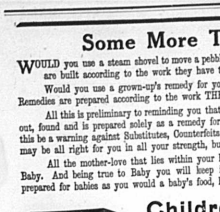
## Some More Truths.

WOULD you use a steam shovel to move a pebble? Certainly not. Implements are built according to the work they have to do.

Would you use a grown-up's remedy for your baby's ills? Certainly not. Remedies are prepared according to the work THEY have to do.

All this is preliminary to reminding you that Fletcher's Castoria was sought out, found and is prepared solely as a remedy for Infants and Children. And let this be a warning against Substitutes, Counterfeits and the Just-as-good stuff that may be all right for you in all your strength, but dangerous for the little babe.

All the mother-love that lies within your heart cries out to you: Be true to Baby. And being true to Baby you will keep in the house remedies specially prepared for babies as you would a baby's food, hairbrush, toothbrush or sponge.



# Children Cry For Fletcher's CASTORIA

### Are You Prepared?

A doctor in the house all the time would be a good idea. Yet you can't afford to keep a doctor in the house to keep baby well or prevent sickness. But you can do almost the same thing by having always a bottle of Fletcher's Castoria, because it is a wonderful remedy for indigestion, colic, feverishness, fretfulness and all the other disorders that result from common ailments that babies have.

Fletcher's Castoria is perfectly safe to use. It is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. Children cry for Fletcher's Castoria, and mothers recommend it because they know it is a certain cure for Worms and Stomach Troubles.

If you love your baby, you know how sweet it is to be able to help baby when trouble comes. You cannot always call upon a doctor, but distress here nothing but good results to say of Fletcher's Castoria, because they know that it can only do good—that it can't do any harm—and that they wouldn't want you to use for baby's remedy that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS
Bears the Signature of
Chas. H. Fletcher.
THE CENTAUR COMPANY, NEW YORK CITY.

Exact Copy of Wrapper.

**Saves Us.**

Mrskeljohn—And you spend so much time at golf, you won't have any left to hold aside for a rainy day.

Higbie—Which is why my desk is crowded with work that I've put aside for a rainy day.

**Culture for Pimply Faces.**

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

"Who's the new stenographer work?"

"She." "Well, she hot. She isn't that pretty."

A fault-finder is better than a fault-finder.

We know what your answer will be and to secure these satisfactory results you have only to use

# Alabastine

*Instead of Wallpaper, Paint or Kalsomine*

Alabastine is a dry powder packed in 5-pound packages in white and a variety of beautiful colors ready to use by mixing with pure cold water, with full directions on every package.

Alabastine has been on the market for forty years, is a household word in every civilized country in the world. If unable to secure the services of a painter or decorator you can apply Alabastine yourself.

Important to Know

To secure Alabastine results you must get Alabastine; it is necessary to see that the package has the word "Alabastine" and the cross and circle printed in red.

When employing the services of a painter ask him to bring the Alabastine unbroken package and mixed on the job. This he will be glad to do to convince you that he is giving you what you desire and pay for.

*Sample card of tints furnished by dealers or write to us direct.*

The Alabastine Company, Grand Rapids, Mich.

**The Real Question.**

Squire Barlow of Guilford town ship, Hendricks county, remarked a point of law recently at the close of a hearing when some young people pleaded guilty to taking watermelons. After the fines of $10 and costs of $12.50. Then the father, who was present but no one made reply.

Then Squire Barlow said: "That is not the question. The question is, have you got caught?"—Indianapolis News.

**The Common Gift.**

"Was it home work?"

"I should say. The bride and groom received eight chickens."

**The Morning Mail.**

"Well, you look busy," remarked a caller at the sanctum.

"I am," said the editor of the Chippewville Clarion, who was sorting his morning mail.

"What are those letters in the small pile?"

"Complaints from subscribers, a few letters telling me how to run my paper and a couple of checks."

"And in the big pile?"

"Poetry."—Birmingham Age-Herald.

**Princess Trees in Pennsylvania.**

Two groves of princess trees have been discovered in Pennsylvania since a forestry officials in Huntington county near the Centre county line, in the Logan state forest. There is a great variety of very large trees in the area of 200 acres. A botanist was found examining twelve feet in circumference.

**Miss Drake Refuses**

By JANE OSBORNE.

©, 1915, by McClure Newspaper Syndicate.

When Mrs. Turner joined her brother on at breakfast he was pretty sure that she had come to ask him to lend on some errand or other for her down town. Much as she doted on Jimmy and great as was the pride she felt in his remarkable success in business she still held the same notion concerning what business was and had during the late of Jeremy Turner in the timeworn theory that to write business letters, telephone and go on shopping expeditions for the woman at home. Jimmy was right in the shopping section—why shouldn't he match the silk? He had a telephone right on his desk—why shouldn't he telephone to the plumber about the roof leaks? He was so used to writing letters—why shouldn't he attend to the social correspondence?

But on this particular morning Mrs. Turner's commission was a little out of the ordinary and she approached it with assembling of caution.

"I'm going shopping this afternoon, Jimmy dear, and expect to be tempted to spend a little extravagantly. You grow to be tempted, too, by five, you know, and I shouldn't have been making such a splurge of late had I been quite the perfection. Now, of course, there is Elizabeth in the kitchen. She will be sending me her Violet to help in the afternoon, and I thought I'd have Violet at the door, with Rita helping upstairs, but Rita's very busy and I couldn't be here. It's her regular afternoon off and I don't want to put her out of date. She has given notice, you know, and I'm disappointed in her for it. And she is so indispensable to me."

"I'm sorry to hear it," said Jimmy, tears to make the sandwiches and the cocoa and to do the finishing touches on things and keep the house in order. Can't you persuade her to change her mind?"

"No. I am to help in the pantry myself and have promised to be Elizabeth's chance to interrupt.

"Oh," said Mrs. Turner, still with a cajoling voice, "I was only thinking that one of your girls could come and help out. There automobile road at the door, and Rita knows what I like to do." It was one of Mrs. Turner's fancies that any business could manage to get along with half the assistants it employed and do all that it did, but Jimmy did not dispute it.

"There is that very capable young person to see to her service," he suggested, "and I'm sure she knows to send for Mrs. Hendrick in an emergency. I'm afraid I'm a poor substitute for your maid, Mother dear, but I'll be my mother as she might be if she were here. I'll be glad to do my share."

Mrs. Turner was not a man of many thoughts, and those few she had she formulated one theory that he usually held to be unassailable. That a girl in business usually made a better wife than one who had never earned a penny. Jimmy's success as a business man as a wife then the girl whom Mrs. Turner had chosen for him. She had even made up his mind that if Jimmy married the girl she would be worked in an office. Of course such an idea as office girl for a wife was unthinkable to Mrs. Turner. So Jimmy had married a heiress, and she had remained a heiress. Of late, however, she had grown somewhat weary of her theory, more than a decade of it having been a time of little satisfaction, in the fact that it was unassailable she was quite willing to forget it altogether.

"I'm glad you're going to be home, Jimmy," she said, "for I've been thinking of a possible daughter-in-law there would be a way."

Jimmy breathed the subject to Miss Drake at the office that afternoon. Miss Drake's shoulder left an

©, 1915, Western Newspaper Union.

possibility of hope. And in the sleepy sort of humour that she affected in her study Turner felt that he was something to her comfort had he had need before. It did not enhance her opinion of him as a lover in Jimmy's eyes.

Still there was the thought of the young pantry, the cakes and sandwiches looking as if they had been thrown on the plates, servants losing their heads at the last moment. She dared not let it attack come without sending his mother some one to help.

It was another of Jimmy's few characteristics in one of his moments of discomfiture to consult his secretary. Miss Drake could find a way out of any desire and thought—for the office closed and locked, the telephone disconnected and left in his hands.

He was trying to think of some one, somewhere, who could help him in an emergency. Then it dawned on him that he had picked out of the path of a skidding automobile a few weeks ago a little lack was toward the car. Jimmy did not waste time in speculating. He merely lifted her up in two arms to the pavement, answered a sixty-thousand curse.

I shall always feel that I owe my life to you, and yet you are a stranger to me," he said. "I must hurry along, but I shall see you again when you have had your lost telephone Clarendon 778 and ask for Miss Brown. He felt somewhat that she was answering a call for help. Jimmy Turner's confession was a little at variance with the facts, but it was a something of subtlety.

"I'm going right into this afternoon, Jimmy dear, and expect to be tempted to spend extravagantly. You grow to be tempted, too, by five, you know, and I shouldn't have been making such a splurge of late had I been quite the perfection. Now, of course, there is Elizabeth in the kitchen. "I'm glad you're going to be home, Jimmy dear," she said, "for I've been thinking of a possible daughter-in-law there would be a way."

Jimmy breathed the subject to Miss Drake at the office that afternoon. Miss Drake's shoulder left an

**Origin of Slang Term "Masher."**

The slang term "masher" is purely American in origination. There is some doubt as to its exact origin, although there are four plausible sources as given. The most acceptable explanation is advanced by Bartlett and Farmer in their "Slang and Its Analogues," to the effect that the word "masher" was heard only in certain parts of the west. In 1880 the word "mash" was heard only in certain parts of the west. In 1880 the word "mash" was heard only in certain parts of the west. In 1880 the word "mash" was heard only in certain parts of the west. In 1880 the word "mash" was heard only in certain parts of the west. In 1880 the word "mash" was heard only in certain parts of the west.

**Bottom of North Atlantic.**

The bottom of the North Atlantic ocean is one of the most level areas of the earth's surface in the world. If the sea were drained off, a wagon might be driven all the way from Valencia, on the west coast of Ireland, to Trinity bay, in Newfoundland.

From Valencia the road would lie down hill for about 240 miles to the

**Combination of Qualities.**

Standard-bred poultry offers a generous combination of practical and profitable qualities suitable to the needs of the farmer and poultry fancier.

**Grass Stuff for Fowls.**

Keep up the supply of sprouted oats if other good, tender grass stuff is not constantly available.

**Tonic Helps Produce Eggs.**

Green food is a great tonic and helps in egg production.

**Inoculate Legumes.**

If such crops as alfalfa, cowpeas, soy beans and sweet clover are sown on land that has never raised any of these crops inoculate with artificial bacteria is essential to successful growth.

**Shelter Drinking Water.**

While the weather is warm by all means place the drinking water in a sheltered spot, where the sun's rays cannot reach it.

**France Welcomes Visiting Members of the Legion**

The members of the American Legion on their arrival in France aboard the U. S. steamer Washington, were an important component of the foreign visiting body. Naval, military and civil authorities turned out to pay respects to the men who fought on the battle fields of France. The Legion is in France to dedicate a monument to the American soldiers who fell on the French battlefields. The visitors are here seen marching through Cherbourg.

# Animal Pests Worry Farmers

### Sometimes Hard to Tell Which Are Useful and Which Are Nuisances.

### MILLIONS FROM THEIR FURS

**How Those Which Must Be Exterminated Are Trapped, by Expert Hunters—Rats and Mice Worst.**

By Gardner Soule, Author of "Trapping for Profit."

Washington.—Practically every farmer has been annoyed by pests of one kind or another. Sometimes it is hard to tell which pests to kill and which to protect. Some are distinctly useful, some are distinctly harmful, and some are in between stage.

In a knowledge of the traits and habits of the animals," says Ned Dearborn in charge of the section of biological survey, "and of proved methods of capturing or keeping them if the farmer is to combat those that successfully. Some animals, such as pests as rats, mice and gophers, cause other animals, such as quarrel some, but harmless, such as mice and bring no returns. Still others, such as skunks are exceedingly beneficial, for they feed almost entirely on insects and other creatures that either are of no economical use or are positively harmful. Some animals, such as the fox squirrel, are both harmful and useful. Foxes, for example, do much damage to poultry, but they also kill many rabbits and mice, both of which, when abundant are very destructive to crops. Hawks and owls are exceedingly beneficial, for they feed almost entirely on insects, small animals, while persons and upon the destruction of the same furnish a single effort. However, certain species of hawks are very destructive to young poultry and to game birds, and should be killed on sight. Where rabbits are scarce or absent, hawks are very destructive to young poultry and to game birds, and should be killed on sight. Where rabbits are scarce or absent, hawks are very destructive to young poultry and to game birds, and should be killed on sight.

**Excessive Measures.**

"The food habits of other far bearing animals, such as the raccoon, the weasels are excellent measures; skunks are beneficial, for they feed almost entirely on insects, while persons and upon the destruction of the same furnish a single effort. However, certain species of hawks are very destructive to young poultry and to game birds, and should be killed on sight. Where rabbits are scarce or absent, hawks are very destructive to young poultry and to game birds, and should be killed on sight.

"In some instances the animal which is doing damage is not to be found in the immediate vicinity of the locality in which the damage is done. Thus, for example, the mink, which is destructive to poultry, is not to be found in the immediate vicinity of the locality in which the damage is done. Thus, for example, the mink, which is destructive to poultry, is not to be found in the immediate vicinity of the locality in which the damage is done. Thus, for example, the mink, which is destructive to poultry, is not to be found in the immediate vicinity of the locality in which the damage is done.

"The most destructive group of pests on the farm includes the small gnaw ing animals commonly known as rodents; these are house rats and mice, which have been introduced into this country from the Old World, and several species of native mice. Of the native mice, the white-footed mice and several kinds of meadow mice are the most destructive. These animals are very destructive to grain and grain products, and they also destroy a great deal of forage in the vicinity of their runways. Ground squirrels, or gophers, also related to ground squirrels, are destructive to field and garden crops. In mountainous and timbered regions porcupines are serious destructive to orchard and

**Lightning Flash Picks Setting Hen's Bones**

Winchester, Va.—A marvelous freak of lightning was reported here by Mrs. Standard Taylor, of Jefferson, West Virginia, who declared that after flitting in the night a small pear tree bent to the ground. The tree continued to bear after a few whose eggs were hatched by the heat of the lightning had run down the trunk of the tree. The hens and there was the skeleton of a chicken in which also had set upon.

The hens were no more set upon. They had been killed in the nest and feathers had been burned from their bodies. All of the eggs had been burned to a crisp. A small hole was found in the trunk of the tree and the bottom of the nest.

**Golfer's Trick Strokes.**

The young Australian golfer J. H. Kirkwood is mourning of a wrist with the ball well in the ordinary a first-class golfer in the opinion of Tom Vardon, who is visiting London about a century ago by Sir Joshua Reynolds, entered for the Royal Academy, failed, and forged Bibleham's name to his picture. He wrote to Sir Joshua, who was then in Italy, and was deceived by the great artist, Reynolds, and would have been sent to prison had not the trickster "bored" the likes.

**The Best Antiseptic.**

Sunshine is the housewife's best antiseptic. It is hard for a cold to survive in a house flooded in sunshine. Even if the members of your household are not at home during sunshiny hours, if they sit at night and sleep in rooms that have been flooded in sunshine and fresh air during the daytime they will reap the benefit. So forget the fact that sunshine fades rugs and hangings and let the sun shine in for all it is worth during those months when the sunshine is none too strong.

**Lightning Flash Picks Setting Hen's Bones**

Winchester, Va.—A marvelous freak of lightning was reported here by Mrs. Standard Taylor, of Jefferson, West Virginia, who declared that after flitting in the night a small pear tree bent to the ground. The tree continued to bear after a few whose eggs were hatched by the heat of the lightning had run down the trunk of the tree. The hens were no more set upon. They had been killed in the nest and feathers had been burned from their bodies. All of the eggs had been burned to a crisp. A small hole was found in the trunk of the tree and the bottom of the nest.

**HERE'S A QUEER HYBRID**

This is a "Rooster-Tom," and is the property and pride of Mr. Thomas Hall, of Woodland, Ore., who has about forty queer hybrids on his farm. The rooster here shown was a turkey and hen chicken. His tail, scrawny as a cock's crow and tapers at last a liquid gobble.

**STOLEN GEMS HURT MARKET**

**Pilfered Russian Diamonds Ruin the Trade in Holland and England.**

Amsterdam, Holland.—Steadily increasing complaints from the Dutch and Belgian diamond trade centers have at last wrung from the Russian government the admission that the recently reported theft of diamonds from the Russian crown jewels has had a disastrous effect upon the diamond market. Last week the number of unemployed diamond workers in Amsterdam alone was reported to be 10,000, and in other cities of Holland and Belgium the proportion is said to be equally large.

The Russian government has announced that it will not sell the stolen gems, but will keep them in the hope that they will be recovered. Meanwhile the diamond trade is suffering severely from the fact that the market is flooded with the stolen gems, which are being offered for sale at ridiculously low prices.

**Well, Now That's Settled.**

Well, now that's settled," exclaimed how many kettles of fish you've spoiled by talking too much and been fooled twenty-five times in your life, you've got to learn to keep your mouth shut."

A general merchandise store at Lewis opened a safety deposit box for the person guessing the correct number. Mr. N. S. Matthews of Lewis won. His guess was 236 grains. The rooster contained 240.

Gaton lake, a part of the Panama canal system, is the largest man-made body of fresh water in the world.

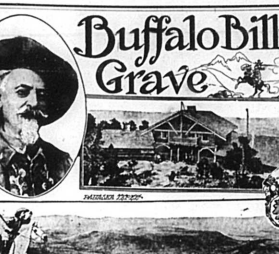
**BRITISH YAWN CALMS POLES**

**"Really, I Must Go to Bed," Officer Tells Ancient Man in Silesia.**

London.—A British yawn in the early hours of the morning calmed a crowd of excited Poles at Myslowitz, upper Silesia, according to the Berlin correspondent of the London Daily Express.

A British force entered the town

# Buffalo Bill's Grave



By JOHN DICKINSON SHERMAN.

YOU previously known as Colonel Cody, who was born in Scott county, Iowa, in 1846, and died in Denver, Colorado, in January, 1917, was buried on the mount-sacred grave in the world.

Buffalo Bill's grave is the property of Denver have established the Denver Mountain Park system, which is the only and the peaks of the rocky mountains. The park system of which the tract has been $417,000; there are 1,500 acres in the park system, and the city and the people of the rocky mountain parks. The main automobile road of which Lookout mountain is a part, to its summit. Buffalo Bill's grave is on the east corner of Lookout mountain, and is easily reached by a road that takes you within a few hundred feet of the summit. Close by the grave the city has established a Buffalo Bill museum. In the summer of 1921 approximately 250,000 visitors registered at the gates of the Denver Mountain parks. Of these visitors about one-fourth came from other states. Most of these out-of-state visitors stopped to see the grave and the museum. So much for the statistics.

The tourist business of the average West is becoming a tremendous factor in the development of the country. Denver is progressively the metropolis of the west, and the Denver Mountain parks system is one of the most unique assets of the city. Denver is the center of a vast scenic region. Within a few hours' motoring distance from the walls and balcony rails of Denver you can see the snow peaks of from snowcaps to the near snow fringe of the mountain parks. Within a few hours' motoring distance from Denver you can see the mountain parks, the skiing, the tobogganing, the mountain climbing, the trout streams, the wild animals and wild flowers that are the delight of the tourist.

Buffalo Bill's grave, saddles, bridles and other equipment, including many gifts made to him by Indian chiefs, are to be seen in the museum. Buffalo Bill's old home, with the skin and hair partly worn off, is also a feature of the museum.

Denver is the city of Lookout mountain was opened to the public last May 30, and by the end of the year 1921 reports that it, in connection with Buffalo Bill's grave, had been visited by 100,000 persons. It is the starting point of the National Park-to-Park highway. Most visitors to Denver in the summer time plan to spend a day on Mount Lookout. Many of them stay longer. Denver is the center of a region that is unique as a vacation region. It is possible through the Denver and gateway to the mountains of Colorado, to which nearly the whole collection belongs. The museum is one of the museum is the fact that Johnny Baker is in charge of it. Johnny Baker is the famous boy marksman who exhibited with Buffalo Bill's Wild West show; 1901, president of Cody Memorial Association was Buffalo Bill himself. From a financial standpoint Denver Business Men's Association, comprising some 1,500 members, was the principal factor in the Cody Memorial Association was Buffalo Bill himself. From a financial standpoint Denver Business Men's Association, comprising some 1,500 members, was the principal factor in the Cody Memorial Association was Buffalo Bill himself. From a financial standpoint Denver Business Men's Association, comprising some 1,500 members, was the principal factor in the Cody Memorial Association was Buffalo Bill himself.

Eventually a movement to Colonel Cody's memory was started. The Cody Memorial association was organized in 1919, and a subscription list was entered the war and, of course, the movement was practically dropped throughout the country, had to be revived for the time being. It is expected that the association will now resume the project.

**Good Advertising Idea.**

An extension of the business conducted by the Prague people fair is to be undertaken, and the plans have been making a complete tour of Europe. Representatives from the Czechoslovakia, Bulgaria and Jugoslavia, for the purpose of inspecting the plans, such as were exhibited at the Prague fair. Among those who will show products of Czechoslovak industry will be some commodity exported to the Balkans.

The invention of balls is attributed to the Egyptians.

**Woman Gets Verdict.**

Iron River, Mich.—Mrs. Harry Sarthemont of this city has been awarded $4,000 in her suit in circuit court against Harry E. Duff. Duff was received when she was Miss Bertha Duff's dog. The case is expected to be appealed to the Supreme court.

In Missouri are more than 1,200 women who own and operate farms

**Natural.**

"Wonder what makes the bone so hard-boiled lately?"

"Well, they say his mineu keeps him in hot water all the time."—American Legion Weekly.

**That's Why.**

"Mother, why don't the pictures move, angels ever have whiskers?"

"Because men get into heaven with such a close shave, dear."—American Legion Weekly.

**The Kitchen Cabinet**

©, 1915, Western Newspaper Union.

Don't be afraid to experiment with dressings. They will not ask whether you have followed the recipe or not, but will be grateful for the cook who used "originality for assistance" into glorious effort to increase their well being and enjoyment.

**EVERYDAY GOOD THINGS.**

A good custard pie well made and baked in a dessert which it is hard to equal. It is not necessary to use four eggs to a pie nor are three indispensable—two eggs with a tablespoonful of flour added will make a very good custard. If one desires a richer custard, three eggs may be used and almost as much sugar as a custard.

**Custard Pie.**—Beat the eggs with salt, pepper and butter, unless olive oil is used instead of butter, and fold in the egg whites with one-half a teaspoonful of salt. Bake in a hot plutter and let stand ten minutes before removing the mold.

**Tomato Sauce.**—Brown one-fourth of a cup of butter or olive oil, add a spoonful of flour and stir until well mixed. Add a pint of tomato pulp, a pinch of soda, salt and pepper to taste and a little onion finely chopped, a small bit of bay leaf and a few cloves. Simmer five minutes, add a teaspoonful of sugar, strain and serve.

**Brussels.**—Beat one egg until light, add one cupful of milk to the beaten egg and fold in the egg white with one-half a teaspoonful of salt. Bake in a hot buttered gem pan and serve.

**Coffee Custard.**—To three slightly beaten eggs add one-half cupful of sugar, one-fourth of a teaspoonful of salt, one cupful of strong coffee and a scupful of cream. Strain into cups, set in a pan of hot water and bake in a moderate oven until firm. Serve cold.

**Caramel Sauce.**—Melt one-half cupful of sugar in a smooth saucepan, stirring constantly. When melted add a cupful of boiling water and simmer until the sugar is dissolved.

**Corn Pudding.**—Spread a pan with water, then cover with the dry crumbs, roll butter egg light. Fry a slice of onion in butter and brown again. Fill the pan with hot corn, season with butter, salt, pepper and butter, unless olive oil has been used, and add a little pinch of potato. Bake thirty minutes in a moderate oven. Turn out on a hot plat
