BIG HAPPENINGS OF THE WEEK CUT TO LAST ANALYSIS.

DOMESTIC AND FOREIGN ITEMS

Kernels Culled From Events of Moment in All Parts of the World—Important Affairs Touching People Everywhere.

Washington

President Harding at Washington signed the Mellon bill appropriating $500,000 to act up a new bureau in the Department of Justice to direct prosecution of war contract grafters and profiteers.

Reduction in freight rates averaging about 10 per cent was ordered by the interstate commerce commission at Washington, to become effective from its inquiry into the general railroad structure of the country.

Domestic

Wages of 400,000 maintenance of way railway employes are cut from 1 to 5 cents an hour beginning July 1, according to a decision announced by the railroad labor board at Chicago. The slash will mean an annual saving of approximately $60,000,000 on pay rolls.

Miss Anthony Hunnes, once famous as a model and said to be the possessor of the perfect female form, attempted to commit suicide at her home near Syracuse, N. Y.

E. H. Hunt, in an address to the Iron and Steel Institute at New York, advocated taking the tariff out of politics, in against a soldier bonus at present, and would substitute a scale for income tax.

Eleven miners were killed in an explosion in Jasper No. 3 mine of the Alabama Fuel and Iron company, St. Clair county, according to reports received at the Birmingham (Ala.) station.

Felix Jonquiéré, proprietor of a Chicago drug store, was shot and killed by a lone bandit, who held him up at Forty-seventh street and Hermitage avenue.

A telephone report received at Hampton, Ia., says that powder mill packing houses were blown up at Sumnerburg. Five men were reported blown to pieces.

The steamer Klondike was sunk in an ice jam at Mare City, Yukon Territory. She lies in shallow water and probably can be raised.

Babe Ruth, home run king, was fined $200, removed as captain of the New York baseball team and suspended indefinitely by Ban Johnson, president of the American league baseball club.

Victor L. Berger, the former Wisconsin congressman, who was convicted of violating espionage laws, appeared before the board of review at Washington, which is considering the application for pardon filed by Berger and his associates. The city is full of soldiers.

One man was killed when two fires of unexplained origin did the "rotting million" of the Lumber Dealers' company at East Alton, Ill. G. Hess, the only man in the mill, was blown to shreds.

Next year's general assembly of Presbyterians in the United States of America will be held at Indianapolis, it was decided by the moderators at Los Angeles, in session.

Charles Wellington, motion picture actor, was killed when his car struck a derrick in Lincoln, was crushed to death. Another derrick collapsed at Los Angeles, killing Mr. Liddell on grounds of insolvency.

An electric transmission line over the Virginia Power company was organized in Fayette county, closing down eight mines as a result, according to superintendent James C. Smith at Charleston, W. Va.

One bandit was killed, another injured and the $12,000 currency put out of the treasurer's messenger's hands recovered after a holdup by four men and a third bandit at the Bank of Bridgeport, Conn.

Charles H. Hall of Chicago, former American minister to China, has been appointed by a French military court in Indochina to act as counsel for the defense of Paul Outrey, held under a French charge of espionage, in a dispatch from Paris.

Two men were killed and four injured when a motor truck struck a bulletin of a grade crossing in North Bergen, N. J.

Merchandise valued at thousands of dollars was stolen from a north-bound Erie Marquette freight train near Cleveland, O., in a daring daylight robbery.

The board of education at Lansing, Mich., by a vote of 5 to 3, against the placing of the Germans language back in the high school curriculum.

George Elmer Monroe, eighteen, of Camden, N. J., confessed to Prosecutor Wolverton that he had kidnaped and murdered Ida Kramer, seven years old.

Mrs. Lina Bernetti-Alatri, and her daughter, Dorothy, thirty-two, were injured when a bomb they were examining exploded in the parlor of a speaking tour of Italy, it was announced at Washington.

Carl E. Ahrley, famous hunter and animal trainer, was killed by a lion at Oneonta, Dunerton, it alleged.

Charles Grabenbrock and his wife, Laura, were found dead in their home at St. Louis. Police theory is that Grabenbrock was slain by his wife, who then took her own life by inhaling gas.

Mrs. Marion McGlory was granted a decree of divorce at Phoenix, Ariz., from George B. McGlory, secretary of the interstate commerce commission at Washington. She alleged cruelty.

Memorials opposing enactment of Senator Sims' bonus" addressed to President Harding, were adopted unanimously by the world conference of the Seventh-Day Adventists' church at San Francisco.

Fire destroyed the sawmill of the Stevens Lumber company at Rhinelander, Wis. The mill, one of the largest and most modern in the Northwest, was valued at $75,000 and was partly insured.

Miss Ignacia Vasquez, said to be one hundred and twenty years old, died at Santa Ana, Cala. She was six feet tall and in life youth was noted for her beauty and physique.

Still yearning for stronger tobacco as she might fully enjoy her pipe, Mrs. Nancy Long, aged one hundred, died at the home of her daughter, Mrs. William Fisher, at Whitehall, Ill. She was born in Tennessee.

San Antonio (Tex.) dispatch says two Mexican rebel leaders, ex-Mayor Nicasio Vasquez and Tomas de Espinosa, have been executed and executed by forces under command of Gen. Manuel Arrieta.

A Dawson City (T. T.) dispatch by aero navigation is to be full swing on the Yukon river and its tributaries. There is now at the mouth of the Yukon 1,400 in Lake Labarge.

Two unidentified men, both about twenty-five, were killed near Albany, N. Y., by an automobile in which they were stealing a ride on top of a Delaware & Hudson freight train.

Three enlisted men were killed and three men and one officer wounded by the fall of airplanes in the air service of the United States army, it was announced yesterday by the war department.

Personal

Lieut. Gen. Robert Wallace, of N. S., retired, died at Caldwell, N. J. He had forty-two years of civil and military service.

E. H. Harriman, president of the Iron and Steel Institute at New York, advocated taking the tariff out of politics in against a soldier bonus at present, and would substitute a scale for income tax.

Eleven soldiers were killed in an explosion at Jasper No. 3 mine of the Alabama Fuel and Iron company, St. Clair county, according to reports received at the Birmingham (Ala.) station.

Felix Jonquiéré, proprietor of a Chicago drug store, was shot and killed by a lone bandit, who held him up at Forty-seventh street and Hermitage avenue.

A telephone report received at Hampton, Ia., says that powder mill packing houses were blown up at Sumnerburg. Five men were reported blown to pieces.

The steamer Klondike was sunk in an ice jam at Mare City, Yukon Territory. She lies in shallow water and probably can be raised.

Babe Ruth, home run king, was fined $200, removed as captain of the New York baseball team and suspended indefinitely by Ban Johnson, president of the American league baseball club.

Foreign

A detachment of 327 men and seven officers of the United States army left for the United States Friday.

Alexander Kerensky, former Bolshevist premier, confirms at Paris, Berlin and Rome, was interviewed at Sofia. The political situation here is unchanged, but there is no fear of communist revolution.

The little village of Leetherfield, Yorkshire, 16 miles southeast of Hertoe, was wrecked by the explosion of a munitions dump. Every house was destroyed or damaged by the blast.

Fifty persons were killed and more than 100 injured when a munitions depot boiler exploded at Boston Arms. The explosion was the [illegible] person thoughly [illegible].

Four violent earthquakes occurred in the vicinity of Lima, Peru, the first miles north of Rome, causing terror to the inhabitants of the city of several million.

Belfast is an armed camp. Barricades are being erected in the streets and machine guns are being stored in the principal strategic points. The city is full of soldiers.

Pope Pius celebrated mass in the Sistine chapel in the presence of thousands of pilgrims attending the international congress of Catholic students. Delegates visited the catacombs at St. Calixtus.

A German dispatch says the body of Miss Edith Cavell, who has been buried in a Belgian cemetery, has been removed to the interior of the country because of pilgrimages. Hundreds of persons registered, 90 degrees Fahrenheit. Roses and glaciers are nothing rapidly.

Fighting was again renewed in Belfast when shipyard workers on their way home from work were attacked by a mob in the center of the city. Two cars were bombed, resulting in the death of one man.

Five Italians were reported to have been killed and many wounded when a band of Italian nationalists' organized by Italian troops attacked a new settlement of Germans at Bozzen.

Scores of royal guards and fascisti were wounded in a street battle in the crowded San Lorenzo quarter of Rome.

The war office at Tokyo reported gigantic removal of the warfare Red forces have been waging on the Japanese expeditionary forces in Siberia.

Wilfred Carse, a British officer, an accomplished swordsman of polite at Cairo, Egypt, was shot and killed when returning home from a fencing match.

Two persons are known to have been killed and at least sixty injured in an explosion at a munitions factory at Blanson, near Vienna.

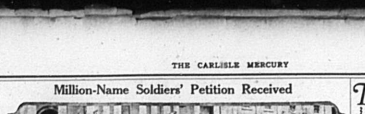
Prime Minister Lloyd George won a big vote of confidence in the commons when a motion censuring him for the Chanak policy was defeated by a vote of 439 to 116.

The German battleship Hanover and the submarine S-18 collided during night maneuvers near Sonderburg. Two sailors on the submarine were killed.

Mrs. W. T. Blake and six other passengers escaped from Cuttenden, England, on their Bristol-Cairo airplane flight unscathed.

Leonard Wood, governor-general of the Philippines, is now after being missing 36 hours in the jungle Apo, Mindanao, according to reports received at Manila, P. I.

Million-Name Soldiers' Petition Received



The million-name soldiers' bonus petition arriving at the capitol, where it was accepted by Senator Hiram W. Johnson as chairman of the senate reception committee. The huge roll of names was presented to congress by Capt. Samuel H. Jacobson, district commander of the Veterans of Foreign Wars.

Forgers Reap Huge Harvest

Take Annual Levy of $30,000,000 From Careless Check Writers in United States.

IS ARISTOCRAT OF CRIMINALS

Introduction of Modern Protective Measures Only Hampered Crook's Plans for Time—Safety Paper Is Best Protection.

New York—Forgers and petmen are exacting a toll of between $30,000,000 and $35,000,000 a year from the people of the country because of the careless manner in which checks and drafts are written and handled, according to Burgess Smith, an inspector of technical work in the United States bureau of engraving, writing in American Industries, the magazine of the National Association of Manufacturers.

Backed by scientific inventions in check protecting devices and a check paper that defies even the cleverest forgers are now telling no tales to the police, according to Smith, by which checks which are not safeguarded. These depredations are because an extensive, if writer says that authorities do not make public any more the amount of losses being sustained.

"Ninety-five per cent of the business of the nation is done by check and draft," says the writer. "During the last year a total of approximately 20,000,000,000 in checks and drafts passed through the clearing houses of the nation, based on a five per cent currency issue in circulation of about $3,000,000,000. In other words, checks and drafts in circulation constantly exceed currency and bullion at the rate of eighty to one.

"It is only natural, therefore, that the most astute minds of the criminal world should turn their attention toward a form of crime which yields great profits with little chance of detection and conviction—all because of the inane carelessness of individuals."

Grew With Use of Checks.

During the rapid development of the use of credit instruments the world over, particularly within recent years, the writer declares, the forger's trade have increased with the development of checks and drafts.

"The idea of the bank check is as old as Egypt," the writer says, "but it was only a half century ago that the word 'check' meant little or a thing in the daily life of the average man or man business man. Such a thing as a check or traveler's check was never thought of. Where today the losses from forgery are increasing at the rate of $1,000,000 annually, with more than 50,000 forgeries reported in the last year's figures, the total annual toll thirty years ago was only $1,000,000.

"The methods employed by the forger embrace a cunning and skill that is seldom found in other forms of crime. The forger and passer is the aristocrat of the underworld. He is one of the 'higher-ups' in an organization that is conducted in a most business-like way. First, there is the banker, who backs the gang with his wealth and who usually has associated with him an expert criminal lawyer. Then there is the forger himself, who lives in some secluded out-of-the-way spot, where he has his laboratory. There, with pens and inks and acids and blotters strewn about him, he sits and traces signatures or obliterates writing with such a high degree of delicacy and perfection that even banking experts are deceived. Since the forger is the brains of the organization, he must be accorded the greatest possible protection. Consequently, there are the 'go-betweens' who pass the checks and drafts for the bosses and promoters to put down the forged checks. These men never come in contact with the forger, and the result is that the arrest of subordinates seldom leads to his conviction.

"And" Vulnerable Point.

"Before the introduction of modern protective precautions, forgery and alteration had become so simple that a lad almost could bring called an art. To raise a check from eight to eight hundred dollars was the easiest thing to do was to add a '2' to the '8' and another zero to the remainder. To raise six to sixty, seven to seventy or so on was just as easy, only it was to change five to fifty or to tack some other word to fifty, and 'one' to 'one hundred' was simple. The word 'and' was the most vulnerable point in the entire check, since the paper line ahead of it usually was left blank to prevent forgeries by writing those before it.

"For many years the forger had it the greatest for the designer of check writing machines. Each new device for the amount in colors and at the same time made the writing on the paper with indelible ink. The introduction of these devices only hampered the crook's plans, however, for he could still, with the aid of his acids, erase the paper line and substitute for names the words 'cash' or 'bearer' and, likewise, he could change the number and date of checks.

"To meet this new move of the crooks the check writing machine manufacturers have devised a machine that could not be erased or altered in any way. Each machine was numbered and sold by a gradual evolution which led to the present day machine, which not only writes the amount in words and figures, but also produces a safety paper which has defied the cleverest forgers of the criminal. Thus, the check writing machine companies have forced the check users who today employ the most modern protection to be practically forded—the modern writing machine, as well as the safety paper, which is the reason for that their checks will not be altered."

How to Be Doubly Safe.

To make checks absolutely safe Smith suggests the following measures:

1. Write your checks on paper that

"In life worth living! Yes, so long as there is wrong to right—
So long as faith with freedom reigns
And loyalty to truth is held
As precious as our gains.
To heaven lonely lives
And men are true to think and act,
True life is worth living still."

EVERYDAY GOOD THINGS

The keynote to success in cookery is accurate measurement and systematic

utensils. A measuring cup may look all right, but may vary from one or three tablespoonfuls. This is often true of the dash cup as a heavy bottom deceives the eye. There is no such thing as luck in cookery. Accurate measuring and careful following of a receipt will bring good results. All measurement is most food books today are level and uniform. Heaping and rounding measures are not considered accurate and are not followed.

Reliable Prune Cake.—Take one cupful of boiled sweetened prunes. Chop coffee, of sugar, one-half cupful of shortening, one cupful of sour cream, powdered, of cloves, one teaspoonful of vanilla, one teaspoonful of soda, one cupful of flour, add two cupfuls of milk, one tablespoonful of butter and the yolks of three beaten eggs, and fold in the whites of the eggs beaten stiff. Pour into a buttered pan and bake in a slow oven for nearly an hour. Ice with boiled icing.

Mock Chop Suey.—Cook one half pound of lean pork in a small amount until nearly done. Brown one pint of onions in one tablespoonful of butter. Season with salt, pepper and one teaspoonful of soy sauce. Add the pork, one pint of celery cut in small pieces, one cupful of mushrooms, one cupful of bamboo sprouts, one cupful of water chestnuts, one cupful of bean sprouts and one pound of [illegible]. Cook slowly for one hour, adding more water if necessary. Thicken with one tablespoonful of cornstarch mixed with a little cold water. Serve with boiled rice.

Dissolving Salt Raises Snip.

Norfolk, Va., Capt. L. F. Power of the schooner Cumberland Queen and his mate are to be dead on the wing of the ship, arrived in Norfolk one day last week. The vessel, which sailed twice, finally sank. Power said, in the log, that the vessel was leaking and were taken to Charleston. Then the pump with which the vessel was equipped broke, and the crew manned the bucket. The vessel sank when the bucket brings home so much salt that it dissolved.

Mrs. White Took a Tip From Noah

Profiteer in Leeches as Demand Revives

Paris—Whoever you had a headache or a pain in the side or back, they put leeches on you the nasty slimy things that get in your way as you walk through your garden after a rain. Well, contemporaneous Pepys used to get "blood to the head" in common parlance, a turbulence with "three bottle brandy" of the period—which would be hurriedly sent for.

For now reason impossible to fathom there has been an increased demand for leeches in Paris in the last few months. Fifty years ago leeches cost 20 francs per 1,000, but they are now quoted at 100 francs per 1,000.

Doctoring has now set in leech dealers are springing up here and there and the price per thousand has gone up to 300 francs.

AUTO FEVER HITS MEXICO CITY

Motor Show Booms Parity Due to Revolution Joy Riding—American Cars Lead.

Mexico City, Mex.—The automobile show is continuing to hold the interest of the public and merchants carry premium. The exposition is being held in the lobby and foyers of the unfinished National theater, the main auditorium having been turned over to the [illegible] for the duration of the show.

Practically all the cars are being sold by the local dealers, and the sales are running into the hundreds. The exposition is being held under the auspices of the Mexican Automobile association, of which Alberto Mascarenas is president.

The remarkable growth in the importation of automobiles and European cars in recent years has been a source of wonder to many. During the revolution there were but few automobiles in the country, the gas gauge, the lead line roads were in fairly good condition. In 1913 the only cars to be seen were a few European models, the property of a few rich foreigners.

Fears to Catch Rats.

Albuquerque, N. M.—The rat may be a pest, but he is not to be caught in a sticky paper. Plans to "tanglefoot" rodents are being worked out here by the biological survey bureau. Experiments have been made with the pests with "rat glue." The rats, when they step in the sticky glue, are held so fast as if they were trapped.

Tip for the Modest Miss.

This is a most unpretentious model age, but if there are only young ladies in Boston who hesitate to ask for a certain article outright, these young ladies might follow the example of the Athens girl who said to the store clerk: "I want a set of elastic square cut cupolas of being elongated and attached at pleasure, such as are worn by the feminine portion of mankind on their locomotive members to keep it proper position and at the required distance subdivisions of the thin."—Boston Transcript.

Famous Tree, 800 Years Old, Shows Signs of Wear

Mexico City.—The "great tree of Tule," in the Santa Maria de Tule, state of Oaxaca, after 800 years, is beginning to show signs of wear. This giant cypress, from a trunk as huge it is said as the person with outstretched arms can not encircle it, would have been a fair-sized tree when Columbus discovered America.

History also records that Cortes and his Spanish soldiers kept beneath its branches four centuries ago en route to Montezuma following their conquest of Mexico.

There is no immediate cause for worry, however, that Tule, as Indians call the tree, will wither away before the present generation has passed on. And even if it should, Tule has a son now fifty yards away that is showing signs of maintaining the family honor. Both trees are already so large 12 persons are needed to encircle the trunk of a couple of hundred years of age. The branches of the [illegible] of its branches is almost 150 feet.

Deaf Mute Gives Signs for Prayer

Albuquerque, N. M.—Deaf mutes in this city are to be dead to the world of sound, but they are not dead to the world of prayer. Rev. Father Dominic Pious, a priest of the Roman Catholic church, has learned the sign language of the deaf mutes and has organized a class among them. Father Dominic has been engaged in making imitation pearls from the waste of fish scales. He is said to have made some fine specimens of pearls.

This new and novel enterprise is attracting considerable attention. The fishermen are being paid 10 cents a pound for fish scales.

SILK AND WOOL BLEND NEW

Combination Fabric One of Developments of Season.

One-Piece Mixture Frock Assured of Success Because of Smartness and Splendid Value.

The most fascinating things are being done in the world of knitted outerwear. The place long held by sweaters, though not entirely usurped perhaps, has been materially crowded by the advent of capes, frocks and silk owers of rather elaborate and unusual design. A blending of silk and wool is one of the big developments of the new season, if not in the weaves, at least in the makeup of the garments. One manufacturer is concentrating on this mixture just now. One of their many models is made of very shoot mohair that carries a border of silk about the hem and makes the collar and cuffs. This is one of the Fifth Ave. types, and has been carried out most effectively in contrasting color schemes of rose and gray, with the silk embroidered with silk and worked out in conventional design through the use of the slipcover. It is novel this season and gives a decorative effect achieved by contrasting colorings.

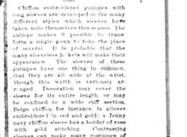
The one piece frock of silk and wool mixture is assured of success because of its smartness and splendid value. The waist and skirt of this dress are in one piece. Interwoven, the former a striped design, the latter a block, making a contrast that adds the effect. These stripes and blocks resemble the weaves of a Navajo blanket. A little Peter Pan collar gives a nice finish, while a flesh color ribbon is run through barbaric wooden beads.

FROCK FOR THE AFTERNOON

LEMON YELLOW VOILE DRESS

MORE SERVICE FROM FROCKS

Gumpe Makes It Possible to Transform Single Gown to Take the Place of Many.



A dainty sewing frock for the children is of flowered crepe de chine with embroidered in white and affording color contrast through barbaric wooden beads.

By the many clever versions on the market of the Gumpe, the wearer of this figure is strips or crossbar pattern can have a number of gowns with all appliances, such buttons, of course, that can be worn with each and [illegible] of some ornamental nature. A fine example of the Gumpe is shown in the same material completes a costume that is of the most practical kind.

HELPFUL QUESTIONS

To the small town or country house wife who has not easy access to a

well-stocked shirt kept filled with the latest in dress goods and trimmings, the following questions may be helpful:

A few cans of fish, such as salmon and tuna, should be kept on hand. Also some jars of sliced dried beef, such as is sold in glass jars. Add to these combinations, with a bottle of good salad dressing, which may be made ready for the addition of cream, a tea or jar of olives and a can of corn. These things will be most commonly used, and for the occasional dish that calls for a little more variety a can of tomato soup made in a hurry from a can of tomato soup and milk, or a can of mushrooms in milk. This will not cost much and will easily, and one may literally cook properly with little difficulty.

When looking over the list for a filler-up, take it on the bottom of the pad, leaving it lightly with a fork; this keeps the crust from blistering.

Some housekeepers make the bread on the sewing machine and prove the material as it is drawn through the binder.

Meant What He Said.

"Brokelegh—I would do anything it my power to please you, dear, but I'm not a magician.

Miss Fortune—Would you suppose so?

Brokelegh—My dear sir, I said my thing in my power."

Her Fix.

"It's a frivolous age."

"I'm afraid it is," I married a flapper. My daughter followed suit and I'm now a grandmother at 35."

Tip for the Modest Miss.

Mrs. Harold Maxwell

BLOOMERS FOR THE CHILDREN

Wide Knee Garment Favored for Warm Weather Wear; They Are Easily Made.

The manderin influence on styles, noted in many of the spring suits for grown-ups, is also reflected in the separation for a child's novel frock, illustrated above. The blouse is a mere chemisette and sateen could be used for this part of the garment. The tucked signed Chinese [illegible] skirt was embroidered in a design of Chinese [illegible] bloomers, which are the latest thing in the way of bloomer line and with the [illegible] of the chemisette, with a bottle of good salad dressing, which may be made ready for the addition of cream, a tea or jar of olives and a can of corn. These things will be most commonly used, and for the occasional dish that calls for a little more variety a can of tomato soup made in a hurry from a can of tomato soup and milk, or a can of mushrooms in milk. FABRICS NOW ARE SELF-TRIMMING

Variety of Gardener Materials Solves Buttercup Problems in Making Spring Frocks.

The greatest possible variety of bordered materials appears in shops this spring, and the fashion is a boon to the home dressmaker who is about to make a frock. Even with conventional crepe de chine and taffeta, there have been a fair-sized crop when Columbus discovered America.

History also records that Cortes and his Spanish soldiers kept beneath its branches four centuries ago en route to Montezuma following their conquest of Mexico.

There is no immediate cause for worry, however, that Tule, as Indians call the tree, will wither away before the present generation has passed on. RADIO

CRYSTAL DETECTOR EASY TO CONSTRUCT

Telephone Condenser and Receivers Can Better Be Purchased—Mounting the Set.

The material needed to construct a simple crystal detector is as follows:

Piece of silicon or galena mounted in a metal button, 25 cents.

Two binding posts, 20 cents.

A block of shellacked or stained wood 3 by 3½ inches.

A thin strip of sheet copper or brass ¼ inches wide by two inches long.

Mount the two binding posts on the block of wood as shown, fastening under one binding post a strip of copper or brass—one sketch—and under the other binding post a coiled up spring from an old telephone receiver. Fasten by placing the button of metal containing the silicon or galena in the spring as shown in the sketch. Be sure that the button is held firmly in the spring, so that it will not work loose.

HOW TO LISTEN IN

There are two articles in our radio that may require a slight adjustment when it is decided to listen-in; first, the detector, and second, the adjustment on the tuner. Once the slider position has been determined for any given steam-time station, it is only necessary to slide your detector to pick up that same station again.

To operate the receiver first connect the wire to the aerial and ground. Then adjust the detector until the buzzing sound is heard in the receiver. Then move the slider on the tuning coil until the signals are heard with the greatest strength. Sometimes it is necessary to change the position of the detector slightly to get the best results.

The Crystal Detector.

Set Mounted on Base, With Connections Shown.

Then adjust the detector by changing the position on the spring until the best results are obtained. Nothing is said in this article about a receiver or an appropriate aerial. Nevertheless, if you desire to be restored and preserved as a "perpetual national memorial shrine as the birthplace of [illegible]," all would seem to be well and good. Nothing is said in this article about a receiver or an appropriate aerial. Nevertheless, if you desire to be restored and preserved as a "perpetual national memorial shrine as the birthplace of [illegible]," all would seem to be well and good.

Nothing is said in the bill about a museum or appropriate relics. Nevertheless, if Fort McHenry is to be restored and preserved as a "perpetual national memorial shrine as the birthplace of [illegible]," all would seem to be well and good.

Over the land of the free and the home of the brave!

Fort McHenry will forever be restored and preserved as a national park and perpetual memorial shrine as the birthplace of [illegible]," all would seem to be well and good. Nothing is said in this article about a receiver or an appropriate aerial. Nevertheless, if you desire to be restored and preserved as a "perpetual national memorial shrine as the birthplace of [illegible]," all would seem to be well and good.

Nothing is said in the bill about a museum or appropriate relics. Nevertheless, if Fort McHenry is
