**OF Your Corn Tobacco**

is getting a late start try an application of FERTILIZER alongside the row. As you work the crop the plant roots will reach out for this Plant Food and we believe you will find the results profitable.

Try a few sacks of our 2-12-2 for corn or 3-8-6 for tobacco. If you do not care to treat your entire crop experiment on a few rows at least.

Better still, mix some Nitrate of Soda with the Fertilizer.

**Carlisle Coal & Feed Co.**

Now is the time to get the Bean Beetles or they will get the Bean.
