MORE FOR ROADS

Crowe Plan Provides for Highway Funds Raised by Fairest Method, the Gasoline Tax.

Figures obtained from the motor vehicle departments of adjoining states show that a license on a Ford car costs:

In Kentucky, $13.57.
In Ohio, $4.
In Indiana, $5.
In Illinois, $8.
A Dodge Car license costs:
In Kentucky, $17.50.
In Ohio, $6.
A Packard license costs:
In Kentucky, $22.21.
In Indiana, $10.

Kentucky automobile license fees are higher than those of any adjoining states, are higher than those of any state in the union.

ROBERT T. CROWE, of La Grange, candidate for the Democratic nomination for governor, proposes a reduction of motor license taxes.

He advocates retaining the five-cent gasoline tax, which was passed in 1926 as an emergency measure and will automatically return to three cents a gallon in 1928 unless re-enacted by the legislature.

The gasoline tax pays more into the road fund than the motor license tax. Increased use of gasoline will mean still greater increase in the fund from this source.

The cost of collection of the gasoline tax is small; the cost of collection of license taxes higher than those of adjoining states is large and enforcement of the law is difficult.

THOSE WHO PAY the motor license fees in Kentucky now are forced to pay for themselves as well as for those who shirk and "double" cross from other states.

EVERY MOTORIST who uses Kentucky roads helps the road fund through the gasoline tax. The gasoline tax places the burden justly on ALL WHO USE THE ROADS whether Kentucky cars or tags, whether living near a state border or on the interior, whether willing to share the burden or willing to shirk and bootleg.

Mr. Crowe Proposes More Tax Roads, Less For Collection And Enforcement

Let all help in sustaining the road fund so that the road-building program can be completed and the agreements of the highway commission with all the local courts of counties that have voted bonds and special taxes can be kept.
