of the questionnaire on the subject sent out to newspaper editors of the country by the Press Service Company of New York City.

The questions asked were:

(1) Do you favor the enactment of laws prohibiting the personal use of tobacco in any shape?

(2) In your judgment does the present sentiment of your community favor such legislation?

(3) Is the use of tobacco personally objectionable to you?

No arguments accompanied the questions and from their form it will be possible for any editor to determine the attitude of the questioners.

Out of 12,518 editors questioned, 7,847 replied promptly to the questions given. These editors, it is estimated, represent a combined circulation of 21,870,000. Of the 7,847 editors replying, 7,393 declared that the community public sentiment in their communities as opposed to anti-tobacco legislation, only 250 editors, or 3 per cent of those replying believed there was any considerable sentiment favorable to tobacco prohibition. Three hundred and 274, or 2 per cent, in doubt, while 20 failed to record their judgment.

Editors' Judgment Unbiased

"It is of material interest to note that 500 editors in answering the first question, personally favored such legislation, although only 250 of them reported that public opinion in favored the prohibition of tobacco—an indication of the conscientious effort made by the editors to distinguish public opinion from their own personal opinion," the article continues.

The most conspicuous of replies rejecting public opinion favorable to prohibition of tobacco came from Utah, where 42 per cent of the editors thought the sentiment was in favor of the movement. Utah is the only state within the three months' period mentioned now. The other editors who stated that the influence of the Mormon church is set against tobacco. The Mormon church has been growing in Idaho, and it is the other state where the use of tobacco in any form is prohibited for the governor has signed the bill but refused to do so. Most reactionary opposition is reported. In this state 40 per cent of the editors entered sentiment in their communities as against tobacco prohibition, but nevertheless, in 6 per cent below the average reported opposition.

"The legislature of Tennessee some weeks ago passed a bill prohibiting and has signed a bill repealing the anti-cigarette law of that state. The governor has signed the bill per cent of its editors believe that there is no anti-tobacco legislation. The legislature of Arkansas passed a bill prohibiting the manufacture of cigarettes in that state. In this state 31 per cent of editors reported existing tobacco prohibition.

Another Practical Joke

"A bill introduced in the current session of the legislature of Texas seeks to prohibit smoking in public dining rooms and other public places. The bill was amended to prohibit the consumption in public places of tobacco, gum, tea and coffee and then defeated for the session. The remaining 3 per cent of persons from that state were 'no per sent 'ins'."

"So long where the 'wild' were 30 per cent in 1919 by final the use of cigarette law has been passed and signed by the governor.

"A bill to repeal the anti-cigarette law in Kansas is now pending. It will be receiving the attention of its legislature. It had been passed by a referendum in Oregon to prohibit the manufacture and sale of cigarettes. Attempts to bring the question to a vote, and to put over a referendum to abrogate their public control legislation. In this state 40 per cent of editors have reported unfavorably to the anti-tobacco movement. The bill was passed in part and applied to the public schools.

"Indiana, Iowa, where 30 per cent reflected pseudo-sentiment, the entire anti-tobacco movement as in the case of Tennessee, Arkansas and Kansas, has failed to get ground and is not in any sense public sentiment supported by the people.

"The friends of tobacco feel justified in their stand on the showing, very much as temperance people do in regard to legislative attempts with 42 state legislatures in session and 40 more to meet before next January on annual instead of biennial sessions.
