Important News Events of the World Summarized

Personal

Rear Admiral Uriel Sebree, U. S. N., retired, at a meeting of Masons in Pacific Beat, died at his home in Coronado, Cal. Admiral Sebree was born in Fayette, Mo., in 1840.

• • •

Representative Lemuel P. Padgett of Tennessee died at his home at Washington. Mr. Padgett, who was warmly chairman of the house naval committee, had been ill at his residence for two months.

• • •

High on Silian Brough mountain, Baddock, Nova Scotia, on a spot selected by himself, Alexander Graham Bell, who invented the telephone and later refused to have one in his house, "because it was such a nuisance," was buried. He died at the age of seventy-five of progressive anaemia.

Washington

Twenty-three officers and directors of two corporations were indicted at Washington by the federal grand jury for alleged misuse of the United States mails in the sale of half a million dollars' worth of stock.

• • •

President Harding at Washington asked the railroads and the miners to end the shop strike and leave the question of necessity to the railroad labor board.

• • •

Shopmen's leaders rejected President Harding's appeal that they return to work and that both sides submit the question of necessity to the railroad labor board at Chicago. The Big Four chiefs were called to Washington by the shopmen for a conference.

• • •

The Mexican government protested to Washington for the killing of two Mexicans and beating of others at the Herrin (Ill.) mine uprising.

• • •

A survey at Washington of the immigration figures for the fiscal year just completed indicates that the 3 per cent limitation law has proven an effective bar to any overwhelming movement of one of any nationality.

• • •

The house of representatives at Washington, Australia, ratified the creation entered into at the recent Washington conference.

• • •

Passing of the administration tariff bill by the senate this month seems to be almost certain as a result of agreements reached separately by Republican and Democratic leaders at Washington.

• • •

Since the dry laws became effective 22 federal prohibition enforcement officers have been killed, according to a statement issued by Prohibition Commissioner Haynes at Washington.

Domestic

Forcing an entrance by picking a lock on an alley door at Mexico, Mo., a yeggman entered the largest department store in the city and escaped with $9,000 in currency.

• • •

James Harris and R. E. Lacey, federal prohibition agents, were shot to death at Kennaster, Wyo. suffering from blood poisoning following a gun battle with bootleggers at Ivanel.

• • •

Chicago street car strike is settled, under an agreement by which the city will have control of the Chicago Surface Lines and a committee representing 15,000 or 241 of the street car men's union.

• • •

With bank deposits of more than $10,000 and property assessed at an equal amount, Judson H. Smith, who is three, is considered a rich man in dead at Falls City, Neb., of starvation.

• • •

Leaving New York on the President Roosevelt of the United States shipping board, more than one hundred members of the American Legion bore a petition to the country who will revisit the battlegrounds in France.

• • •

James M. Herbert, president of the St. Louis Southwestern (Cotton Belt) Railroad, died at Atlanta, Ga., of heart trouble, returning from a baseball game. Death was due to apoplexy.

• • •

Col. J. W. McIntosh of Illinois has been appointed director of finance of the United States shipping board. He was announced at Washington. He leaves the place of H. B. Kimball, resigned.

• • •

Attorney General Brundage at Springfield, Ill., announced that he will prosecute but no forbidding the enforcement of the Volstead act that it cannot prevent a farmer from manufacturing cider for his own table.

• • •

A St. Louis (Mo.) Coupelet says over fifty 81 precincts to be forged from Cook County, Illinois because Senator A. Reed had a fued over the Senatorial seat of 1,700 voters in the fare for the Democratic senatorial nomination.

• • •

A wave of blindness has swept over Buffalo, N. Y., in the street car strike, Dr. Frederick Hoffman, health officer reported. Dr. Hoffman attributed the blindness to the use of substitute gasoline.

• • •

Fire in a Missouri Pacific train at Jefferson City, Mo., destroyed the mail and baggage cars and damaged the engine.

• • •

Property damage estimated at more than $1,000,000 was done in a tornado which struck Hot Springs, S. D., in the early morning hours from the west of the state.

• • •

Mrs. Ada Sherman McInnes, daughter of the late General William T. Sherman, author Jean Kinnaird, applied in the Supreme Court of Illinois for a writ of error to a decree issued in Cook County.

• • •

A coal train running from Pittsburgh to Cleveland, Ohio, on the Pittsburgh & Lake Erie railroad, was fired upon at the Ohio-Pennsylvania boundary line.

• • •

Secession of the Homeland from the Kingdom with its own parliament and government, and a separate financial regime supervised by the allies, is a part of the scheme of protective proposed by the French parliament at Paris.

• • •

Flower Andrews, a life-saver at the Troy Mills beach, near Cedar Rapids, and three of his children, girls, aged three months and seven and ten years, respectively, were drowned while on a picnic.

• • •

Eighteen persons were injured, three perhaps fatally, in the last hours of the street car strike as the result of defying automobilists through Chicago's congested streets.

• • •

With the arrest of six negro here at Chicago it became known that New York Central train No. 6 narrowly escaped destruction when it was derailed at Archer avenue and Twentieth street.

• • •

One officer and a striker were killed and the sheriff of Will county was seriously injured as state troops were rushed to the scene of the latest railroad strike flaring at Joliet, Ill.

• • •

The Sibley Fire Trust and Savings bank, Sibley, Iowa, closed its doors on orders of the state banking department. It is capitalized at $15,000 and the last report showed a surplus of $5,000.

• • •

In the most destructive fire in the history of Provo, Neb., flames destroyed half a block of buildings with a loss of $100,000. The fire started in the plant of the Farmers' Grain and Coal company.

• • •

Malcolm D. Farr, assemblyman from Kenosha county, was adjudged insane in the Kenosha (Wis.) county court and committed to the Northern Hospital for the Insane, at Winnebago.

• • •

The management of the Tennessee, Alabama & Georgia railroad announced at Chattanooga, Tenn., that gasoline propelled cars would be placed in service on the system.

• • •

Mrs. Edward Garrity, thirty-five, mother of two children less than ten years old, met death at her home at Morris, Ill., due to the accidental discharge of a revolver.

• • •

One hundred cartloads of Yakima (Wash.) valley lambs, representing twenty flocks, will be shipped to Chicago. Nearly all important sheep men of the valley will be represented in the shipment.

• • •

A report by Auditor General C. B. Fuller at Lansing, Mich., shows that during the last fiscal year $29,000,000 was paid in bonuses to veterans of the World war who entered the service from Michigan.

• • •

Passenger and freight traffic on the Canadian Pacific railroad is being held up at Brittion, Ont., by a "sellout" shower of 30,000,000 cubic feet of gas and 50 barrels of oil an hour.

• • •

Since the coal strike began the Erie railroad has been losing money at the rate of $1,000,000 a month, its regional manager, A. J. Mantell, told the public utility commission at Newark, N. J.

• • •

Henry Ford, the Detroit automobile manufacturer, paid a $50 fine as a penalty for violating the speed ordinance when passing through Leroy, N. Y., in his large touring car.

• • •

A Cleveland (O.) dispatch says a few small Great Lakes steamers were laid up on account of the fair, shortage of which some small carriers will have to be laid up soon as the supply of lumber coal is low at all lake ports.

Foreign

Casualties in the typhoon and tidal wave which struck Japan on Sept. 1 were 2,500 miles along the Hongkong-Yokohama route, it is learned.

• • •

The thirteenth inter-allied conference since the signing of the Versailles was signed opened at London with every possibility that it would decide the fate of Europe.

• • •

The Chinese city of Suatow has been devastated by a typhoon with a heavy loss of life, says a London dispatch quoting the Exchange Telegraph correspondent. Swatow has a population of 40,000 and is a treaty port.

• • •

Avalanches of snow and rock started at Bertin in the wake of the latest earthquake and are a menace to many of the clothing stores, appearing over the broad new outfits of German clothing.

• • •

The newspaper Der Tag at Berlin, the Nationalist organ, in the last issue of the week, the government has been obliged to resume the purchase of foreign currency for the payment of grain.

• • •

The exchange rate on the crown reached 54,000 to the dollar at Vienna, the financial leaders are in consultation in conference with representatives of industry, finance and labor to devise a means of averting breakdown.

• • •

Arch Orthodoxes and Reginald Dunn, under secretary of state for the dominions of Northern Ireland and Sir Marshal Wilson, will be hanged on the 22nd, according to a Belfast dispatch.

• • •

Semi-official advices from Korea quote refugees arriving there from Siberia as reporting the spread of typhoid raging in the portion of White Russia which is under Polish occupation.

• • •

Captain Dunsmuir, who was courtmartialed for retention, was shot at Gibraltar, according to a Madrid dispatch.

• • •

A fund of silver in the barren lands northeast of Fitzgerald, Alta., has been found, according to a report made by a prospector in the district.

• • •

Berlin is sending a note to France announcing that it is impossible for the country to accept the latest indemnity demands of the French.

• • •

Two persons were killed and seven injured when a Paris-Lyons train collided between Gastelli and communists at Lyons in connection with the general strike, according to the latest reports received at Rome.

• • •

Separation of the Rhineland from Germany with its own parliament and government, and a separate financial regime supervised by the allies, is a part of the scheme of protective proposed by the French parliament at Paris.

Botanic Garden Must Be Moved

Congress Discovers It's New Site

By JOHN DICKINSON SHERMAN

UNCLE SAM'S apparently going way off the grass. Just like anybody else. Which is to say, that Congress and stuck his Botanic Garden on the Mall where it didn't belong and now he must take it away and put it somewhere else. Now the Mall is to be used for the purposes for which it was originally intended. Namely, location of Grant Memorial on part of the grounds occupied by the Botanic Garden is proof that Congress means business and that some more new line drives will be forever in pickets out.

Besides, the Botanic Garden is a cheap affair, relatively speaking. Several American cities have finer, larger and better gardens, and anyone with such shows as the Royal Botanic Gardens of Kew and Edinburgh, gardens of Glasgow, Glasgow and Rio de Janeiro—why, Washington simply isn't in it.

Congress is considering the various aspects of the Botanic Garden question.

The public facilities of the present garden will be transferred from the west side of the Capitol to the north side and that a new botanic garden and arboretum on an adequate scale will be established not far from the Capitol.

Senate resolution 165, affecting the acquisition of a site, is now before the committee on the library. The fine arts commission, of which Lieut. Col. Clarence O. Sherrill, Corps of Engineers, is secretary and executive officer, has made a report on the Botanic Garden. Following are some of its points made in this report:

The present Botanic Garden was begun about 1820 under congressional permission granted to the Columbian Institute for the Promotion of Arts and Sciences, which went out of existence in 1837. Then in the years 1838-1842 the Wilkes surveying and exploring expedition of six government ships to the South Seas, collected a large assortment of horticultural and botanical specimens. These formed the nucleus of the present garden. The total expenditures on the garden from 1842 to date, including the original appropriation for the expedition, amount to about $1,000,000. It appears that the garden has always been run economically as a department of agriculture.

By way of comparison, our Botanic Garden receipts less than 13 acres, while the famous Kew Gardens contain 288 acres and are supplemented with twenty-four out botanical gardens of the British Empire. Berlin has 1,825 acres in its botanic garden, which was established at a cost of $2,000,000.

The location problem may be stated thus:

For reasons that will appear, the Botanic Garden must be removed from its present location. Therefore, when it leaved the Grant Memorial in the garden area, forced the garden out. Such was the intention of Congress. The action of Congress July 1 g.c.m. That space was designed by President Washington and L'Enfant as a site for a monument to the Capitol, and is so shown on the original plan of the city. It was proposed at that time that this area should be subject to ornamental treatment, but apparently this was not the idea, but not shut off by walls and fences, making the Botanic Garden in His view was one of those serious mistakes made in the early part of the century whereby the greater part of the Nation's Capital suffered damage that was considered to this day. The location of the Grant Memorial was the first step toward repairing this damage. The subsequent location of the Lincoln Memorial in the same area is a further advance in the restoration of the original plan.

In furtherance of its purpose to restore the Mall to its original status as a park connection between the legislative and executive departments, Congress paid the Pennsylvania Railroad $1,500,000 to remove its tracks from the Mall. The public spaces or squares on the west front of the Capitol grounds is a feature of this large plan. The New National Museum Building, the Agriculture Department buildings, and the gallery for the Freer collection have been located with reference to the general plan. Slowly, but steadily, changes are being made in accordance with the plan. The riot out throughout the entire 274 acres from the Capitol to the Lincoln Memorial is necessary for removal of the Botanic Garden is connected to the development of the great composition.

If Congress desires to continue a garden for the purposes of obtaining plants for the Botanic Garden and for growing shrubs to decorate through the country, a location in the Potomac park system would be satisfactory. Such a garden would be conveniently accessible to the Capitol and to the White House and Congress. The present Botanic Garden site is seen by an insignificant fraction of visitors or residents. The removal of the garden features from the west side of the Capitol to the north side simply makes such features more available.

RADIO

VACUUM TUBE WHEN USED AS AMPLIFIER

It Will Function Thus for Either Radio Frequency or Audio Frequency.

Starting today we shall give a detailed description of the various tube when used as an amplifier. This series, as in the past, is continuous and if clipped out and saved will be complete for reference.

When the three-electrode vacuum tube was used as a detector, the circuits associated with it were such that where a symmetrical alternating difference was applied to the grid, a symmetrical change in plate current resulted. That is to say, the vacuum tube acted as a rectifier. In addition to rectifying, the tube also amplified. That variation in plate circuit was "K," where "K" is the amplification constant of the tube. Since at that time we have been in a rectelectrode tube, for the same potential impressed on the grid.

By properly adjusting the electrical constants of the circuits associated with a three-electrode tube, symmetrical changes in grid potential can be made to produce symmetrical variations in plate current. For example, suppose the amplitude of the plate circuit variation is equal to the grid potential. That means that the tube would be operating on a straight line portion of the characteristic curve, symmetrical changes in grid potential will cause symmetrical changes in plate current. Since the plate current variation is equal to the grid potential, the voltage amplification constant of the tube would be unity. In practice amplifiers for receiving sets used to pick radiophone stations have a voltage amplification constant of between 8 and 10. Obviously, then, the tube must be biased to a point where the grid potential is not equal to the plate current variation. Such a condition can be obtained by the use of the grid battery. The value of the battery depends upon the characteristic curve of the tube. Generally speaking, the negative grid potential would be louder without the use of the amplifier
