DO YOU TALK IN YOUR TELEPHONE - OR AT IT ?

do you talk *in* your telephone - or at it ?

The rather mouthpiece on the telephone transmitter was put there for a specific purpose. It concentrates the sound waves when you speak in your telephone. Now if you merely talk of your telephone, holding the transmitter to one side or several inches away from your lips, the sound waves that emanate from your mouth will be scattered in all directions and will not be concentrated into the transmitter. Therefore, the person at the other end of the line will find it difficult to understand you.
