Washington, D. C., Sept. 15.—The Federal Council of Churches of Christ in America today reported a record increase in membership of 126,428 members in the United States during the year ending June 30, 1925.

The present membership of the Federal Council of Churches is 1,264,287. This is an increase of 12.6 per cent over the membership of 1,137,859 reported in 1924.

The report shows that the growth of the church has been rapid in every part of the country. The largest increase was in the South, where the membership increased by 18 per cent.

The report also shows that the church has been successful in attracting new members from all social classes. The increase was largest among the middle and upper classes.

The report is the first of a series of reports to be published by the Federal Council of Churches. The next report will be published in 1926.

The report is a valuable contribution to the study of the growth of the church in the United States. It shows that the church is still a vital and growing force in American society.
