WILL EXTEND LINES TO NEAR BY TOWNS

(Maysville Ledger.)

In Flemingsburg Monday morning the directors and stockholders of the M. & F. Light & Power Company, of this city, met and decided to widen the electric current for Flemingsburg, and to discuss plans for extending lines to various smaller cities in Fleming county, and report was in finally agreed upon that the line should be extended from Flemingsburg to Maysleta, in this county, and to Elizaville, Ewing and Hillsboro, in Fleming county, and voted to increase the capital stock from $35,000 to $60,000. Work will begin on the extension just as soon as the required $25,000 increase has been made.

Not only has the M. & F. Light & Power Company been of invaluable benefits to Flemingsburg and Hillsboro as well and their branch lines to the above named towns will be a very enterprising move and should present prosperity for the two counties.

A total of more than $90,000 pounds of tobacco was delivered to the pool receiving plants in Carlisle the first three days of the week, and receipts for the week are expected to pass the half million mark. Negotiations have been made up until Christmas with a few exceptions. The pool has adopted the same policy enforced last year, that of prohibiting the local warehousemen releasing the average advance. As the average advance paid is the most important news to the farmer, The Mercury regrets that the association says fit to adopt a policy of secrecy.

LOCAL BOY POPULAR AT UNIVERSITY OF KENTUCKY

Frank J. Cummins, son of Mr. and Mrs. Richard Cummins, of Carlisle, is a Sophomore at the University of Kentucky. He is registered in the College of Engineering, and expects to specialize in civil engineering.

Besides being an active student in his class work, this Carlisle High graduate holds other distinctions. He plays the clarinet in the University band, which is considered the best of its kind south of the Mason-Dixon Line. Other schools have passed many favorable comments on this band, which is under the leadership of Sergeant Keesey. Frank is a member of the University Phi Harmonic Society, also of the Dukes Engineering Society; nor does he abandon the more serious aspects of college, being a member of the University Catholic Club.

The University is proud of the remaining students from Carlisle, and wishes to extend invitation to the oncoming graduates of that town.

PREPARATIONS FOR CHRISTMAS MAILING

The local postoffice will make every effort to handle Christmas mail without congestion and delay. Compliance with the following suggestions will greatly aid the postoffice and insure the prompt handling of your mail:

All parcels must be securely wrapped or packed. Use strong paper and heavy twine.

Addresses should be complete, with house number and street. Write postoffice box or rural route number. Use typed or plainly written in ink. A return address should be placed in the upper left hand corner of every piece of mail.

Postage must be fully prepaid on all mail. An unusually valuable domestic parcel post mail should be insured. Parcels not exceeding $50. In excess of $50, $ cents; not exceeding $25, 5 cents; not exceeding $50, 10 cents; not exceeding $100, 25 cents.

Coins, currency, jewelry and articles of similar value should be sent by first class registered mail.

Shop now and mail early for delivery. Remember there will be no delivery on Christmas Day.

Aluminum furniture is now being made for homes and offices.

Florida now requires all real estate dealers and agents to be licensed.

The sewing machine is first on the list of useful farm house appliances.

NAUGHT CAN COMPARE WITH GIFTS TO WEAR

They fill a practical and personal and perennial need. They are worn Christmas morning in the very shadow of the Christmas tree. They are presents of uncommon sense, which, more's the pity, is not so common around the holidays. They cost so little and comfort much. They bespeak generous thoughtfulness of a man's material well being

25 Miles
Average Distance Moved Daily by Each Freight Car During First 6 Months of 1920

37.4 Miles
Average Distance Moved Daily by Each Car During Same Period of 1925

40 Million Dollars Saved
to Shippers by Better and Quicker Freight Service

The graphic chart above tells a most interesting economic story. The increasing by 50 of the average daily movement of freight cars, or freight cars on American railroads, saves to American shippers the immense sum of forty million dollars in interest charges.

It is estimated that the average value of the commodities carried in any given time is two billion dollars. The annual interest rate on this amount is six per cent, or one hundred and twenty million dollars, so that a reduction of one-third in the average length of time this money is tied up amounts to forty million dollars.

These startling figures furnish another example of the greatly increased efficiency of railroad operation of the steam carriers of the United States.

The L. & N. is constantly increasing the efficiency of its service to the public by the use of the best modern methods and equipment. It is always glad to receive suggestions for betterment of service.
