**HOW TO BRACE WEAK TEETH**  
Department Agricultural Experiment Station  
Homer C. Conner

There are a great many teeth, both front and permanent, that need bracing to prevent breaking or coming loose. The bracing is done by means of a wire or a small plate of metal fastened to the teeth and held in place by small pieces of gold or silver. The bracing is done by means of a wire or a small plate of metal fastened to the teeth and held in place by small pieces of gold or silver.
