IN MEMORY

"The death angel visited our home and claimed from us our darling little baby, Everett Woodrow Mitchell, aged 8 months.

It was on the 29th of January

The rain was falling fast,
I knelt beside you, Woodrow,
I saw you breathe your last
I held my face down lovingly
Against your cold damp cheek
I begged my dear Jesus
To let little Woodrow live
Oh, your little buggy is empty
Your little smiles and curls we hear no more
I know the angels were mourning
Around the babe they came to take
Oh, the sorrow in our hearts
No human tongue can tell
Why God that God has stricken us
For loving ever too well
We will meet our baby in heaven
When life's voyage here is over
Therefore will meet us
At the harbor of heavenly shore.
—Mother and Father.

WALLACE REID'S FATE
(Louisville Times)

Wallace Reid was athletic but not muscle bound. He was clever but nervous. He sought to keep the high tentacles of the favorite fame he had won. He was a fine actor, but he tried and his wife cries out against too close traffic. Her cry was small, for it is against the most powerful agency of publicity in the world.

Crusades against the sale of narcotics in violation of the Harrison Act were started, and a few Hollywood petty peddlers are arrested and fined. But the traffic waxes strong. There are enormous profits in the trade and the grievance is too strong for redress by ordinary police methods.

Friendship in the affairs of organized evasion should be more potent, and it should be applied at first hand. Reasons are most susceptible to the influence of hearing the voice of a friend, as a pharmacist, knew about the properties of the narcotics peddled, but he was under the impression that he could not be arrested for their use. Had he been taught in childhood to watch for such drugs, the temptation he might be under would be less.

For those who would break away from opiates there are almost insuperable barriers. It is not enough that a state moralist puts to be suffering. This added to the nervous strain of a taker for patent liquors.

The cure game is practically unknown. Only a few of the rich people may be able to hold more to escape. For the rest there is nothing to do. The only way out is to prefer to live. The law of the land is against it. This reference becomes negligible in the case where the victim has been interned in normal existence.

If these things were more generally known there would be fewer customers for the dope agents. It must be possible in time to suppress a traffic which now seems almost international law. Meanwhile it is largely a matter of individual responsibility.
