Firestone Double the Mileage at Half the Cost
Only a few years ago \$32.4 cord tire retailed over \$50.00. Today, you can buy the highest quality Firestone Double-Cord tire for only \$24.95.
Last spring our rubber cord tires were sold for about \$24.95. Today, it is over \$50.00.
It was not long ago that 7,500 miles represented the average life of a cord tire, while today, 15,000 miles—double the average life—represent the normal performance for a Firestone Double-Cord tire.
Due to large, concentrated production, specialized machinery and improved factory methods, together with economical distribution, Firestone is able to keep the price low—no matter where the price of crude rubber goes.
And, because of special Firestone processes, chief among which are the special mixing which is Gum-Dipping and the special curing process, Firestone tires are long wearing and give more miles per dollar.
